# REPORT OF THE COMMISSIONER OF INDIAN AFFAIRS.

---

DEPARTMENT OF THE INTERIOR,  
OFFICE OF INDIAN AFFAIRS,  
*Washington, D. C., September 30, 1918.*

SIR: I have the honor to submit this, the eighty-seventh, annual report of the Bureau of Indian Affairs, for the fiscal year ended June 30, 1918.

## THE INDIAN'S WAR ACTIVITIES.

During the last fiscal year the affairs of the Indian Bureau have been interwoven with the problems of the war and its grave pending issues. We have done nothing without considering its relation to this overshadowing situation. We have released from the Indian Service, for transfer to more direct war duty, every employee who could reasonably be spared, observing the principle that no man who can be replaced is indispensable. We have endeavored to give the Indians a clear understanding of their relation to the war and their part in its prosecution, whether at home or abroad, and have seen them fall in line with marked intelligence and inspiring patriotism for service in every kind of activity to which the white man responds.

They have signally honored themselves and their country by entering some branch of the Army or Navy; by offering their money in war loans to the Government; by increasing the product of the country's foodstuffs and complying with the public food regulations; by swelling the ranks of wage earners in periods of labor depletion; by generous and eager contributions in money and service to every phase of organized relief.

AS TO SEPARATE INDIAN ORGANIZATIONS.—Early in the period covered by this report, I dissented from proposed encouragement of separate units of Indian soldiers in the Army as not in harmony with our plan for developing the Indian's citizenship and said:

We want to make him a vital part of our national life and have him feel that he is, but I doubt if that thought can be properly upheld by encouraging a racial recognition in defense of a common cause. It is increasingly apparent that our American civilization is to have a profound influence upon European conditions. It may yet be the leading power to rescue some of the Old World peoples from medievalism. If so, we must retain in its definition larger than anything else, the word "Unity."

I want the Indian to go into this conflict as the equal and comrade of every man who assails autocracy and ancient might, and to come home with a new light in his face and a clearer conception of the democracy in which he may participate and prosper. I

feel, therefore, that his logical and inevitable place is shoulder to shoulder with the white man, that his rights and duties are there, and that our obligations are due him in that relation to the end that he shall receive under like discipline the same respect and consideration given to other soldiers. I think we should give special care to the maintenance of this military relation and see to it that the young Indian soldier feels no discrimination. I think the best military status for the Indian is with the organizations of white soldiers, where under the usual Army discipline the benefits are measurably reciprocal, with a definite educational advantage to the Indian. The military segregation of the Indian is altogether objectionable. It does not afford the associational contact he needs and is unfavorable to his preparation for citizenship.

My personal observation when visiting cantonments and reports to me show that the Indians are making remarkably good soldiers, and I am gratified to learn that they are placed without regard to the fact that they are Indians. This mingling of the Indian with the white soldier ought to have, as I believe it will, large influence in moving him away from tribal relations and toward civilization.

From the standpoint here suggestively stated, to which other reasons might be added, I regard it as inadvisable to call a council for the purpose of arousing sentiment by agitational appeals to the Indians in the direction of separate military units, but that on all reservations and at Indian schools on and off reservations throughout the service and among Indians everywhere, the spirit of patriotism and loyalty should be taught and emphasized, and that all Indians acceptable under military regulations should be encouraged to enlist in some organization of the regular establishment.

REGISTRATION.—The registration arranged for June 5, 1918, of Indians who became 21 years of age since June 5, 1917, was conducted as that of the preceding year by cooperation of the superintendents with the State authorities, which proved to be the most expeditious and least expensive, and was acceptable to the Provost Marshal General, as expressed in the following paragraph from his letter to me of May 2, 1918, outlining the necessary preliminaries:

The rules for conducting the registration of Indians are not to be inflexible, and much will be left to your discretion and judgment. Remembering the effective manner in which your organization conducted the registration last June, it is the disposition of this office to leave the details of the forthcoming registration entirely in your hands.

The registration of the Indians has been generally very successful, notwithstanding the currency of one or two news items to the contrary, which may never be fully overtaken by corrected reports. There has been practically no resistance, except through misunderstanding, and no conditions have arisen obstructive to the intent of the conscription act.

Considerable uncertainty arose in connection with the first registration as to what constitutes Indian citizenship, and while, usually, the question of citizenship is an individual one involving a consideration of the facts in each case, the situation was later much clarified by furnishing superintendents with the following general rules for use in doubtful cases:

I. Indians whose trust or restrictive fee patents are dated prior to May 8, 1906, are citizens by virtue of section 6 of the act of February 8, 1887 (24 Stat. L., 388).

II. Indians whose trust or restrictive fee patents are dated May 8, 1906, or subsequent thereto and who have received patents in fee for their allotments are citizens by virtue of said section 6 of the act of February 8, 1887, as amended by the act of May 8, 1906 (34 Stat. L., 182).

III. Section 6 of the act of February 8, 1887, both before and after its being amended by the act of May 8, 1906, provided that:

“Every Indian born within the territorial limits of the United States who has voluntarily taken up, within said limits, his residence separate and apart from any tribe of Indians therein, and has adopted the habits of civilized life, is hereby declared to be a citizen of the United States, and is entitled to all the rights, privileges, and immunities of such citizens \* \* \*.”

IV. The solicitor of this department has held that where Indian parents become citizens upon allotment their minor children became citizens with them, and that children born subsequent thereto were born to citizenship.

ARMY AND NAVY ACCESSIONS.—In my last annual report I could not give with much certainty the number of Indians in war service. Later a systematic effort was made to procure reliable data as to the number enrolled for active duty by enlistment and draft, which is still incomplete, but sufficient for a close approximation, and justifies an estimate of 8,000 Indians now in training or actually in some branch of the Army and Navy. Of this number approximately 6,500 are in the Army, 1,000 in the Navy, and 500 in other military work. It is also significant that fully 6,000 of these entered by enlistment. Moreover, it should go into the record that many Indians from our northern reservations enrolled in Canadian military organizations before the declaration of war by the United States. I am perfecting as rapidly as possible this roster, the work of which has brought me into intimate touch with many of our Indian soldiers whose letters from cantonments or abroad are full of interest and in unpretentious language sound a note of steadfast courage, optimism, and a broadened view of the great events in which they mingle. Letters reaching me from abroad show that the Indians, some of them from “blanket” tribes, are acquiring a better use of English, and even learning French. They also note the methods of foreign agriculture and the intensive economies of peasant life, and are thus students of conditions more or less applicable to their own occupations. Considering the large number of old and infirm Indians and others not acceptable under the draft, leaving about 33,000 of military eligibility, I regard their representation of 8,000 in camp and actual warfare as furnishing a ratio to population unsurpassed, if equaled, by any other race or nation. I am very proud of their part in this war. They have placed themselves in a concrete and vital relation to the Government under whose protection they live and in the administration of which they are destined to participate, and have entered a school of rugged experience that can not fail to fit them more thoroughly for the service and the competition of civil life. The day

is not beyond my vision when the brain and soul of him whose ancestors dwelt in this land before the white man dreamed of its existence shall find illustrious expression in the order and liberty and power of our national greatness.

I reluctantly withhold a detailed account of the many instances of tribal and personal patriotism and of individual valor and achievement by our Indian soldiers in the service of both Canada and the United States that came to my attention during the year, for no record here would seem fittingly impartial that did not include the hundreds of noteworthy and authenticated incidents on the reservation, in the camps, and in France that have been almost daily recounted in the public prints. The complete story would be a voluminous narration of scenes, episodes, eloquent appeal, stirring action, and glorious sacrifice that might better be written into a deathless epic by some master poet born out of the heroic travail of a world-embattled era.

**LIBERTY BONDS.**—Hardly less important than the man with a gun is the man with a bond. The Indians on the reservations ineligible for enlistment or draft were prompt to see the Government's financial needs in all the operations of warfare. Last year I reported that their subscriptions to the first issue of liberty bonds amounted to \$4,607,850. Subscriptions to the second issue were \$4,392,750, and to the third issue \$4,362,300. They are only such results as are known to the various field superintendencies and reported by them. However, I have enough reliable information from numerous sources to show that many subscriptions were made through banking channels in localities where the Indians quite generally have acquired citizenship or have no fiscal relation with a reservation, official report of which did not reach this bureau, and I am sure that a conservative estimate of such additions to the list would raise the grand total to \$15,000,000, or a per capita subscription of approximately \$50. It is true that the moneys thus invested were largely individual trust funds drawing a rate of interest less or nor exceeding, the rate of the bond, but the subscriptions were in accordance with the wishes of the Indians and were a true index of their sentiment. The equivalent of a \$50 liberty bond for every man, woman, and child of the Indian race in the United States at the close of our first year in the war needs little comment. It speaks for itself. It writes itself indelibly into American history and into the annals of all progress; it is an expression of patriotic allegiance to the right side of a contest involving the fate of humanity, as extraordinary as it is gratifying.

In all these transactions I have been amazed by the wonderful and spontaneous fidelity of the Indian to the highest welfare of the Nation, as well as his ready appreciation of a desirable investment.

The promise of thrift and the saving habit as a coordinate feature of his response to our present colossal needs is a most encouraging evidence of growth toward the principle of self-support, so essential to his stability and progress as a citizen. I have had occasion to say that man has no stronger element, when properly developed, than the disposition to acquire property, own a home, and be a substantial factor in society, and I hail this growing manifestation in Indian life as a sure basis for the strong and trustworthy citizenship to which our efforts are directed.

RED CROSS WORK.—The cooperation of the Indians, young and old, with the Red Cross and other agencies for war relief developed during the year into a most important factor of philanthropy. In many instances the Indians inaugurated with but little outside assistance, lively campaigns for funds through social gatherings, auction sales of contributions, and various community activities.

The reports coming from the different Indian schools and field workers show little more than a fragment of the relief work done by the Indians, for the reason that large numbers in localities near towns and white communities affiliated with local chapters in gifts of both money and service, of which only estimates are at hand, but it is known that on many reservations practically every adult subscribed a Red Cross membership fee or more. The actual data received justifies a report, in round numbers, of 10,000 Indian Red Cross memberships, 100,000 hospital garments, knitted, and miscellaneous supplies. Some 500 Christmas boxes were sent from the boarding schools, where the students are very proud of their soldier representatives. The larger schools collected "Students' Friendship War Funds" aggregating thousands of dollars, and in many cases coordinated their relief activities with the vocational outlines of the course of study.

Although it would be gratifying to swell the above estimates, as assuredly could be done, with complete data, I am content with the prevailing situation which arises from the fact that the Indians are largely mingling their efforts with the whites and are glad to do their work for the great good it accomplishes rather than from a spirit of racial emulation. There is thus the same union of purpose, opportunity, and service in the doing of great and unselfish things that prevails in the fighting ranks and that knits together all our higher interests as Americans.

The limits of this report could be easily filled with matters of relevant interest. A few incidents only are given.

The championship in knitting has been generally conceded to Mrs. Sarah Valandre, an Indian of a South Dakota reservation, who began a soldier's sweater at 2 p. m. and completed the garment, which was an excellent piece of work, at 10.30 the same evening.

The Indians often write letters to the superintendent, accompanying their donations. One of them begins: "I inclose here \$5 to the American Red Cross, the great organization of mercy whose activities know no bound in territory, no limit in service."

A superintendent in Utah reports 511 subscribing members among the Ute Indians, with total subscriptions of \$4,980. At a public gathering on this jurisdiction, among the scores who lifted hands as contributors, was an old woman of 75 years who spread all fingers of one hand. The superintendent, understanding that one finger meant a sign to give \$10, recorded her for \$50. A few days later, when she limped to the agency to fill out her Red Cross card, she was indignant at the amount and explained through an interpreter that she meant \$500. "But," said the superintendent, "you have only \$513 to your credit." Quickly came the answer, "\$13 left? That's enough for me." Another superintendent reports: "Three Indians have each contributed a steer which sold for \$70, a total of \$210, to the Red Cross."

On a small reservation far north, where the winters are long and severe and the Indian must struggle for the necessaries of life, more than \$1 per capita for every adult was paid in cash for the Red Cross and other war-relief purposes. In the far Southwest, where the parched desert gives scant returns and sheep raising is the chief means of support, many of the Indians have each promised a fleece of wool for the Red Cross, and the superintendent plans the spinning of this wool and knitting it into socks, sweaters, etc., by the Indian women. In a Montana district, where the Indians are nearly all fullbloods, they voluntarily held meetings and each one who had a growing wheat crop promised to donate one sack of wheat for war-relief work. On another reservation where the Indians are very poor and have little ready money they donated an abundance of handsome bead work and other curios to be sold for the Red Cross.

One of the smaller schools in Oklahoma reports:

Our school has affiliated with the county chapter of the Junior Red Cross and has a working organization of 176 members, being the total enrollment of the school. Wednesday evening of each week and such other time as can be spared is devoted to making Red Cross supplies.

The lady superintendent of one of the boarding schools for girls of the Five Civilized Tribes in Oklahoma on her request was authorized to introduce Red Cross work as a regular feature of domestic-science training and has accomplished splendid results. From her full report the following is gleaned:

Our girls are deeply interested in all war work and respond so readily to our requests for additional garments. Several supervised periods are given the girls each week to insure a certain output of knitted articles. Then the interest is kept up by means of parties held by the various teachers, and at which time Hooverized refreshments play an important part.

The very small girls knit up the scraps of yarn into refugee caps, afghan squares, etc. Also they utilize the scraps from the hospital garments making quilt blocks. Larger scraps are used for small underskirts for the refugees. The lesson in thrift in this one feature is invaluable to us. Gun wipers have been cut by the hundred. Prizes have been offered for activities to stimulate interest.

Small Red Cross dolls have been made and sold for our fund. These the children enjoyed making and selling. Each month children write letters to their guardians, in which they send report cards. They ask earnestly that money be sent to them that they may take part in this great war. Their letters show their enthusiasm and patriotism.

We are reading "Red Cross Stories," and our children will all leave us with a good general knowledge of how the Red Cross began, its struggle and success. This line of thought is kept before our girls and teachers continually and if in no other way than by absorption, they will surely get the spirit of and necessity for this war work.

We are not willing for our girls to go back home and sit with folded hands all summer, so the plan of giving personal letters of introduction to girls efficient with the needle to be handed the heads of Red Cross chapters in their community will be carried out.

Regular flag salutes are given on the campus and in the dining room. The Red Cross has strengthened our heads, hearts, and hands, and has brought to us just the lesson we have so badly needed—the lesson of service and thrift.

An interesting account comes from a northern Minnesota reservation, where it is believed the first Indian Red Cross auxiliary was started in the spring of 1917, in the course of which the president of the auxiliary says:

There was no spectacular coming of hundreds of Indians to unite in the then almost unknown work of the Red Cross. One Indian woman was present at the first meeting and has since been most faithful in her efforts. Week after week the little band of women met and carried on the work assigned them. Week after week the cautious Indian women came and took part in the work, until at the end of nine months three-fourths of the members are Indians. The auxiliary numbers 48, and this from a community of less than a hundred adults. Some of these women have walked to the weekly meeting place across the ice from Old Agency when the temperature was 20° below zero. They have sewed on hospital shirts and socks and learned to knit the various garments just as their white sisters of the cities have done. The most remarkable and encouraging part of the Indian work is that it has been one of increasing personal interest and continued activity.

One evening recently an Indian and his wife, living 17 miles away, came to the home of the treasurer and inquired about the work being done, the woman bringing her dollar for membership, saying, "I want to do something for my country."

I can not refrain from this reference to the interest of the Indians in Red Cross work, although it can give little more than an intimation of their wide-spread and open-hearted response to the sacred appeal which more than anything else tells the difference between the civilization of a free people and the barbaric cruelties of autocracy. Among the compensations coming to the Indian from the war is the one he has already accepted, viz, that the great principles and ideals that are worthy of a trained warrior's daring are one with the divine impulse to do good and help others; that the cool bravery of his son in the trench and the gentle ministry of his daughter in a Red Cross hospital are the sublime coordination of human service to the highest end.

**FOUR-MINUTE SERVICE.**—Early in February, 1918, I issued instructions to all superintendents to participate so far as possible as four-minute men in the campaign for the sale of war savings certificates, furnishing them with appropriate bulletins and literature. This was done in cooperation with the Committee on Public Information whose representatives found it difficult to reach many of our reservations and schools situated some distance from the towns where they were scheduled to speak. The plan was generally successful and developed much interest among the Indians, both adults and the children in the schools, and the sale of war savings stamps grew into large proportions among those of limited means. Stamps were in many instances purchased from individual and unrestricted funds representing the actual earnings of the purchasers who thus evinced a special inclination to save and acquire an interest-bearing investment. They were usually purchased through the postmaster, or other agency provided for their sale, and held by the Indians themselves. It is not practicable to submit a definite report of these sales, but returns from the field service generally show a widespread and growing demand for "baby bonds," and a feeling that their purchase is a patriotic "bit" within the reach of all.

**COOPERATIVE AGRICULTURE.**—It was our purpose throughout the year to place all agricultural and industrial pursuits of the Indians upon a war-winning basis, and in correspondence with superintendents upon spring farming operations for 1918, I said in part:

I assume that you have already done much preliminary work among the Indians for the coming planting season, and feel sure that you will join me in the purpose to make last year's campaign for increased production on Indian land only the beginning of a much more successful one this year. The results of the previous year were very gratifying, but the demands upon us have increased. The industrial welfare of the Indian is itself a perpetual call to improve upon each preceding year; not by attempting too much, but by handling intelligently and intensively as much land as means and equipment will justify. I urge you to impress upon the Indians that anything less than this is not successful farming. Keep it before them as convincingly as you can that the farmer or stock grower who does well is always trying to do a little better.

Again, our international demands promise to be much more extraordinary than hitherto. Our soldiers are going to the front. They, with the armies and all the people of our allies, must be fed. Our fields are not overrun and laid waste by the enemy. The yielding capacity of our acres should be larger than ever. The troops we send abroad increase rather than lessen our obligations to produce subsistence for export. We are this year confronted by a more exacting emergency than ever before and every productive energy should respond to the utmost. The loyalty of the Indians has called forth the strongest praise everywhere. Thousands of them have entered active military service. I can not doubt that those on the reservations are equally patriotic and will give full proof of it by making every unused acre of land a war-winning factor in addition to supplying food and forage for home supply. Agriculture, industry, labor everywhere must lift this year every ounce that it can carry, not only for the actual and physical needs of the present, but for ideals and principles

sacred and essential in our national life, and the Indians must and will gladly do their part.

Therefore, I urge with increased emphasis that your season's campaign be well and aggressively organized. I need hardly add to your experience the suggestion for an unflinching follow-up plan of work and supervision, the pivotal features of which will, of course, consist (1) in getting the employees and Indians to see the situation as it is, and in arousing their responsibility as faithful promoters of their own interests and as patriotic Americans willing to match at home the loyal zeal and purpose of those on the sea or battle fields of Europe, and (2) by leaving nothing practicable undone in providing the necessary means and equipment, such as seeds, implements, and other supplies, for accomplishing the desired result.

Notwithstanding the war loss to our Service of many valuable farmers and stockmen, causing a shortage of supervision still unsupplied, there was last year a large increase of acreage cultivated by the Indians, often doubling that of the preceding year. Many also made a beginning in a small way, producing enough for their own needs and a little more. Many others exchanged their wandering habits for more settled farming purposes. A quickened impulse for home building appeared on many reservations. Greater preparation than ever was made for exhibits at Indian and State fairs and interest in the canning and preservation of vegetables greatly increased. The Indians became conspicuously more interested in the better methods of stock growing, the improvement of breeds, proper pasturage, winter feeding, and protection, and adequate water supply. Many of them are the rivals of the most successful white stock growers. Although handicapped in some sections by severe drought, the Indians last year responded with splendid interest and unprecedented results that show not only a steady progress but motives of aroused patriotism and a comprehension of the supreme war demands upon all our productive resources.

**THE LABOR SITUATION.**—In order to cooperate to the fullest extent with the aims and efforts under Federal direction for providing adequate labor for all lines of productive employment, I brought the matter to the attention of all reservation superintendents early in April, and said, in part:

Sufficient labor for all our productive and industrial demands is an instant and growing need. The casual reader knows how all belligerent nations abroad have been caught in the clutch of the labor problem; how their women and children, their old folks and cripples have had to help farm the fields and work in factories; how adjacent neutral countries are pinched by the scarcity of toilers in domestic activities. We are now facing a similar situation, and the causes are clear without graphic description. We must fill the places of our sturdy fellows who are in the trenches or on their way there. We must increase immensely our normal products for food and clothing to satisfy export demands, besides creating extraordinary supplies for actual warfare. These things are obvious without statistics. We face a labor shortage in certain areas and occupations and we should drive a wedge of workers into that condition wherever it is found. The Indian Service must help do this as far as possible.

As should be expected, agriculture will feel first and most the shrinkage in labor, for in addition to its contributions to the Army and Navy, many farm laborers are attracted to industrial centers by higher wages. Farming enterprises in various sections need Indian labor, and the Indians, if not profitably occupied with their own allotments or otherwise, need this employment. They need any employment that will associate them with the white man's operations in farming and live-stock interests or other successful vocations. They should also have every encouragement to respond from patriotic motives to the labor demands of the country.

It is very important that there be no idlers or intermittent workers among the able-bodied adult Indians this year when every ounce of productive energy is needed as a war-winning factor, and I feel assured that I can count on your prompt cooperation in this matter with a view of determining approximately the number of Indians on your reservation who can be spared for work in other localities and the probable number of such Indians who can be induced to accept employment at reasonable wages. In arriving at your estimates, I do not want you to overlook the importance of our duty to induce the Indian to cultivate his own land, engage in the raising of stock, or in some other productive occupation.

Having in mind that at most of the nonreservation schools, a number of which give the advanced courses in vocational training, there are considerable numbers of students sufficiently mature to perform manual labor, I addressed the superintendents of these jurisdictions as follows:

I have recently requested reservation superintendents to make special effort in the direction of having all surplus Indian labor employed as far as possible throughout the coming season of planting and harvesting, and desire your earnest cooperation with this plan to the extent of securing employment during the vacation period for your larger students who will not be needed at home or to assist in school activities.

All full-grown or nearly mature boys and girls, if in reasonable health, should be occupied all of their vacation in some capacity that will help produce and take care of the necessities of life. It is of crucial importance that no part of this year's harvest be neglected or wasted, and wherever help is needed in the fields or homes of farmers or gardeners Indian students competent for such work should be aided in securing it unless otherwise properly occupied. Please give this matter your careful thought and organize your efforts to the end that every young man or woman shall find a busy corner somewhere during the summer.

You can not too urgently impress upon all these intelligent young Indians their present patriotic obligation to join actively the ranks of workers whose toil is indispensable to our liberties.

I hope to hear that you will be able practically to aid and direct many of your pupils, particularly the older ones, into temporary employment that will be educational to them and helpful to the cause we must make victorious.

The past year shows a comparatively low percentage of unemployed able-bodied Indians. They answered the call for labor in something of the militant spirit that in these days has become essential to American activities, and wherever there was bridge or road work, lumbering or milling, fishing, planting and harvesting, irrigation construction, cotton or hop picking, orcharding, and vegetable gardening, or anything else that had to be done on a reservation, and often far from one, the Indian was generally in evidence with few words but with dextrous hands, patient endurance, and, what has been noticeable, with a dawning comprehension that American labor everywhere is a part of our

war force. I have learned of no suspicion that the Indian ever drove spikes in a saw log or threw a wrench into any industrial machinery. I believe he is under no indictment or sentence for sabotage.

The schools quite generally gave to Indian pupils the patriotic impulse to do their part. In many instances boys of 12 years and over signed pledge cards for summer work. The outing service of girls for domestic and boys for farm work with white families greatly increased, one school reporting 300 thus employed by the end of June. The larger boys going to the beet fields, fruit farms, and other summer occupations far exceeded former records. Older students of mechanical preferences have been successful in munition plants, and some 40 or 50 were placed in the Hog Island shipbuilding service. A letter from one of the large motor companies to our Supervisor of Employment closes as follows: "I wish to thank you at this time for the valuable assistance you have been to me, as all the boys are turning out to be first-class men and steady." "First-class men and steady" has the right ring. It tells the product we covet for our Indian schools. It answers well the Nation's need in times of stress and peril.

**PUBLIC FOOD REGULATIONS.**—In view of the extraordinary undertaking of the Federal Food Administration to handle and control the whole question of foodstuff supplies as related to our domestic and foreign demands, and to do it very largely by persuasion and appeal to the intelligent patriotism of the country, I beg to submit in full my Circular Letter, of April 13, 1918, in cooperation therewith.

**TO SUPERINTENDENTS:**

From the day the United States entered the war I have urged an increased production of foodstuffs at all Indian schools and on all reservations and have recently sought greater cooperation with the Federal Food and Fuel Administrations. I desire now to give even greater emphasis to the necessity for *saving* and the elimination of *waste*.

This year may not end the war; it may last much longer. In any event, there must go on persistent team work in intensive production and simplified consumption—the greatest yield and the utmost saving. Investigation has clearly shown that by a frugal, yet fully health-supporting use of foods, and a radical reduction of waste, we can maintain our national vigor in all lines of work and add enough to the home supplies of our allies to give them the energy they need for work and warfare. If we who remain, support with loyal efficiency the magnificent man-power going abroad, we will keep the world fit to live in. But we must get the feeling in every heart beat that the war is more than a distant danger; that the din of battle at our doors would not be more real and threatening.

Reliable estimates gave the supply of wheat in our country's mills and elevators on March 1 as 20,000,000 bushels less than one year previous and show that existing stocks of flour were much below 50 per cent of the normal quantity needed until July 1. The 90,000,000 bushels of wheat promised our allies between January 1 and July 1 is their minimum need, and we dare not curtail it. Some of the States have successfully substituted more than 50 per cent of other grains and vegetables for wheat, and the food scientists declare that the country generally can thrive on a fifty-fifty menu.

It is now well known that the consumption of our food staples, wheat and meat, can be reduced by using substitutes which are equally nourishing but not suitable for export, and the present emergency tells us that we must have "wheatless" and "meatless" days, if we expect to have warless days.

The Food Administration has given exhaustive study to the whole question of food supply and consumption as a war-winning proposition and, in cooperation with the Department of Agriculture, has put out in simple and complete form information for following a "saving schedule" in nearly everything we eat and yet keeping well and energetic on a properly balanced diet. It has issued a war cook book, pamphlets on war economy and food, and a number of valuable bulletins and leaflets covering in a practical manner the preparation and serving of the various substitutes for wheat and meat with special reference to maintaining the health of growing children and the working vigor of adults, including also timely lessons in the use of scraps and left-overs. The Administration has told the country things of incalculable worth in its eating and drinking, things as good for peace as for war. You will find in its publications the requisite instruction as to the kind and preparation of substitutes and their nutrient strength with the value and best food combinations of many kinds of grains and vegetables. Some of our Indian schools are reproducing this information in their publications, and more of them should do so. I am informed that each State college has an official designated to give war-food instruction and suggest that you avail yourself of this assistance wherever practicable.

I feel that the Indian Service should get into closer accord with this great movement authorized by law and strongly sanctioned by the President. With this circular will go to you samples of information for public guidance, and you are urged to cooperate with your State food administrator and secure such supplies and instructions as will bring effective results within your jurisdiction. The Administrator's suggestions should be followed in all school kitchens and dining rooms and at the mess tables of all employees so far as local conditions and the maintenance of health will permit.

The Food Administration is giving strict attention to health needs in its dietary régime, as a study of its prescribed munus with their nutritive properties will show. It is also furnishing lessons in war-time food problems suitable for high schools which should be of supplemental value to our vocational work in home economics. Some of our schools are now doing excellent work closely in line with the Administration's orders. Even in such little things as scrap savings from the tables, organized competitive work is eliminating waste and training the girls for practical "bits" in housekeeping.

This is to be the year for school war gardens the country over. Let us be in the front rank for all such work. This year we should plan and labor for not only the fullest bounty of the soil on every school farm and garden and every Indian's allotment, but we must care for the harvest with scrupulous diligence. Our canning, drying, and preservation of fruits and vegetables must have greater attention than ever. Our protection of crops and the feeding of stock must show the minimum of wastage. Every kitchen and root cellar, every silo and feed lot must be a war-winning auxiliary. We must make a working maxim of the fact that a weekly saving of a pound of bread for each person in the United States will increase our annual wheat exports a hundred million bushels. This is the year to translate every pulsation of patriotism into activity that produces and conserves.

It is quite as important to save as it is to produce; in fact waste involves loss of energy as well as expense. Conditions over which we have no control may prevent production, but waste is preventable and should not be permitted or tolerated; it is inexcusable. I am sure that much can be accomplished by farmers, field matrons, physicians, day-school teachers and all workers in practical contact with the home life and activities of the Indians. The Indians, young and old, have shown willing and marvelous support of our American ideals against the mad challenge of despotism

and they will under wise counsel respond to our plan for increased products and reorganized consumption. The very stress and tragedy of these days may be turned to their advantage by teaching them how to save, how to take care of the small things, how to value thrift, how to lay up for the future, how to be provident and happy in temperate and industrious living. The program thus far outlined by the Food Administration is not oppressive. It is rather educational toward sane and simplified living. We should get behind it with complete loyalty. Superintendents should see that traders comply with it. Where flour mills are in operation on reservations, superintendents should give careful attention to the output in order that the food policy of the Government may be fully supported.

In all this work it is well to remember the warning from eminent authorities that the American as a rule eats too much, that as a people we would be healthier, stronger, and more effective in accomplishment, if more frugal in our eating. We eat beyond our physical requirements and suffer corresponding injury.

Our system of purchasing supplies may, under contracts now closed, prevent complete adjustment of rations to the food regulations immediately, but for such supplies as can be carried over with entire safety, there should be made, wherever practicable, the substitutions recommended by the Food Administrator, and if funds are lacking for this compliance, you may for school purposes, draw on funds already hypothecated for salaries and other expenses, and the amount, or so much thereof as may be necessary, will be replaced from the emergency fund recently appropriated.

I desire you to give this matter your personal and prompt attention, and shall expect every employee under your jurisdiction to cooperate with you fully.

The general tenor of many responses by superintendents regarding compliance with the food regulations is indicated by the following extract:

The schools have been put on a fifty-fifty basis as to wheat products, and really a little more so. The pupils seem to enjoy the diet, and there is no question as to its wholesomeness. Waste is reduced to the minimum, and then what there is in way of unavoidable waste as to human consumption is fed to chickens and pigs, so that there is no ultimate waste, nor is there any thing left for the flies to lay eggs in.

A liberal use of food leaflets was made among the Indians who, in some localities, did not readily understand why they must purchase substitutes with certain supplies, but upon having the matter explained and finding that the same rule was applied to all white customers, they adjusted themselves to the situation and in many instances became champions of the Federal food policy.

PHILOSOPHICAL PHASES.—The war in its earlier stages was appalling in its proportions and bewildering in its possibilities. To-day we are getting its vast perspective. We are seeing ourselves in it, and glimpsing in its clearing vistas the destiny of many nations. Amidst unspeakable evil we are finding the good. From the blackness of error and falsity, white truth emerges. Moral and spiritual principles, old as eternity, have appeared because we have been searching for the good, the true, and the just. The war's necessities are creating its compensations. Many of its victories, perhaps the greatest and most enduring, are already won, not only "over there" but here and everywhere—on "no man's land" and on every man's land, and in every man's brain and soul and lifted ideals. These

victories are bringing us hard sense as well as sublime motive; they are practical because of high moral value; they are teaching us how to live and what to live for. Here in America they mean all that comes with thrift, discipline, temperance, conservation, curtailment of luxury, the peace that follows hard work for great ends, the dignity and joy of pulling together unselfishly, the inspiration to fulfill the struggling hopes of oppressed peoples. We fight, not as our enemy for conquest and subjugation, but for government by the governed and for international justice. The great moral issue voices the difference between a despotic and an altruistic spirit; the difference between Deutschland über alles and America for all.

In America we are building imperishable traditions and unifying our democratic individualism into deep, common purposes. We are strengthening both national consciousness and national conscience, proving democracy's excellence and stability and commending, as a moral obligation, its liberty and justice to all governments. The supreme peril of the ages is developing not only our heroic and ambitious virtues, but all the finer and sympathetic humanities. The deeds done for freedom will throb in the breast of the world forever, and no superimagination can foretell the progress and achievement that will follow the present intensity and concentration of man's thought, whether applied to land or sea or air, or the countless activities there. The ministrations of the Red Cross and all other humanitarian agencies for relief are lifting mankind into an atmosphere of universal good will. The great movements to restore and reeducate disabled soldiers and to find for them the means for self-support that are essential to self-respect are reconstructive processes that bring to our collective life the habits of cooperation and brotherhood.

But how is the Indian related to all this? He is a part of it, actively, integrally. It is his opportunity, his education, his experience, his remaking. In the midst of the most decisive and expansive achievements of all history he is a learner of the eternal principles involved; he is a student of the rights of individuals, of nations, and of international ethics. He is in contact with very much both at home and abroad that has to do with the war. Moreover, he has arrived at the intelligence and moral attitude of the American viewpoint. It is something to challenge attention when eight or ten thousand of a race which within the memory of living men knew little beyond the restraints of barbarism cross the ocean as crusaders of democracy and civilization.

It is reasonably due the Indian to mention the contributions of his more primitive endowments to the methods and strategy of modern warfare, as disclosed in individual adroitness of attack, in trench tactics, in concealed approach and creeping offensive and in

many successful features of reconnoissance and maneuver, which are conceded to be largely borrowed from the aboriginal American who was ever a natural trailer, who slipped noiselessly through tanglewood and made himself a part of the trees, who was a born sharpshooter, a scout by intuition and an instinctive artist in the intricacies of camouflage. The student of American military operations tells an interesting story of the accretions to military science and practice filtered from Indian warfare between colonial days and the tragedy of the Little Big Horn.

Severe indictments against the Government's connection with the Indians have appeared in former years, from sources acting under executive authority, proclaiming "a shameful record of broken treaties and unfulfilled promises." It will not be denied here that the Indian through long years of disappointment was crowded back and back until literature lamented him as a vanishing race with broken arrows and dead campfires, and art sculptured him in hopeless desolation at the end of the trail. Certainly the original American who felt himself the first homesteader of this continent and in his native honesty could comprehend no prior rights to all its plains and rivers and forests has found himself too often relegated to rocky regions or arid wastes where sustenance must be coaxed from unwatered sands. Recent administration, however, has had no part in such conditions. The later attitude of the Government toward the Indian has been a sympathetic, humane, yet definitely practical one. It has recognized him as a man, the first and hyphenless American, possessing a quick intellect, a glowing spirituality, an ardent love for his children, a brave heart, and fidelity to his promise until betrayed. These must be accepted as human attributes and are so proven by the large percentage of Indians who to-day attend church, live in well-arranged houses, are English-speaking citizens and voters, capable artisans, successful in business, in the learned professions, in literature, and in legislative assemblies.

Our recent policy clearly has been that we want no dead Indians, good or bad, but will do all in our power to save their lives and keep them in health. That much has been fundamental, and every possible energy has been directed to that end. The facilities have not been fully adequate, but the remarkable results are seen in better homes, better sanitation and hygiene, more healthy, laughing babies, and more vigorous, happy adults.

After life and health has come the Indian's education, and all previous efforts have been increased to provide for him schools and industrial training, to teach him to use his brain efficiently and his hands skillfully, to send men of practical experience to assist him in farming, gardening, and stock raising. The splendid output of our

school system and the greatly enlarged product of Indian tillage and live stock are the answer to these efforts.

Under that policy it has been our purpose to protect the Indian's property and his personal rights, to make it difficult for sharks and shysters to despoil him of his just possessions or exploit him for mercenary gain, and, so far as possible, to stand as a friend and counselor between him and unscrupulous mischief-makers, who encourage discontent in quest of fat fees for correcting conditions that do not exist.

Finally, we have begun the speedy release from guardianship of all Indians found to be competent to transact their own affairs, giving to all such a full control of their property of whatever description and recognizing their status to be the same in every respect as the white man's.

In all these things our aim has been to extend the helping hand, to restore the Indian's faith in friendship, and give him reason to feel that his welfare is a part of the general welfare, his interests one with the white man's, his advancement essential to our collective progress. We have endeavored especially to further his desire for individuality, self-reliance, initiative and the ability to stand alone, upon the truism that no man will become interested and progressive in the things he does not desire.

This policy has been in a marked degree fruitful. It is not too much to say that it has developed notably the Indian's confidence in the Government, made him feel that its flag is his flag, its weal his weal, its warfare his warfare, its destiny his destiny. It has revived the dauntless spirit of his ancestry and transformed it into the valorous stuff of American patriotism, so that he feels it an honor and a privilege to volunteer his service in defense of all that our Government with its laws and institutions means to ourselves and to the world. This policy, if continued, I believe can not fail to dissolve tribal bonds, remove inter-racial barriers, rescue the Indian from his retarding isolation, and absorb him into the general population with the full rights and immunities of our American life to which he is entitled from any standpoint of justice and wise statesmanship.

### THE NEW DECLARATION OF POLICY.

On April 17, 1917, we announced a declaration of policy which contemplated the release from governmental supervision, with all of their property, of practically all Indians having one-half or more white blood, and those with more than one-half Indian blood shown to be as capable of transacting their own affairs as the average white man, also all Indian students over 21 years of age who complete the full course of instruction in the Government schools, receive diplomas and demonstrate competency.

In the workout of the "new policy" the department is able to release from governmental control the "white Indians," and those who have demonstrated their capacity, at the same time enlarge and intensify its interest in the Indian who really needs aid and protection. In its application thousands of Indians have been given their freedom, and while some of those released have not sustained themselves, on the whole, this advanced step has been fully justified. It is the beginning of the end of the Indian problem.

Since the passage of the act of May 8, 1906 (34 Stat., 182), and modifying acts, there have been issued 16,500 patents in fee, covering 2,086,722 acres of land. Since April 17, 1917, the date when the declaration of policy became effective, there have been issued 6,456 patents in fee, involving 987,844 acres. In other words, the number of acres patented since the declaration of the "new policy," less than 18 months, nearly equals the area patented during the preceding 10 years, and the number of patentees is nearly two-thirds of the number to whom patents have issued during the 10 preceding years.

Of the 550 Blackfeet Indians who were declared competent during the year 1918, 120 have been issued patents in fee, only two of whom have disposed of their lands.

Competency commissions have visited the following reservations: Cheyenne River, Coeur d'Alene, Fort Berthold, Fort Peck, Hayward, Kiowa, Klamath, Lower Brule, Otoe, Oneida, Ponca, Pawnee, Pottawatomi, Shoshone, Standing Rock, and Umatilla. They have also visited among the Five Civilized Tribes.

### EDUCATING THE INDIAN.

We are more and more recognizing the fact that the Indian in his tribal state was not without a system of education suited to his needs. The young men were trained in adventure, endurance, and skill. The young women were trained in making the camp and in keeping it in order, in providing fuel, and in tanning and dressing skins and making them into articles of clothing. In other words, the Indian youth was taught the things he needed to know in order to protect himself and to provide for his physical needs with due regard to the prevailing conditions of his environment. While the chief aim of his education was to enable him to get a living, just as the chief aim of our education is to give us knowledge and the ability to make a living, still we should not overlook the fact that the Indians' system of education did not neglect cultural training. His tribal ceremonies, tribal lore, tribal art, tribal handicrafts, and his native music are all evidences of his appreciation of the cultural side of life. While he constantly emphasized the individualistic point of view, he also pursued cultural occupations for the satisfaction they afforded; he developed skill and courage for the purpose

of advancing his personal standing in the tribe; and he acquired a knowledge of tribal ceremonies for the sake of individual salvation and influence over others.

This individualistic aim of education was necessarily narrow and selfish. It tended to subordinate the welfare of the whole to the advancement of the individual. The progress of the tribe as a whole was not definitely planned and sought. The Indian under his tribal organization did not reach the state of conscious evolution. He was content to pursue the even tenor of his way with little thought of social progress or efficiency.

In our policy of absorbing the Indian into the body politic of the Nation, the aim of his education must be broad enough to include both the welfare of the individual and the good of society. We must also take into account the development of those abilities with which he is peculiarly endowed and which have come down to him as a racial heritage—his religion, art, deftness of hand, and his sensitive, esthetic temperament.

**THE COURSE OF STUDY.**—The course of study for Indian schools provides, through its prevocational and vocational courses, for educating the Indian youth along practical lines. The best part of all human knowledge has come to us through the five senses—the senses of sight, hearing, taste, smell, and touch—and the most important part of education has always been the training of those senses through which that best part of knowledge comes. The faculty of accurate observation, the acquisition of skill in doing, and the habit of careful observation, reflection, and measured reasoning are best acquired through the proper training of the senses. The opportunities enjoyed by the boy on a farm for training eye, ear, and mind; the discipline and motor training of the fundamental trades, such as those of the carpenter, blacksmith, mason, painter, plumber, etc., for boys; and practical courses in domestic science, domestic art, housekeeping, hospital nursing, etc., for girls, are recognized by the leading educators of the day as affording the best training possible for secondary schools, and they are characteristic features of the curriculum for Indian schools.

The central idea of the course of study for Indian schools is the elimination of needless studies and the employment of a natural system of instruction built out of actual activities in industry, esthetics, civics, and community interests. The development of the all-round efficient citizen is the dominating feature. So we are now teaching the Indian boys and girls to design and make beautiful and useful things with their hands; to study and understand the practical application of the laws of nature, and to apply and appreciate art in the cooking and serving of a meal, in the making and fitting of a garment, and in the furnishing and decorating of homes;

in designing and making useful tools and furniture, in building convenient, comfortable, and sanitary houses; or, peradventure, in making two ears of corn grow where only one grew before.

Nor is the cultural side of the Indian child's education neglected. In our larger schools we have literary societies, religious organizations, brass bands, orchestras, choirs, athletic clubs, physical culture classes, art classes, and various other student organizations and enterprises for promoting cultural training.

Educators everywhere are more and more recognizing the fact that the conventional curriculum of the ordinary school is an accumulation of years of custom, and that there is all too much of nonessentials and unprofitable repetition in the elementary courses. Especially is this true as to the subjects of geography, arithmetic, history, physiology, etc. For a long time these subjects were usually taken up in the primary grades in simple form and repeated in the intermediate and grammar grades with slight modification and in a little different language. Such repetition is not calculated to arouse the enthusiasm of the average boy or girl, and it is a waste of time to require a pupil to go over and over the same subject through two, three, or four grades in the usual perfunctory way without much serious consideration as to the aim to be attained or the motive.

As to nonessentials, it is a saving of time and expense to leave them out and thus make room for more practical and useful subjects. For example, in arithmetic, such subjects as powers and roots, ratios, and average, approximations, divisibility, foreign money, metric system, partial payments, duodecimals, stocks and bonds, etc., have been eliminated from the course of study for Indian schools.

As the Government Indian schools constitute an independent educational system they are at liberty to deviate from the conventional and to fit their courses of study to conform to the needs of their pupils.

With studies properly adjusted to the pupils' needs and with nonessentials and useless repetition eliminated, it is possible to provide daily three to four hours of productive industrial work on the farm, in the shops, or in the various domestic departments of the schools, without serious handicap to the academic work. Along with this productive work is given definite, systematic instruction, so that the pupil learns the theory while acquiring skill in doing.

The chief educational value of any sort of productive work lies in the plan employed in organizing and supervising the work and in logical, definite, systematic method of giving the class instruction. Experience has demonstrated that no teacher ever becomes so proficient that definite lesson plans are not essential to the best results.

The course of study for Indian schools requires that all teachers, both academic and industrial, prepare daily lesson outlines and follow them as closely as possible.

The following daily lesson plans in cooking for one week illustrates the form recently adopted and now in general use throughout the Indian School Service:

### SAMPLE DAILY LESSON PLAN.

*For week ending September 5, 1917.*

#### LESSON NO. 1.

*Subject:* Cooking (prevocational).

*Lesson assignment:* The kitchen, page 130, Course of Study.

*Aim:* To teach proper equipment for the home kitchen.

*Plan:* 1. Take pupils to kitchen and explain parts of cookstove, how to operate, and how to build fire.  
2. Teach names of utensils—their cost, use, and care.  
3. Discuss arrangement of kitchen furniture and equipment.

*References:* The Home and the Family, Kinne and Cooley, page 131. From Kitchen to Garret, Van de Water.

#### LESSON NO. 2.

*Lesson assignment:* Personal Hygiene in Kitchen, page 130, Course of Study.

*Aim:* To teach order, neatness, and sanitation.

*Plan:* 1. Discuss proper dress, care of hands, nails, hair, etc.  
2. Write important rules on blackboard.  
3. Make inspection of class as to neatness of person, calling attention to any untidiness.

*References:* Food and Health, Kinne and Cooley. Manual of Personal Hygiene, Pyle.

#### LESSON NO. 3.

*Lesson assignment:* Dishwashing, page 130, Course of Study.

*Aim:* To teach proper method.

*Plan:* 1. Discuss requisites—hot water, soap, dishcloth, etc.  
2. Demonstrate and explain proper method.  
3. Discuss relation of dishwashing to garbage can.

*References:* Kitchen and Dining Room Work, Willard. House Sanitation, Talbot.

In addition to the primary and prevocational courses, the following vocational courses are provided:

#### COURSE IN AGRICULTURE.

##### *First year.*

##### FIRST TERM (20 WEEKS).

English.  
Vocational arithmetic.  
Industrial geography.  
General exercises.  
Music<sup>1</sup> (band or orchestra).  
Physical training.  
Farm practice.<sup>2</sup>  
Farm implements.

##### SECOND TERM (20 WEEKS).

English.  
Vocational arithmetic.  
Agricultural botany.  
General exercises.  
Music<sup>1</sup> (band or orchestra).  
Physical training.  
Farm practice.<sup>2</sup>  
d selection and testing.

<sup>1</sup> Optional.

<sup>2</sup> Theory, 1½ hours per week; practice 2½ hours a week.

*Second year.*

FIRST TERM (20 WEEKS).

English.  
 Vocational arithmetic.  
 United States history and community civics.  
 Current events.  
 Music <sup>1</sup> (band or orchestra).  
 Physical training.  
 Farm practice. <sup>2</sup>  
 Horticulture and poultry.  
 Soils and soil fertility.

SECOND TERM (20 WEEKS).

English.  
 Arithmetic.  
 United States history and community civics.  
 Current events.  
 Music <sup>1</sup> (band or orchestra).  
 Physical training.  
 Farm practice. <sup>2</sup>  
 Horticulture and gardening.  
 Farm machinery; gas engines.

*Third year.*

FIRST TERM (20 WEEKS).

English.  
 Agricultural physics.  
 Farm accounts.  
 General history.  
 Current events.  
 Music <sup>1</sup> (band or orchestra).  
 Physical training.  
 Farm practice. <sup>2</sup>  
 Farm animals (types and breeds).

SECOND TERM (20 WEEKS).

English.  
 Agricultural chemistry.  
 Farm accounts.  
 General history.  
 Current events.  
 Music <sup>1</sup> (band or orchestra).  
 Physical training.  
 Farm practice. <sup>2</sup>  
 Farm animals (diseases of).

*Fourth year.*

FIRST TERM (20 WEEKS).

English.  
 Field crops.  
 Insects and insecticides.  
 Current events.  
 Music <sup>1</sup> (band or orchestra).  
 Physical training.  
 Farm practice.  
 Feeds and feeding.

SECOND TERM (20 WEEKS).

English.  
 Plant diseases.  
 Rural economics.  
 Current events.  
 Music <sup>1</sup> (band or orchestra).  
 Physical training.  
 Farm practice.  
 Farm management.

The above course in agriculture is planned and conducted with the vocational aim clearly and definitely dominant. The work in agriculture is the important and determining work, the nucleus about which the academic work is arranged. The character and amount of the academic work is determined by its relation and importance to the problems of agriculture and its vital necessity to the future Indian farmer. The aim is to produce not a scientist nor a specialist, but a practical, efficient farmer, whose success will depend fully as much upon his skill in doing, which results from practice and training, as it results from scientific knowledge and managerial ability. The course includes all of the work which is found on the ordinary, diversified farm. This will fit the Indian

<sup>1</sup> Optional.

<sup>2</sup> Theory, 1½ hours per week; practice, 22½ hours a week.

boys to return to their own land, situated under whatever conditions it may be, and adapt themselves to those conditions and successfully undertake the type of farming which must be followed there.

The work in history, civics, economics, and English aims definitely at training for citizenship. The general living conditions and school atmosphere as well as the social life and student enterprises add materially to the effectiveness of this work.

COURSE IN MECHANIC ARTS.

*First year.*

FIRST TERM (20 WEEKS).

English.  
Vocational arithmetic.  
Industrial geography.  
General exercises.  
Music<sup>1</sup> (band or orchestra).  
Physical training.  
Mechanical drawing or architectural drafting.  
Shop practice.<sup>2</sup>

SECOND TERM (20 WEEKS).

English.  
Vocational arithmetic.  
Elementary botany.  
General exercises.  
Music<sup>1</sup> (band or orchestra).  
Physical training.  
Mechanical drawing or architectural drafting.  
Shop practice.<sup>2</sup>

*Second year.*

FIRST TERM (20 WEEKS).

English.  
Vocational arithmetic.  
United States history and community civics.  
Current events.  
Music<sup>1</sup> (band or orchestra).  
Physical training.  
Mechanical drawing or architectural drafting.  
Shop practice.<sup>2</sup>

SECOND TERM (20 WEEKS).

English.  
Vocational arithmetic.  
United States history and community civics.  
Current events.  
Music<sup>1</sup> (band or orchestra).  
Physical training.  
Mechanical drawing or architectural drafting.  
Shop practice.<sup>2</sup>

*Third year.*

FIRST TERM (20 WEEKS).

English.  
Physics.  
Shop mathematics.  
General history.  
Current events.  
Music<sup>1</sup> (band or orchestra).  
Physical training.  
Mechanical drawing or architectural drafting.  
Shop practice.<sup>2</sup>

SECOND TERM (20 WEEKS).

English.  
Chemistry.  
Shop mathematics.  
General history.  
Current events.  
Music<sup>1</sup> (band or orchestra).  
Physical training.  
Mechanical drawing or architectural drafting.  
Shop practice.<sup>2</sup>

<sup>1</sup> Optional.

<sup>2</sup> Theory, 1½ hours a week; practice 20½ hours a week.

*Fourth year.*

FIRST TERM (20 WEEKS).

English.  
 Industrial history.  
 Shop mathematics.  
 Current events.  
 Music <sup>1</sup> (band or orchestra).  
 Physical training.  
 Shop practice.<sup>2</sup>

SECOND TERM (20 WEEKS).

English.  
 Rural economics.  
 Shop mathematics.  
 Current events.

Trades may be selected from the following: Carpentry, blacksmithing, painting, printing, masonry, plumbing, steam fitting, steam and electrical engineering.

No course in mechanic arts in any school conducted as a school can turn out experienced master craftsmen. The function of this course is (1) to help a boy to find himself and to select that life work for which he seems best fitted and has most chance of success, and (2) to give him such trade and technical information and training as to enable him to leave school not a finished workman, but a partially trained workman, who, after getting real trade experience, will become the exceptionally trained and skilled workman, capable of acting as foreman, boss, contractor, or manager.

The academic work contributes definitely and distinctively to trade problems, so that this work, too, may function in the future life of the mechanic. This work supplements the practical work, and fits the student to plan work, to follow the plans of others, to make estimates, and to do work in a businesslike, orderly way. The practice work aims to give an orderly experience in and reasonable familiarity with processes, operating machines, doing trade work, selecting and using materials, planning jobs, and directing work. In all practical work the student is taught to apply and use the academic work.

COURSE IN HOME ECONOMICS.

*First year.*

FIRST TERM (20 WEEKS).

English.  
 Vocational arithmetic.  
 Industrial geography.  
 General exercises.  
 Music.  
 Physical training.  
 Cooking.<sup>3</sup>  
 Sewing.<sup>3</sup>

SECOND TERM (20 WEEKS).

English.  
 Vocational arithmetic.  
 Agricultural botany.  
 General exercises.  
 Music.  
 Physical training.  
 Cooking.<sup>3</sup>  
 Sewing.<sup>3</sup>

<sup>1</sup> Optional.

<sup>2</sup> Theory, 1½ hours a week; shop rapctice, 20½ hours per week.

<sup>3</sup> Theory, 1½ hours per week; practice in cooking, sewing, and housekeeping, 20½ hours per week.

*Second year.*

The girls who take the course in home economics should become the model housewives and mothers in the communities to which they return. This course bends all its efforts to training them to that end. All of the work in housewifery is planned and conducted with the home of the farmer or workman of moderate means in mind. Therefore the work is essentially practical rather than idealistic. Management of such a home and of such an income is emphasized throughout. Training for motherhood and for the cultural and artistic part of the home life is also provided, i. e., these girls must be able to make their future homes pleasant and attractive as well as economically and hygienically efficient, and they must give to their

<sup>1</sup> Theory, 1½ hours per week; practice in cooking, sewing, and housekeeping, 20½ hours per week.

children the culture and refinement essential to racial progress. This part of their education must be secured through training in social observances and usages through the special type of English work provided for this course, through the special courses dealing with home management, motherhood, and the care of children, and through the several art courses.

Special effort is made to preserve all that is best in Indian folk tales and hero stories as a race heritage, which is to be handed down by mothers to their children as an inspiration for racial advancement and progress. In the same way but in larger measure Indian art is fostered and encouraged in every possible way. Girls are encouraged to get all that is best in their tribal art, to become proficient in its use, to understand its symbolism, and to apply it to the materials and furnishings of their new types of homes.

Special attention is also given to fitting these girls to take part in the social and community life of their future neighborhood and to enable them to exercise a helpful and wholesome influence on all community activities.

By fully appreciating and keeping constantly in mind the probable future living conditions of Indian students, the difference which must be made in teaching the various subjects of these courses as a part of a vocational course, and in teaching the same subjects as merely cultural or college preparatory courses, there is little trouble experienced in properly correlating the academic and the vocational work of the schools, and in giving to the Indian boy and girl the academic and vocational training which will function properly in their lives after they return to their homes, or take up the work of their chosen vocation in competition with whites away from the reservation.

**PUBLIC SCHOOL ENROLLMENT.**—Indian children other than those of the Five Civilized Tribes in Oklahoma have been enrolled in public schools to an approximate number of 10,828. Of these, 2,436 children have been received in these schools under contracts made with 186 school districts, which have provided for payment of a fixed amount per pupil per day of actual attendance, in accordance with the practice adopted a few years ago. The daily rate so paid is determined chiefly by the cost to the school district for operation per pupil. The total amount of money obligated for payment of tuition under all of these contracts was over \$60,000. The amount actually paid will of course fall below the amount obligated because of a failure to maintain a perfect measure of attendance of the Indian children enrolled.

**GENERAL SCHOOL POLICY.**—Increased attendance of Indian children in the State public schools has an important and a direct bearing upon the entire problem of Indian education. In communities where the public-school system has been developed the eventual enrollment

of Indian children therein will of course take them out of the Government Indian day and boarding schools. This will lead first to a decrease in the size of the Government school and in some instances it will become possible to abolish certain schools with a consequent material saving to the United States, as the cost of education of Indians in the public schools is less than in the Government schools. Especially is this the case with a boarding school. In my declaration of policy of April 17, 1917, which was given in full in the annual report for the fiscal year 1917, I pointed out that in many of our boarding schools Indian children are being educated at Government expense whose parents are amply able to pay for their education and where the children have public-school facilities at or near their homes, and that such children should not hereafter be enrolled in Government Indian schools supported by gratuity appropriations except on payment of actual per capita cost and transportation. Pursuant to this policy, the elimination from Indian boarding schools of those children not properly eligible has been carried on during the past year, but has not been fully consummated.

The amount of money available for support of the Government Indian schools has for many years been limited by law to a fixed sum per capita. Up to the last few years this amount has been fixed at \$167 per pupil, but at present the law permits the use of \$200 in schools where the attendance exceeds 100 pupils and \$225 where the attendance falls below 100, special authority therefor being granted by the Secretary of the Interior in the latter case.

The last legislation upon this subject is contained in the Indian appropriation act of March 25, 1918, to the effect:

That hereafter, except for pay of superintendents and for transportation of goods and supplies and transportation of pupils, not more than \$200 shall be expended from appropriations made in this act, or any other act, for the annual support and education of any one pupil in any Indian school unless the attendance in any school shall be less than 100 pupils, in which case the Secretary of the Interior may authorize a per capita expenditure of not to exceed \$225: *Provided*, That the total amount appropriated for the support of such school shall not be exceeded: *Provided further*. That the number of pupils in any school entitled to the per capita allowance hereby provided for shall be determined by taking the average attendance for the entire fiscal year and not any fractional part thereof: *Provided further*, That the foregoing shall also apply to expenditures for the fiscal year ending June 30, 1918.

The effect of this legislation has been to necessitate a large enrollment or attendance in the boarding schools, and superintendents have felt impelled to obtain sufficient pupils to enable them to expend such an amount of money as they have found essential to the proper conduct of their schools, although they have been given definite instructions to eliminate from, or not to enroll, noneligibles in their schools and have endeavored to comply.

Legislation of this character has worked to the disadvantage of the schools by placing a premium upon a full enrollment rather than upon the character of such enrollment and on eligibility of the applicants. During the period of the war every possible economy is being exercised in the operation of the Indian schools in spite of well-known conditions which have resulted in increased cost of labor and materials and an endeavor is being made to operate the schools within the amount of money so limited for support of each pupil. However, during normal conditions these amounts so allowed are entirely inadequate, and it is hoped that after war demands have ceased and conditions become normal a more liberal policy will permit the expenditure of sufficient funds to properly maintain the Indian boarding schools and enable full adherence to the present course of study, and especially the industrial training which is covered thereby.

**PUBLIC SCHOOLS IN EASTERN OKLAHOMA.**—An appropriation of \$275,000 was given in aid of the public schools within the territory comprising the Five Civilized Tribes and the Quapaw Agency in Oklahoma, and of this there has been expended the sum of \$261,614 in payments to 2,292 public-school districts. In these schools about 18,869 Indian children were enrolled and have been attending in association with the white children of the community. The total enumeration of Indian children in the same territory is 25,612, of whom there were enrolled in tribal boarding schools 1,347, in private mission schools 565, and in Indian nonreservation schools 827, making a total of 21,608 Indian children of the Five Civilized Tribes in schools of some character.

An important decision regarding the right of Indian children to attend white schools was obtained as a result of the suit of *Dorothy Sunrise v. District Board of Cache Consolidated School District No. 1, Comanche County, Okla.* The Cache Consolidated District refused to accept for enrollment several children presented by the local superintendent. Every means of persuasion having failed, the case was filed in the district court, praying for a writ of mandamus compelling the acceptance of one of these children, which resulted in a decision by the court that the Indian child was entitled to attend the school as a pupil and to all rights and privileges of the school. The children were admitted to the school and have been properly and graciously treated since.

The decision is a very important one, bearing on the rights of these Indian children to attend the white schools.

**SCHOOL CHANGES.**—About 20 day schools were abolished because of public-school facilities available to the pupils, or suitable accommodations for them in other Indian schools; and 3 boarding schools were

discontinued for similar reasons. On the other hand, 5 day schools were established in localities where educational provisions were lacking, and the Bloomfield Seminary, Five Tribes, was reopened. These changes were made to better supply the actual school needs of the Indian children and to reduce expenses.

**CERTIFICATES OF COMPETENCY TO GRADUATES.**—In the work of our advanced schools giving thorough courses in vocational training, conscientious effort has been made to carry out the purpose of the declaration of policy of April 17, 1917, in its following provision:

Indian students, when they are 21 years of age or over, who complete the full course of instruction in the Government schools, receive diplomas, and have demonstrated competency, will be so declared.

During the year eight nonreservation schools were authorized and equipped for four-year periods of vocational instruction, with appropriate academic work, above the sixth grade. This instruction and practice was along the lines of agriculture and practical trades best suited to the occupational needs of the boys and in home economics for the girls. Since the introduction of these course requirements in February, 1916, not all of these vocational schools have accomplished the equivalent of work necessary for graduation. Last year six of them reported successful graduates, varying in number from half a dozen to 40 or 50. About one-half or more of these students were below the age of 21 and therefore not immediately eligible for competency recognition, but will be considered when they reach the age required. Of the remaining, some 30 odd were considered educationally competent and so declared. Young men graduates were fewer in number last year because of those who entered war service before completing their education. Special care is exercised in passing upon the qualifications of these graduates, regarding not only their proficiency at school but their experience and contact with white people, their property interests and probable capacity for handling the same, their industry, habits and character, to the end that a certificate of educational competency, when issued, shall be, in the absence of later adverse developments, a reasonable basis for issuance of a patent in fee. A certain percentage of these cases are therefore held in abeyance until the graduates shall have further proven their ability by actual contact with the practical conditions of life out of school. It is my purpose to keep in some degree of personal and friendly touch with these young men and women who are commissioned to go out and make their own way, and so a letter of helpful and suggestive spirit is written to each recipient of a competency certificate inviting a response after a year or so of experience in the outside world. I feel that this may have a human and sympathetic value

and that it is worth while. School and reservation superintendents are also requested to follow up these young people and report as to their progress in self-support. Below are two samples of such letters to competent graduates, together with a copy of the certificate awarded in another instance.

MAY 2, 1918.

MISS BELLE PENISKA

(Through Superintendent Carlisle School).

MY DEAR MISS PENISKA: I send you the inclosed certificate of educational competency, feeling that you have earned such recognition. I am pleased with some of the things said about you, one of which is that you are conscientious and always try to do your best. That trait of character will go far toward bringing success to anyone, and it is needed just as much in one calling as another. I note also that you incline to the duties of home making, which is commendable, because there is nothing in the world that helps more to make people happy and progressive than well-ordered, efficient, and refined housekeeping. These conditions are the purifying and elevating influence of all community life. High-minded, sweet-tempered home-keepers are the bringers of strength and virtue to social welfare. Hold fast to your highest ideals; they will be among your best friends in any work you do. Should you acquire any land hereafter, be careful in its management, and feel free to consult this bureau, if you desire, about any matter affecting it.

I give you my best wishes and would like you to write me a year hence and tell me how you are doing and something of your plans. I will also ask for a report about you from the superintendent at Carlisle.

Sincerely yours,

(Signed)

CATO SELLS,  
*Commissioner.*

JUNE 1, 1918.

Mr. HARRY PERICO

(Through Superintendent Chilocco School).

MY DEAR Mr. PERICO: In pursuing the course of printing, I am pleased to note that you have attained proficiency and have done good work in your craft away from the school, and feel that you will be worthy in every way of the confidence expressed in the inclosed certificate of educational competency.

I commend your attitude of readiness for war service, if called upon, and your desire to extend your education. No one is ever too old to become better educated.

I also note that you are reported to have an allotment of 120 acres of land, besides some money on deposit, and I wish you to be very careful in the handling of your property. Every young man should add to his money savings each year. Let me urge you to develop and study the best productive value of your land; keep it free from encumbrance and do not place yourself in a position where you have to sell it. No material possession is better to keep than good land.

You have the true progressive spirit, and I shall expect to hear favorable reports about you from your school superintendent. I should also like you to write me a year hence something of your plans and prospects.

Sincerely yours,

(Signed)

CATO SELLS,  
*Commissioner.*

## UNITED STATES BUREAU OF INDIAN AFFAIRS—CERTIFICATE OF EDUCATIONAL COMPETENCY.

This certifies that Everidge Benton, a five-eighths blood Indian, of the Choctaw Tribe, having satisfactorily completed the course in commercial training at the Haskell Institute Indian School, as authorized by the Commissioner of Indian Affairs, was awarded a diploma of graduation at the close of the school year 1917, and from this record and other information submitted concerning his work as a student he is regarded as possessing such character, judgment, and educational qualifications as render him reasonably competent to transact his own business and to care for his own individual affairs.

Given at Washington, D. C., on this 12th day of June, nineteen hundred seventeen.

[SEAL.]

CATO SELLS.

*Commissioner.*

**THE CARLISLE INDIAN SCHOOL.**

The United States Indian School at Carlisle, Pa., will not continue as an institution for the academic and vocational training of Indian boys and girls, but is being turned over to the War Department to be used for Army hospital purposes, and for the rehabilitation and reeducation of sick and wounded soldiers. While the actual transfer will not be finally made until September 1, 1918, yet the plans therefor have been fully perfected and partly carried into effect. The educational system of the Indian Department will not suffer because of the abolishment of the Carlisle School, as the student body has been considerably depleted by enlistments in the Army and Navy, and the war industrial requirements are such as to demand many older pupils who might otherwise be enrolled as students. Therefore accommodations for the Carlisle students are available in other Indian schools and arrangements are being made for their transfer to well-equipped schools located nearer the vicinities in which they reside, which will be to their advantage in many respects rather than otherwise.

This important transaction will create surprise among many, and possibly regret to those who have had intimate knowledge of the great influence of this school as an educational factor among the Indians, but it can not fail to meet with general approval and the most cordial patriotic sanction when the facts and demands of the present conditions are considered. The sick and disabled soldiers of the American Army must have adequate care and treatment and this need is constantly increasing. The medical department of the Army has been in quest of suitable buildings and sites for hospitals, and there is present urgent need for such facilities as can be utilized with the least possible delay. Moreover, post-war problems are already at hand and reconstructive measures must be initiated. A large factor in this work is the reeducation of soldiers physically disabled in the war. The school plant at Carlisle is well adapted

to this purpose and many of its buildings, with a little alteration, can be speedily used for hospital purposes, while its extensive shops and much of its machinery and equipment afford the requisites for vocational training and for the practice of new occupations or the new ways of following old trades.

The following correspondence between the Secretary of War and the Secretary of the Interior concerning the transfer of the Carlisle School is self-explanatory:

WAR DEPARTMENT,  
Washington, July 9, 1918.

MY DEAR MR. SECRETARY: The Army medical department has been looking for suitable buildings and sites for hospitals. We are greatly in need of hospital facilities at the present time. My attention has been drawn to the Carlisle Indian School, which, because of its far eastern location and remoteness from the centers of Indian population, might be available for this purpose, especially as under the law of 1882, which created the Indian School at Carlisle, its return to the Army was provided for under certain eventualities.

I am wondering whether the Department of the Interior would care to consider the advisability of turning this property back to the Army for hospital purposes and for the rehabilitation and reeducation of the sick and wounded from the war. I am informed that there is a very considerable equipment there which might be utilized for this purpose.

Cordially, yours,

(Signed) NEWTON D. BAKER,  
*Secretary of War.*

The honorable the SECRETARY OF THE INTERIOR.

—  
THE SECRETARY OF THE INTERIOR,  
WASHINGTON, July 16, 1918.

DEAR MR. SECRETARY: I have your letter of July 9, asking whether the Indian School plant at Carlisle, Pa., could be turned over to the Army for hospital purposes and for the rehabilitation and reeducation of the sick and wounded soldiers.

I find that the pupils now enrolled in the Carlisle School can be accommodated in other Indian schools, and in view of the need by the Army of an institution of this character, I have given my consent to the turning over of the plant for the purposes indicated.

I have asked Commissioner Sells to arrange to vacate the plant by September 1, and suggest that any matters pertaining to the use of furnishings or equipment be taken up with him by such official of your department as you may designate.

Cordially, yours,

(Signed) FRANKLIN K. LANE.

HON. NEWTON D. BAKER,  
*Secretary of War.*

## HEALTH.

The health work of the Indian Service throughout the past fiscal year was conducted under increasing difficulties, owing to the patriotic response of many of our physicians and nurses to their country's call, yet, due to the impetus given the campaigns on the various reservations during the immediately preceding years, a definite progress has been recorded.

All our health activities are planned and promoted upon the principle that permanent results in these matters must come through popular education in sanitation, ventilation, care of children, care of the sick, domestic economy, etc. Despite the loss of many health workers this line of endeavor has been faithfully carried forward to the greatest possible extent and much good has been accomplished. Another hardship which has been keenly felt is the greatly increased prices of all supplies, particularly medicines, drugs, and surgical instruments, the cost of which it has been necessary to meet with appropriations no larger than those of former years, or not increased proportionately to the advanced cost of the material, for the purchase of which they were intended. A patriotic spirit of endeavor, however, has actuated our employees, and a faithful attempt has been made to secure the best possible results with the facilities available.

Tuberculosis and trachoma continue to furnish two hard problems to solve in upbuilding the health of the Indian race. Notwithstanding the loss of physicians, it has been possible to operate all of our sanatoria during the year, and many cases of tuberculosis have been treated therein. Additional facilities have also been provided, and in some instances existing institutions have been enlarged, where the need was imperative, either by limited new construction, or through the purchase of buildings already completed, or by remodeling.

The endeavors to eradicate trachoma have suffered principally from the loss of specialists who were employed particularly for this work. These losses, however, occurred during the latter part of the fiscal year, so that the work was continued with but little abatement, and much has been, and is being, done to suppress this disease among the Indians. It is not uncommon to find trachoma entirely under control and practically eradicated at many of the boarding schools, due to the effective treatment which is possible when suitable control can be exercised over the cases. The greatest difficulty in this work exists among the older infected Indians who are more difficult to reach and treat, and as a consequence remain as foci for the dissemination of the disease. Accordingly everything possible is done to place them under treatment where feasible, and to educate them in cleanliness, in order to prevent contagion.

Continued emphasis has been laid upon the better babies' movement, which was actively inaugurated year before last, and which demonstrated such remarkably immediate and gratifying results. This campaign has now become a regular feature of the reservation activities and will continue to receive the earnest attention and efforts which it merits.

A number of schools and reservations were visited during the past year by epidemics, including smallpox, "liberty" measles, pneumonia, and acute influenza. Measles is always dreaded among Indian children, a common sequel being tuberculosis, and for this reason all possible steps were taken to prevent the spread of the disease and to give those infected proper care and after treatment. Fortunately, the epidemics for the most part have not been of a severe nature and, as a rule, serious results did not follow.

Among the Navajos and Hopi Indians in Arizona and New Mexico considerable trouble has been experienced with smallpox, which, though of a mild form, became epidemic among these people during the last year. Vigorous steps were immediately taken to suppress this contagion, special physicians and the medical supervisor being detailed for the purpose of conducting a campaign of vaccination. Hundreds of Indians were vaccinated and it is now known that the efforts of these physicians, which were augmented and continued after their departure by the regular medical forces on the reservations, have placed the disease under control. Of especial interest in this connection is the campaign of vaccination conducted by the supervisor of hospitals among the Hopi Tribe living upon the Moqui Reservation. These people dwell in communities and for that reason are more amenable to quarantine and control than the nomadic Navajos. The supervisor in his report upon this work states that every Hopi Indian not presenting a history of recent successful vaccination, or who had not had smallpox, was immunized in this campaign, and he is of the opinion that the whole tribe has been rendered immune.

At the Haskell Institute during the past spring a severe epidemic of influenza, or as observed in many parts of the United States a combination of streptococci and influenza bacilli, accompanied by pulmonary complications suddenly developed, resulting in several deaths among the pupils. For the purpose of assisting the local medical force in handling this epidemic, and for the purpose of investigating its source, a special physician and nurse were immediately detailed to the school, and the services of an epidemiologist from the Public Health Service were secured. Prompt measures succeeded in keeping the mortality down to a minimum. High winds and dust storms were prevailing at that time in the country surrounding this school, and the consensus of opinion seemed to be that the infection was wind-borne.

Altogether, the health propaganda of the Indian Bureau is rendering its most righteous service. The perpetuation of the race is a first consideration. Education, and the protection and accumulation of property are greatly to be desired; to this end we are exerting ourselves to the uttermost, but everything is necessarily secondary to life.

### IRRIGATION.

Irrigation was practiced to a considerable extent by many Indians of the southwest long before the white man came to this country. Evidences of prehistoric canals and ditches, among the Pimas in Arizona, bear mute testimony of the genius and industry of these people who eagerly grasp the improved facilities offered by the white man and the belated assistance extended by the Government. When the Spaniards came to New Mexico they found the Pueblo Indians packing baskets of earth on their backs to repair their old ditches or construct new ones to irrigate additional lands.

Irrigation is or should be resorted to in those localities where rainfall is insufficient or is not dependably sufficient for crop production. Fundamentally, it consists of the artificial application of water to land for agricultural purposes.

Water for irrigation is ordinarily secured by damming rivers, pumping from underground reservoirs or impounding flood-waters. The first has been longest used and is the most general. Pumping water has been resorted to with satisfactory results, and in some localities is the best, if not the only means, of supply. The impounding of waters which would otherwise be wasted is a method of conservation which has been utilized to a great advantage and is certain to be more extensively employed. There are millions of acres of land, particularly in the southwest, that could in this way be brought under cultivation. Such land lies largely in semiarid sections, where drought and crop failures are so frequent and disastrous as to make failure to employ this feasible solution an economic crime. A notable example of flood-water conservation, from an intermittent and ordinarily limited flow, has been successfully effected in damming a branch of the Trinity River, near Fort Worth, where a great lake, containing an immense and permanent supply of water, has been created. What has been done to furnish water for the city of Fort Worth, and for pleasure purposes, can be as successfully accomplished for irrigating land not only in Texas but everywhere, under like conditions, throughout our entire country.

The fast growing population of the United States and the constantly increasing requirements for food production demand that every acre of tillable land should be made to yield each year to the full extent of its possibilities.

It is indefensible and inexcusable that man whom God has ordained to reign on earth over animate and inanimate things should fail to bring together, for his own benefit, immeasurable land and water waste.

Irrigation has been made enormously profitable by diverting the waters of constantly flowing streams, likewise by pumping from undersurface reservoirs, and the impounding of flood waters has been successfully used in a limited way in semiarid sections, but the time has come when the limit of our possibilities in this last respect must be employed.

The world's war is being directed by the master mind in the White House. The downfall of autocratic governments is writ so plain that he who runs can read. The aftermath, with the successful termination of the war behind us, will involve much more than the reconstruction incident to enlarged human liberty. A people responsible for revolutionizing our all-powerful but faulty financial system through the creation of a Federal Reserve Bank law, making possible the greater local use of wealth production, is certainly capable of taking advantage of the gifts of nature, readily within reach, and subduing the untamed land and water conditions awaiting the head and hand of man.

Truly, America has been prodigal of its natural resources. Golden opportunities lie right at our feet in the development of those great areas of the Southwest where the soil is fertile, the climate salubrious, and the possible yields truly marvelous.

On one Indian reservation alone the aggregate value of the crop raised during the past year exceeded \$6,000,000. On another reservation a 5-acre tract in alfalfa yielded over \$2,000, the hay having been harvested nine times during the calendar year.

COLORADO RIVER RESERVATION, ARIZ.—To accommodate the ever-increasing demand for water at this point, an additional pumping unit was installed during the year. The irrigable lands on this reservation are highly adapted to the production of long staple cotton, and every acre that can be brought under ditch is eagerly sought. The pumping plant is designed to provide water for lands allotted to the Indians only. Upward of 100,000 acres of equally fine land within the reservation could be irrigated by gravity from the Colorado River. A project of this size, however, would cost several million dollars. Congress has not yet authorized the work, although the recent Indian appropriation act carries a small sum for preliminary surveys and investigations at this point. The work should be undertaken, as the latent agricultural possibilities here are tremendous.

CROW RESERVATION, MONT.—The aggregate amount expended in irrigation work on this reservation during the year approximates

\$150,000. Main canals and laterals were enlarged and extended so as to bring additional land under ditch; suitable concrete headgates and other structures installed, and many bridges and smaller structures of timber erected. When completed the system on this reservation will serve upward of 70,000 acres. During the year just passed some 13,720 acres were cultivated, with an aggregate crop yield valued at \$223,176. The recent Indian appropriation act makes \$200,000 available to continue the work.

FORT HALL RESERVATION, IDAHO.—Some 12,000 acres within this reservation were cultivated during the past year, 7,712 acres by lessees of Indian land and 5,085 acres by the Indians themselves, an increase of over 3,000 acres. The principal crops are alfalfa, grain, potatoes, and sugar beets, the aggregate value of the crops raised on this project during the year exceeding \$500,000. A number of difficulties hamper the most successful operation of this system. The canals and ditches constructed years ago are not of sufficient grade and carrying capacity to serve the area ultimately to be irrigated. The rapid growth of aquatic plants quickly diminishes the carrying capacity of the canals, already too limited; concrete structures improperly designed and constructed, without steel reinforcing, are constantly cracking and settling. Exposure to rigid frost action during the long winters augments this trouble. Other appropriators on the Blackfoot River, above the reservation headings, divert water justly belonging to the Indians and constant attention is demanded to see that their rights are protected. Excess waste, return and drainage waters discharged into Sand Creek by white irrigators, flow down into one of our main canals in such intermittent quantities as to seriously jeopardize its successful operation, frequently resulting in considerable damage to the Government's property.

GILA RIVER RESERVATION, ARIZ.—The Indian appropriation act of May 18, 1916, carried two items for the construction of diversion dams across the Gila River, one near the agency at Sacaton and the other outside the reservation, above the town of Florence. When constructed the dam at the agency will serve Indian lands exclusively, while the one above Florence will serve lands belonging to both Indians and whites. Extensive unexpected erosion of the south bank of the Gila River, at the lower dam site, so widened the river channel as to render the appropriation insufficient for the work. Congress gave additional funds in the recent Indian appropriation act. Plans and specifications covering this dam, which is to carry a bridge superstructure, have been completed and approved and it is expected that the work will be undertaken at an early date.

Construction of the upper diversion near Florence is contingent upon a satisfactory adjustment of conflicting claims to water between the Indians and the whites. Negotiations have been continuous,

conferences repeated, and even tentative agreements reached. Binding contracts have not been executed, however, and recent developments indicate that the owners of certain interests in and around Florence have repudiated the former tentative agreement as to a division of these waters. This postpones actual construction indefinitely, as the work is not to begin until these conflicting claims are settled.

NAVAJO RESERVATION, ARIZ. AND N. MEX.—The scarcity of water in the large territory occupied by the Navajo and Moqui Indians renders the irrigation possibilities there exceedingly limited. Out of an aggregate area exceeding 12,000,000 acres, water is now available for some 6,500 acres only; 1,500 acres under the Ganado Project in the southern part of the reserve; 4,000 acres under the Hogback Project, near the San Juan School, and 1,000 acres near Marsh Pass, in northern Arizona. Investigations are being continued from time to time as funds are available, with a view of ascertaining additional areas for which water may be developed, but at best these will be very small, and as far as can be seen at present this vast domain must primarily remain a stock-raising proposition.

In my last annual report I referred briefly to the development of underground water for domestic and stock watering purposes, intimating that the problem confronting the Navajo is not one of grass but of water. Winter rains and summer cloudbursts produce considerable vegetation in regions bare of living streams or perennial springs. Ample forage is frequently at hand if water for domestic and stock needs can be found. The underground water developed for these Indians during the past few years has been of untold value to them during the extreme drought that has visited the southwest recently. Not only have thousands of head of stock been saved to the Navajos, but it has helped in no small way to augment the supply of wool, mutton, and beef available for market. These Indians have always been practically self-supporting, wresting at least a bare existence from an inhospitable country, but under recent market conditions many of them are becoming well-to-do, and a number even independent. Raw wool has been commanding such fancy prices lately that the making of Navajo rugs, formerly a source of considerable revenue, has practically ceased.

UINTAH RESERVATION, UTAH.—The controversy over water rights in the Uintah Valley, adverted to in my previous report, is still pending before the District Court for the State of Utah, a decision in the matter not yet having been handed down. In the meantime a reasonably satisfactory division of the available water between the Indians and the whites is being had through a water commissioner appointed by the court.

Large areas of unallotted land within this reservation were opened to homestead entry years ago and it is the settlers on these lands who are now contesting the prior right of the Indians to sufficient water for their needs. In the entire district there are some 46,000 acres under irrigation, being an increase of 11,000 acres over the past year. This represents an increase of over 30 per cent. The value of the crops raised by the Indians themselves exceeded \$95,000.

**YAKIMA RESERVATION, WASH.**—One of the most successful large irrigation projects with which the Indian Service has to deal is located on the Yakima Reservation, Wash. Designed to supply 120,000 acres, ultimately, we find over 64,000 acres now under actual cultivation. During the past year the crop yield exceeded \$6,000,000. The Indian appropriation act for the present fiscal year carries \$500,000 for the continuation of this work, which is being pushed as rapidly as existing conditions will permit. Machinery is resorted to, wherever possible, as a substitute for hand labor, and the three drag-line excavators at work on this project removed 602,354 cubic yards of earth at an average cost of 10 cents per cubic yard. This is 50 per cent cheaper than estimated for several years ago, when labor and supplies were less expensive.

**WIND RIVER RESERVATION, WYO.**—Present plans call for the irrigation of approximately 73,000 acres within this reservation, of which some 50,000 acres are now under ditch. About \$200,000 was expended in this work during the year just ended, resulting in the addition of many miles of main canals and distributing laterals, with the attendant diversion structures, bridges, etc. Drainage of certain seeped areas had to be resorted to, with satisfactory results. Considerable areas within this reservation are leased, and still others are devoted to the cattle industry. The area actually cultivated yielded a gross return of over \$325,000, of which \$142,181 belonged to the Indians and \$182,883 to the whites.

**ZUNI RESERVATION, N. MEX.**—About 5,000 acres within this reservation are now under ditch, being supplied with water from a reservoir constructed years ago. The rapidity with which this reservoir is filling with silt is becoming alarming. Since its completion 11½ years ago the reservoir has lost 54 per cent of its capacity from this cause. At this rate the life of the reservoir is about 21 years, of which 11½ years have already passed. The capacity of the reservoir is decreasing, of course, in proportion to the deposit of silt, and unless some form of relief is soon devised the reservoir will be practically useless. The life of the reservoir may be extended temporarily by elevating the crest of the present dam and spillway, but the extent to which this can be carried is limited by natural surroundings. It has been estimated that an expenditure of \$13,000 in increasing the height of the dam will add possibly 11 years to the life of the

reservoir, but eventually some other form of relief must be devised or the project abandoned. These Indians are industrious, are expert agriculturists, and make full use of the facilities offered for industrial advancement.

**SALT RIVER VALLEY, ARIZ.**—One of the largest and most successful irrigation projects in the country is located in the Salt River Valley, Ariz. Here some 200,000 acres, a part of which belongs to the Indians, are being supplied with water from the Salt River, augmented during the dry season with stored water from the Roosevelt dam. The unit cost of this project has been fixed at \$60 per acre for construction purposes. During the past several years many acres in this valley have been shown to yield between \$300 and \$400 per acre. These lands lie within that area adapted to the growth of the long staple Pima cotton, a product developed and brought to its present state of perfection on the Pima Indian Reservation. For this cotton there is a most urgent demand, as it weaves into a fabric of great textile strength which is used, when obtainable, exclusively in the manufacture of automobile tires and aeroplane wings. For many years to come the demand for this cotton will be insatiable. Within the past 12 months the market price of this cotton has been between 70 and 80 cents per pound. Under reasonably favorable conditions the normal yield from this cotton averages a bale to the acre. Many acres produce more. Even at 70 cents per pound this would give an average gross yield of \$350 per acre. Allowing \$250 which is excessive, to cover all costs of production, labor, etc., it would still leave a net yield of \$100 per acre annually. This is from the lint alone. In the past it has been impossible to supply the demand for the seed from this cotton and additional areas are being planted to this product as rapidly as the seed can be obtained. The value of the seed produced, added to the returns from the lint, yields a net income on the investment that is truly marvelous.

These figures sound astonishing but they are being demonstrated daily, and all of this comes from intelligent application of water to arid areas, otherwise worthless for agricultural purposes.

### AGRICULTURE AND STOCK RAISING.

**FARMING.**—The campaign for increased production on Indian land to meet war-time conditions, as outlined in my last annual report, has been further systematized and aggressively followed up during the year with continued good results. Reports thus far received indicate that the Indians on 75 reservations are cultivating 370,101 acres of land, as compared with 317,101 acres last year, which represents an increase of 52,990 acres.

Practically every reservation showed an increase ranging from 5 per cent to 100 per cent. Lack of rain on several of the reservations

where the percentage of increase was comparatively small prevented a better showing. Hundreds of Indians are cultivating their land this year who never farmed before, but who have enthusiastically caught the spirit of the campaign for increased production, and many others have enlarged their cultivated acreage. Here are several typical extracts from field reports:

James Baker is 38 years old, has a wife and six children, and is one of the Indians to whom citizenship papers were issued last year. Jim is a sober, industrious fellow, and has about 50 acres of wheat, 30 acres of oats, and 25 acres of flax, and has acquired a nice herd of cattle. He is, I feel, an Indian who since receiving his citizenship has really been prosperous.

Wallace Altaha, R-14, is the one large stockman of the tribe. His herds have long been notorious for the poor breeding and lack of intelligent management. He has always stood against improved breeding. During the winter and spring he has purchased 31 pure-bred Hereford bulls, of fine quality, and 15 grades that are very good. Also, during the winter his herds were worked and some 400 or 500 old steers, bulls, and cows gathered and sold. Some of these were 12 to 15 years old, and quite a menace to breeding and proper handling.

These results have been accomplished in spite of the handicap of an inadequate farmer force. There are approximately 250 such positions authorized, with about 80 vacancies at the present time, only 20 farmers having been appointed on certification from the Civil Service during the past year, largely owing to the small salaries that can be paid from the limited funds available for this purpose and the more attractive opportunities outside this service.

That the impetus of the campaign inaugurated last year might be further stimulated, the following follow-up letter was sent out by me on August 15, 1917:

TO SUPERINTENDENTS:

Reports show increased acreages cultivated by the Indians this season on practically every reservation, ranging from 5 per cent to 100 per cent, the average being 31.6 per cent. While this is gratifying, it should mark only the beginning of our labors. The reports likewise disclose considerable areas of unused tillable land on the different reservations, with many able-bodied male adult Indians not now engaged in farming or other gainful occupations, the majority of whom undoubtedly should be cultivating their allotments.

But this is only one feature of the campaign. In addition thereto every Indian now farming must be induced to increase his cultivated acreage to the limit of his capacity in man, animal, and machinery power. Present conditions portend a continued and perhaps an increasing shortage of foodstuffs in the Old World and a consequent greater responsibility on the United States to utilize every acre of tillable land in the production of foodstuffs to feed ourselves and our allies. Press home the tremendous import of this fact to employees and Indians alike, with the view of keeping alive and further developing the enthusiasm and momentum of the campaign inaugurated last spring. Two things especially should be strongly emphasized during the remainder of this season: (1) The necessity of the Indians saving seed for next year and of the superintendents making provision for an adequate supply of seed in ample time for next season's planting on the agency and school farms. This is vitally important and must not be neglected, especially in view of partial crop failures in some parts of the country. (2) Fall plowing: On those reservations where

fall plowing is proper, according to the best agricultural practice, effort should be made to have as much land plowed this fall by the Indians and on the agency and school farms as will be put in crops next spring. See that this is accomplished so far as advisable and practicable on your particular reservation.

The reports also indicate an increase of approximately 48 per cent in the acreage cultivated on the agency and school farms. This could not have been accomplished without the whole-hearted cooperation of superintendents and employees, and I wish here to express my appreciation. However, the success of the past season should only spur us on to greater efforts to bring under cultivation as much of the unused tillable land on the agency and school farms as can be handled properly consistent with available facilities and funds. Example is much stronger than precept, and if we expect our appeal to the Indians to be effective, we must surpass our own record of the past season on the agency and school farms.

Please acknowledge receipt of this letter, with information as to the plans which you have formulated to increase the number of Indians farming and the total cultivated acreage, and to provide for the necessary seed to meet the needs of the Indians and the Government.

The important subjects of food conservation by the elimination of waste and cooperation with the National and State food administrations, canning and drying, cooperative extension work with the United States Department of Agriculture and the various State colleges, bee culture, and the utilization of surplus Indian labor were also emphasized during the year and are more fully referred to in connection with war activities in this report.

**STOCK RAISING.**—During the past year the need for increased food production has been brought to the attention of the Indians and the employees of the Indian Service with a view of having them exert their energies toward the development of the live-stock industry on all Indian reservations in order that meat production might be increased. The scope of the activities necessary to accomplish this can best be presented by reproducing my instructions to superintendents and others under date of May 2, 1918, as follows:

**TO THE SUPERINTENDENTS:**

The Indian Service, and by that I mean the Indians and the employees of the service, has responded effectively to the war call for increased food production along all lines, and in every way has shown a willingness and ability to do its part. Large areas of hitherto unproductive agricultural lands have been brought under cultivation and the live stock grazing on Indian lands has been materially increased, so that the grain, meat, and other food supplies of the country have been largely augmented by the energetic handling of Indian resources.

But while I feel that the results of the past year's work have been splendid, I am sure that this year, by reason of the valuable experience gained last year, can be made to show greater results, both to the country and to the Indians themselves. It is with that purpose in view that I want to call your attention to several things which I believe will greatly increase the output of meat and other live-stock products through the efforts of the Indians themselves and the more intensive use of their grazing lands.

At the present time, when requests are made by cattlemen for grazing lands, I am telling them that practically all the Indian lands are carrying stock to their full capacity, and this is literally true as conditions now exist; but I am convinced that proper

attention given to certain factors of the grazing problem will enable us to increase the capacity and output of the Indian ranges to a surprisingly large extent. These factors are:

1. Water supply.
2. Fencing.
3. Winter protection, including proper relation of summer and winter grazing.
4. Wild or worthless horses.
5. Predatory animals.
6. Scrub stock.
7. Care and handling of bulls.
8. The salt supply.
9. Winter feeding.

I want you to take up the subjects enumerated in the preceding paragraph and make a careful study of conditions on your reservation with respect to each one of them.

**WATER SUPPLY.**—Probably the most important factor in connection with the utilization of grazing ranges and the one where most effective improvement may be made is that of water supply. There are ranges where large areas of grass are never eaten over because of the distance the cattle must travel in grazing to and from water. On nearly all of these ranges it is possible to develop water at points so located as to make the entire range available; or, if not all of it, at least to largely increase the grazing capacity, and this at a cost so as to be well within the bounds of practicability. To allow this waste of grass to continue is unbusinesslike and indefensible, and I want you to be exceedingly careful in your investigation of the water supply on the grazing lands of your reservation.

It makes no difference whether the range is used by the Indians or is under permit. If under permit, and you find that the capacity can be increased by water development, the matter will be called to the attention of the permittee, and he will be required to make such development and then stock to capacity, or vacate and the permit given to some one who will. If the needed development is on Indian range, ways and means will be found to do the work. No grass must be allowed to go to waste that can possibly be made available.

After you have carefully gone over the situation sufficiently to enable you to make a general outline of your plans I want you to submit a special report to me on this matter of water supply, and this report should be in my hands not later than July 1, 1918.

**FENCING.**—First-class fencing is a highly important factor in promoting the stock industry. The out-boundaries of all grazing ranges should be well fenced to prevent controversy between permittees and to protect homesteaders or other occupants of the contiguous lands; it also makes it much easier to keep check on the number of cattle being run by permittees and gives a general feeling of security that is very beneficial.

But important as it is to have the range boundaries well fenced, it is even more essential that all Indian allotments actually being used by the Indians and lying within a grazing range be so fenced as to give adequate protection to the crops and improvements. I am constantly receiving complaints from Indians because of cattle trespassing, due to poor fences. In granting permits hereafter, one of the requirements must be a provision for adequate fencing of boundaries and improved Indian allotments, and this provision must be strictly enforced. Many existing permits contain the provision, but the fences are not being kept up as they should be. Have your fences inspected as soon as possible and take vigorous steps to have them repaired and kept in good condition.

**WINTER PROTECTION, INCLUDING PROPER RELATION OF SUMMER AND WINTER GRAZING.**—Where the grazing area on a reservation is divided into two or more ranges

the division lines should have been so run, if possible, as to give each range the proper proportion of winter and summer grazing, with its share of winter protection. This has not always been done when the ranges were first laid out, and as a result there are ranges that are not carrying the number of cattle they should.

On most reservations the I. D. herd occupies a range set apart for it, and if in any instance this I. D. range does not have good winter feed and protection, and other ranges under lease or permit do have it, I desire that some rearrangement be made at the first practicable opportunity, so that the cattle of the Indians may have the needed protection. Good management of a cattle range requires the conservation of grass on some part of it for winter use, and this should be accomplished by keeping the cattle off of such parts of the range during the summer as are most suitable for winter grazing. In some cases this can be done by riders, but probably in the majority of cases a dividing fence is the most economical and efficient method of dividing the summer and winter ranges. Of course, no hard and fast rule can be laid down to cover this phase of the grazing question since so many different factors enter into its consideration, but I want to impress each superintendent with the importance of giving the subject careful attention along the lines suggested.

**WILD OR WORTHLESS HORSES.**—The grass being consumed each year by wild horses, and also worthless Indian ponies, if eaten by cattle or sheep would bring a revenue at least five times as large to the Indian owners and would have a material bearing on the world's meat supply. A very conservative estimate of the total number of these animals on Indian reservations would be not less than 75,000 head, and since two horses consume as much feed as three head of cattle, this is equivalent for pasturage of 112,500 head of cattle, or at the ratio of five sheep to one of cattle—562,500 head of sheep.

The horses included in the above estimate are only those which have never been improved by breeding, and they are running on territory which makes it exceedingly difficult to accomplish much in the way of upbreeding, and where the difficulty of catching them largely prevents the Indians from disposing of them at the proper time, hence they remain on the range far beyond the time of greatest profit; in fact the larger proportion of these horses die from old age, disease, or lack of feed during hard winters, so that the owners never get anything for them.

The extreme need of the country for meat and wool will not permit of any delay in working out the problem of ridding the ranges of these worthless horses. We must expect opposition from some of the older Indians and from the nonprogressive Indians generally. This opposition is not based, so far as I can learn, on mere contrariness or desire to be obstructive, but because they retain the old idea that the power and influence of the man was largely in proportion to the size of his pony herd; and it occurs to me that this very habit of thought may be turned to splendid advantage in inducing the Indians to increase their holdings of cattle and sheep, if the greater value of cattle and sheep can be impressed upon them.

If, after everything possible in the way of persuasion has been tried, the Indian still refuse to dispose of worthless stock, I believe the superintendents should be authorized to require that each Indian keep this class of horses within fenced inclosures, and that all such horses found on the open range should be seized and sold, the proceeds to be turned over to the owner of the brand, less the cost of capture and shipment.

I desire that every superintendent on whose reservation this problem exists give the matter his best thought and attention and that reports be made to me at an early date with recommendations covering plans for disposing of horses of the class herein discussed.

**PREDATORY ANIMALS.**—I find that on many of the larger and more unsettled reservations there is a considerable loss each year from predatory animals. Some of the

Indians, lessees, and permittees are very active in ridding their ranges of these pests while others are careless and do practically nothing. This "do-nothing" policy results in the propagation of stock-killing animals which range far beyond the boundaries of the careless stockman, causing loss to other lessees and to Indians whose cattle are either with the lessees' stock or on the range set aside for exclusive Indian use.

I want the superintendents to take up this matter of predatory animals with the Indians, and with each lessee and permittee, and insist that vigorous measures be taken to destroy them. In this connection it is suggested that the cooperation of the lessees, permittees, Indians, and superintendent would make possible a comprehensive and thorough campaign which would be far better than desultory and unconcerted effort on the part of each.

**SCRUB STOCK.**—Indian cattle run on many of the ranges which are under lease or permit, and because of this, if for no other reason, the lessee or permittee should be required to keep only first-class bulls in order that the Indian stock may be bred up. This is just as essential for the good of the lessee or permittee as it is for the Indian, and the country at large constitutes another interested party because of the fact that a first-class beef-producing animal will consume no more grass than will a poor scrub animal that will go to the market weighing less than half as much.

On some reservations it has been found difficult to induce the Indians to use good male stock on account of the seemingly high prices at which first-class breeding animals are sold. Many of the Indians, when starting out for themselves, have perhaps two or three head of the stuff, and, of course, it would not be practicable to require each of these small owners to provide a pure-bred bull for his stock. However, this difficulty is overcome in some instances by following a sort of community plan whereby bulls are provided from tribal funds and the Indians are required to pay pro rata for their services, and this plan should be followed generally.

In the case of an Indian who owns sufficient she stuff to require the entire service of one or more bulls, it would certainly not be any hardship to require him to provide a first-class animal, because it would pay him to dispose of enough of his she stuff to enable him to make such purchase.

Of course, it goes without saying that every superintendent and every stockman and farmer should talk "better stock" to the Indians, in season and out of season, and be ready to help the moment an Indian evinces a desire to raise better stock.

**CARE AND HANDLING OF BULLS.**—In all tribal herds, and among Indian-owned range cattle as well, the bulls should be held apart from the she stuff during such part of the year as will prevent the dropping of calves at an unseasonable time. The proper breeding season varies according to the location of the range, but generally the bulls should be gathered at the time of the fall roundup and held in separate range until after the following spring roundup, when they should be thoroughly distributed over the range.

This segregation of the bulls, in addition to insuring the dropping of calves at a time when weather conditions are apt to be favorable also affords the opportunity to give special care and attention to the bulls during the winter. The bull pasture should be kept free of stock during the time the bulls are with the herd, so as to conserve the natural feed for the winter. In addition to this, extra feed, consisting of hay, and in some cases a little grain, should be provided, to be used when necessary to keep the animals in good condition. In short, do everything possible to have the male stock in first-class physical condition when turned onto the breeding range. When placing the bulls with the herd be careful to have them well scattered, and have the range riders see to it that they keep well apart and do not bunch up or become separated from the remainder of the herd.

The number of bulls required for a given number of cows varies with the condition of the range, the water supply, and age of the bulls. Give the matter careful thought and attention and see to it that enough bulls are on the range to insure adequate service.

**THE SALT SUPPLY.**—It is of great importance that all cattle ranges be well supplied with salt. This is in many respects essential to securing the best results, and each lessee or permittee must be required to distribute salt over his range in appropriate places and in sufficient quantities to meet the needs of the animals. Where tribal herds are run, the superintendent should see to it that the range occupied by the herd and individual Indian cattle is well supplied.

**WINTER FEEDING.**—In past years, when the western country was open grazing for all comers, it was the practice among cattlemen to let the stock rustle for themselves the year around. As a general rule, the cattle came through the winter in pretty fair shape, because the cattlemen had almost unlimited territory from which to select their winter-grazing ranges, but conditions have changed, and the cattleman now finds himself restricted to a limited range on which, in all probability, there is no good winter protection, and if he wants to bring his cattle through he must in many cases provide protection and feed, at least for the weaker cattle, and the proportion of fed cattle is rapidly increasing each year.

Good business practice requires that animals worth from \$80 to \$150 apiece be not allowed to die for want of a little protection and a few dollars' worth of hay and grain; the need of the country for conservation of all foodstuffs, including meats, also demands that no cattle be allowed to starve or die from exposure during the winter.

In view of the foregoing it is incumbent upon every superintendent to wage a vigorous campaign each summer to induce every Indian cattle-owner to put up sufficient hay to carry his stock through the winter, and further, wherever the severity of the climate makes it advisable, the Indians should be required to provide sheds or other artificial protection.

In the case of tribal herds the superintendent should take up early in the season the matter of providing hay for winter feeding, so as to get on the market for the first cutting, when the price is usually the lowest and the quality the best. Plenty of hay is the best insurance against loss. And as one of the primary reasons for the establishment of the tribal herd, in most instances, was to provide a market for the Indians' hay, it should be the aim of the superintendent to have the Indians furnish every ton possible, after putting up an ample quantity for their own individual needs. The advantages of this home market for their hay should be preached to the Indians constantly as an incentive to greater efforts along farming lines, thus demonstrating the value of the combination of stock raising and farming.

On northern reservations, where the danger from sudden severe storms is ever present during the winter months, it would be advisable, where practicable to do so, to gather the poorest cattle on the fall roundup and throw them into a fenced pasture held in reserve during the summer and where they could be easily gathered for feeding when the storms come on.

The superintendent should carefully observe the practice of the lessees or permittees on his reservation, and if any of them are careless with respect to winter protection and feeding, and allow their cattle to die of neglect, this fact should be reported to me, in order that steps may be taken to stop the waste, and, if necessary, cancel the permit and give the range to someone who will take proper care of the stock and thus conserve the meat supply.

I have gone somewhat at length into the various phases of the cattle business, with a view to making proper use of the grass on Indian reservations. I do not want any ranges overstocked; in fact, I am afraid that under present conditions there are some reservations where too many cattle are now being run, and if this is the case the results will be an eventual loss of cattle more disastrous by far than would be the loss from allowing some of the grass to go to waste. There is, however, a point of efficiency in this matter, which is reached when well-bred cattle are eating all the grass that can be made available on Indian reservations, and it should be the ambition of every superintendent to reach this point on his reservation.

These suggestions have met with a hearty and gratifying response from the field employees, Indians and lessees, largely due to the fact that it is in line with the aggressive policy of the Indian Bureau for the last five years to utilize the natural resources of the reservations to the greatest possible advantage.

I regard the water supply in connection with stock raising as of very great importance. It is the essential factor in increasing the carrying capacity of a large part of the grazing lands on Indian reservations. This is particularly true in the Southwest, where, I believe, sufficient water development can be secured, at a justifiable expense, to more than double the present carrying capacity.

Sinking wells on grazing lands during the last year or two in sections of the country where rainfall is almost unknown has, altogether, given gratifying results, and it is my purpose to intensify these activities, not only in sinking wells, but in impounding the flood waters which at rare intervals fall from cloud-bursts and which, together with melted snow from higher elevations, rush in great torrents over countless acres of thirsty territory.

Marvelous results have been secured from irrigating arid and semiarid lands for agricultural purposes, and it is equally important that the vast area of grasslands, now practically worthless for want of stock water, be made, by similar means, to sustain the herds it would then support.

My nearly six years experience as Commissioner of Indian Affairs, during which, among many other things, I have had to do with the administration of immense irrigation projects and the handling of millions of cattle, sheep, and horses, largely in sections of the country where rain seldom falls or where devastating droughts frequently occur, has convinced me that the most important constructive accomplishment now demanded is the proper development, conservation, and use of *water*.

EXPERIMENTATION.—The operation of the cooperative experimental farm at Sacaton, on the Pima Reservation, by this office and the Bureau of Plant Industry of the Department of Agriculture was continued during the year, with the view of developing seeds and plants specially adapted to conditions on the Indian reservations in that part of the county. The results have justified the establishment of this farm, which has been somewhat enlarged in order to increase its usefulness to the Indians, and three wells have been drilled for the purpose of providing additional irrigation water.

An experimental date farm was established at Palm Springs, on the Malki Reservation, in California, in cooperation with the experts of the Department of Agriculture, by whom work is also being carried on at Fort Berthold, San Juan, and Shoshone.

INDIAN FAIRS.—The policy of holding agricultural fairs on the Indian reservations has been continued during the year, with increasingly successful results. The first fair of this nature was held on the Crow Reservation in 1906, the number being gradually increased each year until, in 1917, 58 such fairs were held. At these fairs the Indians displayed their agricultural products, live stock, etc., in competition with each other, suitable prizes being awarded on best exhibits. Most of the fairs are managed entirely by the Indians, which gives them training in business administration and organization.

Numerous Indian exhibits were also made at county fairs, likewise with good results, the Indians winning many prizes in competition with the whites. In addition, displays of Indian products were shown at nearly every State fair in States where Indian reservations are located, which were equally successful in showing the agricultural progress of the Indians. At the South Dakota State Fair Baby Show the first prize was awarded to Guy M. Howe, jr., an Indian baby from the Crow Creek Reservation, who scored 95.5 per cent out of a possible 100 per cent in competition with babies from all over the State.

### FIVE CIVILIZED TRIBES.

The area of the Five Civilized Tribes aggregated 19,525,966 acres, of which 15,794,208 acres have been allotted to the enrollees of said tribes or to their heirs. By various acts of Congress and by approval of the Secretary of the Interior restrictions against alienation of allotted lands by allottees have been removed from 12,825,196 acres, leaving as restricted acreage 2,888,162 acres, or about 18.3 per cent of the entire allotted area. One hundred and thirty-nine thousand two hundred and eighty-four acres of tribal lands have been reserved for town sites, railroad rights of way, churches, schools, cemeteries, etc.

The total enrollment of the Five Civilized Tribes, corrected to date, is 101,506, including Freedmen, to which enrollees, with few exceptions, there have been made complete allotments of land or payments of money in lieu of or in equalization of allotment. Of the above-mentioned enrollees, 78,101 are citizens by blood, adoption, or intermarriage, 26,774 being full-blood citizens; 23,405 enrollees are Freedmen. There are at present 23,441 of the enrollees who are in the restricted class of Indians; that is, Indians whose allotments are restricted as to alienation and whose funds derived from said allotments or from the individual shares of the tribal funds are subject to Government supervision. Looking to the carrying out of the purposes of the agreements with the Five Civilized Tribes and acts of Congress for the disposal of the tribal property

and the closing of the tribal affairs of said Indian Nations, further sales of the tribal land have been held during the year, and further per capita payments of about \$3,000,000 have been made.

To date of June 30, 1918, 3,558,165 acres of tribal lands of the several Five Civilized Tribes were sold for an aggregate of \$20,249,032.58, being \$4,505,563 more than the appraised value, an average of \$5.39 per acre. Of the total acreage sold, 1,905,139 acres of unallotted land brought \$10,625,324; 385,935 acres of the surface of the segregated coal and asphalt land, Choctaw and Chickasaw Nations, brought \$3,328,731; and 1,267,821 acres of Choctaw and Chickasaw tribal timber lands brought \$6,294,977. There remain unsold of Choctaw and Chickasaw tribal lands 324 acres of school lands with improvements, 2,280 town lots, and 14,800 acres of Choctaw and Chickasaw tribal lands, including 7,700 acres of timber land, 6,700 acres of the surface of the coal and asphalt land, and 400 acres of other unallotted tribal lands, which will be offered for sale at public auction from October 9 to October 17, 1918.

The coal and asphalt deposits, leased and unleased, underlying the surface of 441,107 acres of the segregated mineral land in the Choctaw and Chickasaw Nations, Okla., will be offered for sale at public auction to the highest bidder, at McAlester, Okla., on December 11, 12, 13, and 14, 1918. Three hundred and twenty-eight thousand two hundred and seventy-six acres of unleased lands will be first offered for sale to be followed by an offer of 112,831 acres of leased lands. The coal and asphalt deposits are appraised in the aggregate at \$14,461,041.73.

Eleven thousand six hundred and ninety-five acres of Choctaw and Chickasaw tribal timber land in McCurtain County have been sold to the State of Oklahoma for a game preserve for \$71,718.05, as authorized by the act of Congress approved May 25, 1918, Public No. 159, 65th Congress. The coal and asphalt deposits, both leased and unleased, underlying the surface of 441,107 acres of segregated mineral land in the Choctaw and Chickasaw Nations, appraised at \$14,461,041.73, will be sold at public auction to the highest bidder on December 11, 12, 13, and 14, 1918, as authorized by the act of Congress approved February 8, 1918, Public No. 98, 65th Congress.

Competency commissions have visited allottees of the Five Civilized Tribes during the fiscal year and are still at work to ascertain who are competent and capable of handling all transactions affecting their allotted lands without departmental assistance.

There were constructed during the year 127 houses, at a cost of \$134,466.67; 51 barns, at \$22,912.95, and 96 wells, at \$8,093.94. There were purchased 472 horses and mules, at a cost of \$63,739.78; 494 cattle, at \$35,766.84; 509 hogs, at \$13,088.66, and 228 wagons, at \$35,092.15. Miscellaneous farm implements were purchased at a

total cost of \$25,544.10. There was disbursed on account of per capita payments, improvements, and individual cash payments to Indians, salaries and expenses, a total of \$12,455,146.08. There was received of individual and tribal funds and congressional appropriations a total of \$16,175,520.73, showing a grand total of all moneys handled for the Five Civilized Tribes during the fiscal year of \$28,630,666.81.

Four thousand Indians of the Five Civilized Tribes have entered the United States Military Service. Six million nine hundred and twenty-three thousand six hundred and seventy dollars of the individual Indian funds of restricted Indians of the Five Civilized Tribes have been invested in Liberty loan bonds and war-saving stamps.

In the Cherokee Nation all the land and tribal property of said tribe has been allotted, sold, or otherwise disposed of except 30 acres erroneously platted as allotted land. The only unfinished work is in relation to the disposition of said 30 acres, the completion of per capita payments heretofore authorized, execution of 138 deeds to allottees, and 3 deeds to purchasers of unallotted land, and the settlement under the provisions of section 18 of the Indian appropriation act of May 25, 1918, of all claims against said tribe.

In the Seminole Nation all the tribal land and property of the Seminole Nation has been disposed of except 122 acres of unallotted land and 640 acres of land that was reserved for a tribal school. The remaining work to be done relates to the disposition of said remaining tracts of land, the completion of the per capita payments heretofore authorized out of the tribal funds, and the execution and delivery of a few deeds to allottees and purchasers of tribal land.

In the Creek Nation the unsold tribal property consists of the tribal council building in Okmulgee, 124 town lots in Muskogee, Tulsa, and Lee, 353 acres of tribal land, and 3 tracts of school property. The value of said unsold property is estimated at \$272,650. The remaining unfinished work relates to the sale or disposition of said tribal property, the equalization of allotments, investigation of alleged duplicate and fraudulent enrollments, and in connection with suits instituted to recover for the Creek Nation certain valuable oil and gas lands, including the beds of the Arkansas and Cimarron Rivers within said nation.

### OIL AND GAS IN THE FIVE CIVILIZED TRIBES OF OKLAHOMA.

The total production of oil from restricted Indian lands in the Five Civilized Tribes during the fiscal year ended June 30, 1918, amounted to approximately 13,000,000 barrels of oil from about 116,000 acres. The revenue to the tribe from oil and gas production during the fiscal year amounted to about \$4,000,000. These

oil and gas leases cover allotted lands and are made for a period of 10 years or as long thereafter as oil and gas is found in paying quantities, except leases covering lands of minors which are made to expire when the minor becomes of age, unless oil and gas is found in paying quantities. The leases provide for a royalty of one-eighth of the gross proceeds of the sale of the oil on the basis of the highest price posted by a responsible purchasing company.

On August 10, 1917, regulations were promulgated governing the utilization of casing-head gas produced from oil wells. The regulations provide that the gasoline productivity of the casing-head gas per thousand cubic feet shall be determined by a physical field test of the gas, the royalty being computed at  $12\frac{1}{2}$  per cent on the basis of a fixed schedule according to the yield of gasoline per 1,000 cubic feet and the sale price of the refined product.

### OSAGE OIL AND GAS LEASES.

On November 12, 1917, February 14, 1918, and May 18, 1918, there were sold at public auction at Pawhuska, Okla., leases covering certain Osage lands for oil-mining purposes, aggregating 90,286 acres, for a bonus consideration of \$3,258,312.50, an average of about \$36 per acre. These lands consisted of scattered tracts on the east side of the reservation selected with the object in view of opening up new pools of oil. Leases covering these tracts are for a period of five years and as long thereafter as oil is found in paying quantities, and provide for a royalty in addition to the bonus consideration of  $16\frac{2}{3}$  per cent, except when wells on quarter-section tracts or fractional parts of quarter sections are sufficient to average 100 or more barrels per well per day. The royalty on oil produced is 20 per cent.

The Osage Reservation under which oil and gas is reserved to the tribe until 1931 comprises approximately 1,500,000 acres, of which 680,000 acres on the east side were leased for oil and gas under a blanket lease authorized by Congress, which expired March 16, 1916. New leases have been made covering about 919,000 acres for gas and about 323,000 acres for oil; the oil leases aggregating about 323,000 acres are included in the 919,000 acres leased for gas.

On June 30, 1918, there were 1,450 dry and abandoned wells in the Osage Reservation, 3,755 producing oil wells, and 364 gas wells. The gross production of oil from July 1, 1917, to June 30, 1918, amounted to 10,906,376.59 barrels, of which the Osage tribe received as royalty 1,842,692.21 barrels. The total receipts of the Osage tribe from oil and gas leases from July 1, 1917, to June 30, 1918, amounted to approximately \$8,000,000.

OPENING THE WEST SIDE.—Advertisements have recently been approved and authority granted to offer for lease for oil-mining purposes on November 9, at public auction sale at Pawhuska, Okla.,

approximately 15,000 acres on the east side of the Osage Reservation, that is, east of range 7, and approximately 28,000 acres on the west side, that is, west of range 8. Authority was also granted to offer for lease for gas mining purposes on November 9, approximately 315,000 acres on the west side. No leases have heretofore been made on the west side of the Osage Reservation for oil or gas mining purposes. As the time during which the title to the minerals will remain in the Osage tribe will expire on April 8, 1931, unless otherwise provided by Congress, and in view of the demand for an increased production of oil to meet existing conditions, it has been decided to make this opening on the west side as the initial lease sale on this vast, heretofore practically untouched territory of supposed-to-be oil-bearing lands.

### OIL AND GAS OUTSIDE THE FIVE CIVILIZED TRIBES AND OSAGE NATION.

There has been considerable activity in the oil and gas industry in Oklahoma outside the Five Civilized Tribes and the Osage Nation during the past fiscal year.

The bringing in on March 9, 1918, of an oil well with an initial production of several hundred barrels per day greatly stimulated oil and gas leasing on the Kiowa Reservation. Since that time Indians having allotments in the vicinity of this well have received exceptionally high bonuses, the largest being at the rate of \$755 per acre. This is reported to be the highest rate of bonus ever paid in that field, regardless of the distance from the well.

Several wells with a large initial production have also been brought in on the Ponca Reservation, and at Pawnee 12 producing wells were drilled.

One hundred and twenty-five tracts of land on the ceded part of the Shoshone Indian Reservation, Wyo., each containing 160 acres, or less, were advertised for oil and gas mining leases, bids being opened on October 10, 1917. Seventy-four tracts were bid in and leases covering 69 tracts have been regularly executed. Under the terms of the advertisement and the leases the lessee is required to drill at least one well on each tract within one year from the date of execution of the lease by the Secretary of the Interior. The drilling of wells during the calendar year will largely determine whether the land on the ceded part of the reservation is valuable for oil and gas.

### PROBATING INDIAN ESTATES.

The probating of the estates of deceased Indians, under the provisions of the act of June 25, 1910 (36 Stats. L., 855, 856), for the fiscal year ending June 30, 1918, progressed very satisfactorily. During the year 2,415 cases were finally disposed of.

The heirs of deceased Indians also must be determined where personal property of a value less than \$250 is involved; where Indians hold restricted fee patents, in which no fee can be collected; where Indians hold inherited interests at a value less than \$250, and cases in which modifications were made in the original findings. One hundred and fifty-seven cases, coming within these classes, were disposed of.

One hundred and fifty-five Indian wills were finally acted on. There were also disapproved during the year 22 wills.

There are now employed in the field 12 examiners of inheritance, who are engaged in conducting hearings on 28 of the reservations and on the public domain.

In addition to the above, 3,745 miscellaneous cases were disposed of and 7,586 letters were written.

### PROBATE WORK IN OKLAHOMA.

In previous years the reports related to the probate work in the Five Civilized Tribes have been largely statistical, but it is intended by this report to explain more particularly the aims of the probate service and to explain the nature of the various lines of work and to describe the ends attained as a whole.

Bearing in mind that the courts of Oklahoma have been given jurisdiction by acts of Congress over the estates of minor and other incompetent members of those tribes, it will be readily appreciated that in a jurisdiction comprising 40 counties, marvelously rich in deposits of oil and gas, of lead and zinc, and of coal and asphalt, from which "rich streams of revenue gush forth," that are materially augmented by the returns from great crops of wheat, corn, cotton, and other staples, into swollen streams of wealth, there will necessarily be vast properties, collectively speaking, as well as large individual estates, which must be disposed of by those tribunals in such a way as to conserve and promote the interests of many Indian citizens or to throw them and their estates upon the mercy of designing speculators who in every community stand ready to prey upon those who most need protection.

And in connection with the foregoing it is an impressive fact that the number of names of restricted Indians appearing upon the approved rolls of the Five Civilized Tribes is upward of 37,000, of which nearly 27,000 are full-blood Indians. No proof is necessary to show that a multitude of cases will arise affecting these Indians and their heirs.

It is the duty of the probate attorneys—a duty which they fully appreciate and faithfully attempt to discharge—to stand guard like sentinels over the property and persons of these Indian wards. To

perform this duty it is necessary for the probate attorneys to keep an ever-vigilant eye upon the dockets of probate cases in the several counties assigned to them and to take whatever action that may be necessary in the premises, either by institution of civil suits or criminal prosecutions.

With respect to guardians and other trustees it is the aim of the probate attorneys to scrutinize their every act to the end that they shall be held to the faithful discharge of their trust, and as a result of this vigilance many of the guardians have been removed or discharged and others, found to be more worthy, have replaced them; in like manner it has been necessary for the probate attorneys to maintain a constant watchfulness with respect to the financial status of each case, to ascertain in each instance whether the bond is adequate, to require a new bond whenever necessary, and to take appropriate action to recover from bondsmen or other sureties whatever losses may result from the misconduct of their principals.

With such care there has resulted a great conservation of Indian money which, under the direction of the probate attorneys, has been applied to useful and beneficial purposes instead of being recklessly squandered. Investments have been made in homes, in land, in interest bearing securities, and the purchase of Liberty bonds. Thus the probate attorneys have been instrumental in teaching the great financial lesson that saving is not for the purpose of hoarding alone, but rather for profitable use.

There is an ever present attempt on the part of land speculators to induce sales of minor lands through the instrumentality of guardians of their own selection, and in some cases such sales have been made upon appraisals made by men chosen for the purpose by the prospective purchasers. This evil has been strenuously opposed by the probate attorneys who seek to keep down as much as possible the number of sales of minors' lands, unless reinvestment of a more desirable nature can be found, and to insist upon the highest prices possible through appraisals by the regular Government appraisers.

There is another part of the work of these attorneys which can not be expressed by numbers, but it is perhaps more beneficial than any other work performed by them. Reference is had in this connection to the countless daily conferences that are held with the many persons who seek the advice and counsel of these representatives of the Government with respect to matters which affect not only their property but also their personal interests, including the education of their children and other domestic matters which are necessarily involved in the advisory relation which they bear to a dependent people.

Responsive to the call of patriotism the probate attorneys have unhesitatingly contributed their efforts to the national cause in the

war that is now pending, and their numbers have been repeatedly lessened by transfers to the military branch of the Government or to other branches of service where their assistance was needed. And so, while it is true that temporary lapses have occurred in the work of individual districts, it must be realized that each man, in the time available to him at his post of duty, has done his utmost for the probate service until assigned to other work.

### A WOMAN PROBATE ATTORNEY.

It may be of interest that during the year a woman was appointed probate attorney. There was general approval of the appointment, and I have reason to believe that this innovation will prove entirely satisfactory. Concerning it and reflecting many similar expressions, the Fort Worth Record, in an editorial, said:

Commissioner of Indian Affairs Cato Sells has appointed Miss Florence Etheridge, of Miami, Okla., probate attorney, with headquarters at Vinita. Her appointment, it is said, is in line with Commissioner Sells's policy of appointing women to responsible positions in the Indian Service. The duties of probate attorney involve the protection of the property of minors and incompetent Indians and the prosecution of wrongdoers in the same connection.

Miss Etheridge was for several years employed in the Probate Division of the Indian Office at Washington, where she demonstrated unusual ability as a lawyer. She is vice president of the National Federation of Federal Employees, and made a vigorous fight before Congress to prevent the passage of the Borland amendment. She is a member of the law firm of Swanson & Etheridge.

There are millions of women wage earners in America. There are millions of girls who are wage earners. There are millions of women and children who are doing farm work. There are millions of women engaged in war-service work. There are millions of women Red Cross workers, and the call has been made for 25,000 Red Cross nurses in addition to those already in the service of their country.

Texas women have been given the primary ballot. Texas women are coming into their own. This is as it should be.

Cato Sells is a champion of equal suffrage. He believes that a woman who does the work of a man should receive the pay of a man. If woman is an intelligent and efficient worker why shouldn't she receive the pay of a man?

### REIMBURSABLE FUNDS.

The act of March 2, 1917 (39 Stat. L., 969-973), appropriated the sum of \$400,000 for use in the purchase of seed, animals, machinery, tools, implements, and other equipment, to be sold to Indians under regulations prescribed for its repayment to the Government. The enthusiasm of the Indians in agricultural and stock raising pursuits has been greatly aroused during the year and in consequence of their increased activities the demands for equipment and stock taxed to the fullest extent the limited reimbursable appropriation available. Unfortunately it has been necessary in many instances

to withhold plans for new development work in order that the most urgent needs might be cared for. Through the use of the money available, however, a large number of Indians have been able to accomplish a vast amount of improvement work on their lands which would not have been possible without the reimbursable assistance given them. The Indians on some of the northwestern reservations are now fairly well equipped so that it will be possible to withdraw much of the aid heretofore given them.

The benefits derived from reimbursable funds appropriated by Congress are being reflected more and more in the industrial improvements on all of the reservations. The Indians as a rule are cautious in requesting assistance from reimbursable funds and restrict their prospective obligations to actual needs and in amounts which they feel capable of liquidating.

The prospects for the return to the Treasury of the money expended for the benefit of the Indians are exceptionally good. Although the money appropriated for the past and previous years, excepting \$30,000, under the law need not be returned to the Treasury until the year 1925, it is estimated that more than \$300,000 has already been collected. The sum of \$30,000 appropriated in the act of March 3, 1911 (36 Stat. L., 1058-1062), was under the law available for use until June 30, 1917. The collections from the Indians are more than ample to reimburse this entire appropriation at this time. Notwithstanding the crops last year were comparatively poor, and in fact in some of the places the Indians did not get back the seed they planted in the spring, it is interesting to note the amount which the Indians at some of the northwestern reservations repaid during the fall of last year and the early part of this year. At Crow Agency approximately \$27,000 were returned; at Tongue River approximately \$15,000 were returned; at Blackfeet approximately \$10,000 were returned; at Warm Springs, where the crops were practically an entire failure, approximately \$5,000 were returned. The collections at many of the other reservations were equally as good, indicating that the Indians are rapidly reaching the point where they are deriving incomes through the use of property furnished to them, thereby justifying the inauguration of the reimbursable plan.

At places where tribal herds of sheep and cattle have been established from reimbursable funds for the benefit of the tribes of Indians as a whole, excellent results are being accomplished. The stock itself is ample security for the repayment of the money expended, and the present indications are that all of the money spent for the tribal herds, both cattle and sheep, will be fully repaid and a good margin of profit remain for the tribe.

### INDIVIDUAL INDIAN MONEY.

Special attention has been given to the method of handling individual Indian money during the past year. The rules and regulations have been modified materially, making it possible for Indians to obtain their funds more easily, thus giving them a chance to show their ability to manage their own business affairs.

While the general policy of conserving minors' funds has not been changed, a more liberal course was followed in the disbursement of their funds. In the case of minors who were nearly of age their funds were sometimes used to secure higher education or for some special kind of training.

Where the minors were young their combined funds were frequently expended in the purchase of property or for improvements to the homestead, it being realized that a comfortable sanitary home and proper surroundings would be of more value to them than would the small amount of money turned over to them when they reach their majority. Through the use of their own or their children's funds a large number of Indians were enabled to purchase seed and raise crops for the common benefit of the family, which would not otherwise have been possible.

When justifiable, the funds of both adults and minors have been used to purchase Liberty bonds, but this subject is fully gone into in another part of the report.

### ANNUITY AND PER CAPITA PAYMENTS.

The practice of placing their funds in the hands of competent Indians for expenditure, without supervision, as announced in my report last year, in conformity with the declaration of policy referred to therein, has been continued, on the whole, with encouraging results, most of the Indians seeming to appreciate the opportunity to handle their own funds and recognizing the consequent responsibility devolving upon them to spend the money wisely, although of course there have been individual exceptions to this rule. However, this is the only way the Indians will ever learn to stand on their own feet as independent citizens of the community.

### EMPLOYMENT FOR INDIANS.

Economic conditions on many reservations are much the same as last year, in that Indians do not have to leave home to find work in abundance. Their concern in home conditions shows a deepening civic interest. State officers of the Department of Agriculture are cooperating with the Indian Service in utilizing the labor of Indians for general farm work. In some localities wheat and alfalfa hay harvest hands were offered from \$4 to \$6 dollars a day.

Next in importance to raising food is transportation. Owing to the value of motor-driven vehicles in pioneer development it is both practical and profitable to give Indians opportunity to learn the construction and repair of such vehicles, and many of them are placed in the high-class factories, where they are switched from one department to another to receive all-around mechanical experience. In the evening they amplify the day's manual practice by attending automobile schools for theoretical information. Two or three years of combined study and experience will develop first-class mechanics. Over 300 Indians have taken advantage of such factory training.

It is especially necessary to have trained operators for tractors who understand the importance of minor, yet essential, details and can make prompt repairs in the field, when accidents occur, that plowing may not be retarded. Many who have enlisted in the Army and Navy are now repairing trucks, aeroplanes, etc., with the American Expeditionary Forces.

One of the strong, self-reliant Indian boys working in the Packard plant has without compensation looked after the welfare of the Indian workers of Detroit factories by meeting strangers as they reach town, helping them to find the factories to which they have been assigned, etc. State prohibition now gives a wholesome environment at Detroit for Indian youths.

Young men and women of Indian blood are filling clerical positions in the different departments of the Government. Two young girls are officers of the National Service School of the District of Columbia, preparing to become instructors in industrial arts to the soldiers invalidated home from foreign service. Indians, both men and women, are selling Liberty bonds and war-savings stamps all over the country. The largest stamp sales of this bureau for one day were made by a little Indian girl. Some of the finest war gardens of the country are planted and cultivated by Indian women. A number of returned students have gladly declared their ability to support the children to release their husbands for war duty. One little full-blood woman pays her mother-in-law to stay home and look after the babies while she works faithfully, and has paid for her home and furniture. The husband is at the front. Many other mothers are doing practically the same thing.

ARKANSAS VALLEY AGRICULTURAL ACTIVITIES.—Several hundred students from six schools of the Southwest again spent their summer vacation working for over 100 farmers and for the American Beet Sugar Co. in the Arkansas Valley. The Indian boys took their band instruments along for bugle calls and concerts and their baseball outfits for recreation. This colony of workers lives in 15 camps scattered through the valley from Garden City, Kans., to Rocky Ford, Colo. Each camp conducts a separate cuisine; a few unemployed

young men in the draft, awaiting call, and the wives of soldiers and sailors who are supporting their families to release men are selected for cooks. Women having small children, who are considered undesirable in many households and for that reason find it difficult to secure employment, are given the preference. The cooks have given special attention to conserving food and eliminating waste, in accordance with Government regulations. They are using the recipes published by the Food Commission.

Twenty-eight thousand dollars covers the aggregate earnings of the Indians for the season; in addition the health of the boys was toned up by out-of-door life, work, and an invigorating altitude.

Letters are frequent from Indians offering their services as carpenters for shipyard work, as tailors, and for other industrial activities. The Indian in khaki is a familiar visitor to the Indian Office. Among callers may be listed clerks, physicians, nurses, privates, non-commissioned and commissioned officers, Red Cross and Y. M. C. A. workers. Their high spirit and purpose and their desire to render service is immensely stimulating.

### NATIVE INDUSTRIES.

There has not been as much activity during the past year on the part of the Indians in native industries, due to the diversion of their efforts to agricultural and other pursuits in order to increase the production of food products, so necessary because of existing conditions growing out of the war.

The Navajo Indians have continued to make blankets, though not on such an extensive scale as heretofore. They have been selling their wool for use in the manufacture of clothing and other necessary articles rather than to weave it into native blankets.

There are apparently good markets for most of the better things made by the Indians, either through local trading establishments or the tourist trade; therefore no aggressive campaign was pursued during the year to widen the markets for products of this character.

The lace industry also is more or less inactive, due largely to the inability to get supplies and also to the fact that the Indian women are working in the fields in agricultural pursuits. It is believed this industry in future years will become an important one on many of the reservations, and every encouragement is given the Indians to utilize their spare moments in the making of salable articles to such extent as is now possible.

### ALLOTMENTS.

On the Gila River Reservation, Ariz., a special allotting agent is making additional irrigable allotments of 10 acres to each Indian.

Further allotments on the Umatilla Reservation, act of Congress approved March 2, 1917 (39 Stat. L., 969-986), to provide for 80 acres to each living Indian not theretofore allotted, is progressing in a very satisfactory manner. About one-half of the Indians entitled to allotment rights have made selections in the field.

Two hundred and seventy-seven allotments of irrigable land have been made to Indians on the Morongo Mission Reservation, Cal., under authority found in the act of March 2, 1917, but these selections have not been approved.

Reallotments have been made through changes in, and exchanges of, allotments under the acts of October 19, 1888 (25 Stat. L., 611-612), and March 3, 1909 (35 Stat. L., 781-784), on various reservations, more especially on the Cheyenne River Reservation, S. Dak., where many Indians are taking advantage of a better character of land for allotment purposes. Under the provisions of the acts of June 25, 1910 (36 Stat. L., 855-856), August 4, 1912 (37 Stat. L., 534), and June 30, 1913 (38 Stat. L., 94), 71 allotments were made and approved to the Fort Sill Apaches.

A list of the reservations, number of allotments approved during the year, and the number made in the field and not yet approved will be found in Table No. 26.

### PUBLIC-DOMAIN ALLOTMENTS.

By departmental order of October 27, 1913, the making of allotments under the fourth section of the general allotment act of February 8, 1887 (24 Stat. L., 388), as amended, was suspended, pending the promulgation of new rules and regulations to govern applications made under said act. On April 15, 1918, these new rules and regulations were approved and work is now progressing thereunder.

### WHITE EARTH LITIGATION.

On the White Earth Reservation, Minn., a plan for the settlement of litigated cases has been agreed upon and this work is progressing in a highly satisfactory manner. These cases are the outgrowth of the act of June 21, 1906 (34 Stat., 353), removing restrictions as to adult mixed bloods. The act specifically declares that patents to adult mixed-blood Indians of the White Earth Reservation shall be construed to pass the title in fee simple, thus giving the Indians that may be so classified full control of their property. The work of determining just who are mixed bloods is being handled by a commission under the act of June 30, 1913 (38 Stat. L., 88), and upon the completion of the so-called "blood" roll, a basis will be obtained for proper disposition of pending cases.

## APPRAISEMENT AND REAPPRAISEMENT OF SURPLUS RESERVATION AREAS.

During the fiscal year many applications for appraisal and reappraisal of surplus reservation areas, otherwise subject to homestead disposition, have been handled. Authority for such work is found in the act of June 6, 1912 (37 Stat. L., 125).

### EXTENSION OF TRUST PERIODS.

The following table shows the tribes whose period of trust has been extended, number of allotments on each reservation, including public domain, the number so extended, date of expiration of trust, and length of extension:

Tribe.	Allotments.	Allotments extended.	Date trust period expires.	Ex- tended.
				<i>Years.</i>
Mission, Cal. (Potrero and Rincon bands).....	Tribal.	Tribal.	1917	10
Prairie band of Pottawatomies, Kans.....	115	110	1917	10
Mission, Cal. (Campo, Augustine, Cuyaripe, Inala, Laguna, La Posta, Manzanita, Mesa Grande, Pala, Ramona, Santa Ysabel, Sycuan, Temecula, San Manuel bands).....	Tribal.	Tribal.	1918	10
Public domain.....	757	715	1918	1
Devils Lake, N. Dak. (Sioux).....		872	1918	10
Pawnee, Okla.....		820	1918	10
Oneida, Wis.....	1,501	35	1918	9
Tonkawas, Okla.....	73	27	1918	10

Authority for these extensions will be found in section 5 of the act of February 8, 1887 (24 Stat. L., 388), the act of June 21, 1906 (34 Stat. 326), and the act of March 2, 1917 (39 Stat., 969).

### SALE OF INDIAN LANDS.

During the fiscal year ended June 30, 1918, 662 pieces of allotted land, covering 74,126.24 acres, were sold for \$1,541,177.95 under the provisions of the noncompetent act; 438 pieces, covering 49,216.19 acres, were sold for \$1,174,854.97 under the inherited act. The average price received from both allotted and inherited Indian land is \$22 per acre. This is the largest average price that has ever been received from the sale of Indian land.

### FORESTRY.

Subsequent to the declaration of war against the German Imperial Government on April 6, 1917, a special effort has been made in the forestry branch of the Indian Service to place upon the market timber suitable for war purposes and to encourage in every practical way the production of those timber products that would be of spe-

cial advantage in supplying the military and industrial needs incident to the war.

Large sales of timber have been made on the Bad River, Flathead, Fort Apache, Klamath, Red Lake and Spokane Indian Reservations. While the timber cut from these reservations has not gone directly into military uses it has, and will, supply needs that arise through the diversion of other timber products to military purposes. Sales of lesser importance have also been made on the Coeur d'Alene, Jicarilla, and Leech Lake Reservations and the timber on allotments under the Nett Lake jurisdiction has been offered for sale.

At the large sawmill operated by the Government on the Menominee Indian Reservation, Wis., an especial effort has been made to produce such products as will be of special use in war industries. Arrangements have been made for the supplying of materials from that mill to a large shipbuilding corporation at Manitowoc, Wis., and other industrial plants. Lumber produced at these mills has also been offered to the Government for the construction of cantonments.

An effort has been made to develop production of special timber products for military purposes on reservations in western Washington and Oregon. On the Tulalip, Port Madison, Chehalis, Swinomish, and Skokomish Reservations sales of timber suitable for the manufacture of ship knees have been effected. Sales of timber suitable for aeroplane construction have been made from the Hoh, Siletz, and Quinalt Reservations, and arrangements completed for extensive operations in the production of aeroplane material on the two reservations last named.

An effort has been made to locate supplies of black walnut on Indian reservations in the Plains region and to arrange for the disposal of this timber in such manner as to assist the Government in the production of gunstocks and aeroplane propellers. Black walnut is being produced on the Sac and Fox, Osage, Pawnee, Kiowa, Winnebago, Eastern Cherokee and other reservations.

During the autumn of 1917 the eastern portion of the Spokane Indian Reservation was cruised and a contour map prepared. The information thus obtained was immediately used in the offering of about 275,000,000 feet of timber for sale.

Because of the enlistment and calling of technical men into the military forces of the United States and the difficulty of obtaining suitable employees for appraisalment and map work the making of valuation surveys has been practically suspended. During the summer and autumn of 1918 the timber will be cruised on allotments of the Siletz Reservation and on the nonreservation allotments in Oregon and northern California which are now under the jurisdiction of the Siletz and Greenville Indian Schools.

The general regulations and instructions for officers in charge of forests on Indian reservations, which were first approved on June 29, 1911, and modified on March 17, 1917, were revised and approved on February 5, 1918.

A new form of scale book and several other books and forms for the keeping of records of timber operations on Indian reservations were devised, printed, and distributed. The introduction of these forms will greatly promote efficiency and uniformity in timber records at agencies.

Detailed information regarding the stand of timber, the number of sawmills in operation and the amount of timber cut from each Indian reservation will be found in the Statistical Appendix to this report.

### ROADS AND BRIDGES.

The important place occupied by good roads in contributing to the industrial welfare and progress of the Indians has been further recognized during the year by the expenditure from the regular appropriations of thousands of dollars for Indian labor in the construction and repair of roads and bridges on the different reservations, besides specific appropriations of \$42,500 for two bridges across the Little Colorado and Canyon Diablo Rivers near the Leupp School, in Arizona; \$10,000 for road work on the Chippewa reservations in Minnesota; \$15,000 on the Gallup-Mesa Verde National Highway across the Navajo Reservation, in New Mexico; and \$25,000 for roads and bridges on the Shoshone Reservation in Wyoming.

### PURCHASE OF SUPPLIES.

Recognizing the unparalleled need for supplies of all kinds for the Army and Navy, the Indian Service has tried to fill its requirements from those lines which would least interfere with the proper conduct of the war. The service has closely cooperated with the United States Food and Fuel Administrations, their State officers, with the War Industries Board and subordinate branches, and with other organizations established for the purpose of regulating the production and use of materials and supplies. The rule requiring the use of flour substitutes has been strictly enforced. Woolen uniforms have been dispensed with for the time being, and requirements in other lines curtailed. Taking into consideration existing conditions affecting both the purchasing of supplies and their transportation to the points of consumption, the Indian Service has fared very well. The service was indeed gratified at the manner in which its coal supply was furnished and delivered during the past winter, but little or no trouble being experienced through delay in the delivery of coal even at the most remote points using that kind of

fuel. To aid in the conservation of coal, wood is being used more than heretofore and to the greatest extent possible. Prices in all lines naturally were abnormally high, but were in keeping with market conditions.

## NEW SYSTEM OF BOOKKEEPING AND ACCOUNTING.

The "fund accounting" feature of the new system of bookkeeping and accounting referred to in my last annual report (p. 54) was installed as of July 1, 1917, and disbursing officers at this time are generally familiar with its requirements and able to make fairly prompt and accurate reports of their financial operations thereunder. The "general accounting" feature was installed at most of the units at various times during the year, but some of the disbursing officers, for one reason and another, failed to get it in efficient working order, with the result that no reliable reports of cost by activities would be possible this year.

To aid in the installation and operation of the new system of bookkeeping and accounting, as well as to obtain a more effective checking of the accounts of disbursing officers in the field, three expert accountants were selected from the field clerical force and appointed as traveling auditors. The results obtained thus far have fully justified the plan.

## LEGISLATION.

Congress passed the Indian appropriation act on May 25, 1918, aggregating approximately \$11,000,000, for the usual appropriations for the current and contingent expenses of the Indian Service. Among the items of especial interest are the following:

Irrigation appropriations were made for specific projects by districts. These sums, together with appropriations for irrigation employees, surveys, and incidental expenses, total \$250,750. Congress provided, however, that no part of the appropriation was to be expended on any irrigation system or reclamation project for which public funds are or may be otherwise available. It also provided that the appropriations were to be available interchangeably for necessary expenses for damage by floods and other unforeseen accidents, the amount so interchanged not to exceed in the aggregate 10 per cent of the amount so appropriated.

On and after September 1, 1918, possession by a person in the Indian country where the introduction of liquor is or was prohibited by treaty or Federal statute shall be an offense and punishable in accordance with the acts of July 23, 1892 (27 Stat. L., 267), and January 30, 1897 (29 Stat. L., 506).

The annual per capita cost for schools was limited to not to exceed \$200 unless the attendance numbered less than 100 pupils, in which

case the per capita expenditure of not to exceed \$225 may be authorized. The number of pupils entitled, in any one school, to the per capita allowance shall be determined by taking the average attendance for the entire fiscal year and not any fractional part.

The sum of \$10,000 was appropriated for the construction of a fence along the international boundary line between Mexico and the Papago Indian Reservation in Arizona.

Hereafter no Indian reservations shall be created, nor shall any additions be made to any heretofore created, within the limits of the States of Arizona and New Mexico, except by act of Congress.

The Florida Seminole Indians are given an appropriation of \$10,000 for civilization and education, including the construction and equipment of necessary buildings on lands set aside by the State of Florida, by act of its legislature, for the perpetual use of said Indians.

An appropriation of \$75,000 is made for the relief of distress among the full-blood Choctaw Indians of Mississippi. This is for the purpose of payment for employees, the establishment and maintenance of schools, purchase of lands, encouragement of industry and self-support, and purchase of seed and agricultural implements.

The withdrawal from the Treasury of the United States of the sum of \$200,000 of the tribal funds on deposit to the credit of the Crow Indians in the State of Montana is authorized for the purpose of necessary improvements to the irrigation systems in the Big Horn Valley on that reservation.

The sum of \$25,000 is appropriated for continuing work on the Indian highway extending from Mesa Verde National Park to Gallup, N. Mex.

The proviso to section 1 of the act of March 4, 1907 (34 Stat. L., 1413), relating to the expenditure of the proceeds derived from the sale of timber on the Jicarilla Reservation was amended so as to authorize the expenditure of said proceeds, with the consent of the allottees whose property is appropriated, in the purchase of live stock, seeds, agricultural equipment, and for other community or individual purposes beneficial to the Indians.

The sum of \$8,000 is appropriated for the construction of a bridge across the Oconalufy River near the Indian School at Cherokee, N. C.

The act of May 28, 1908 (35 Stat. L., 460), and the act of February 14, 1913 (37 Stat. L., 675), was amended so as to authorize the per capita distribution to the Standing Rock Indians, or the use of such moneys arising under the acts mentioned for their benefit.

Receipts from leasing oil, gas, and other mineral lands of the Osage Indians until the same are paid out as provided by existing law, may be deposited in national or State banks in Oklahoma.

The construction of a fire-proof office building for the Osage Agency is authorized.

Allottees of the Osage Nation may change the present designation of homesteads to an equal area of unincumbered surplus lands under regulations to be prescribed.

The Five Civilized Tribes appropriation contains a limitation prohibiting the use of the appropriation for forwarding to the Secretary of the Interior undisputed claims to be paid from individual moneys of restricted allottees or their heirs, or uncontested agricultural and mineral leases, excluding oil and gas leases. An appeal is, however, authorized.

A per capita payment of not to exceed \$200 to the Choctaw and Chickasaw Indians is provided for.

Not to exceed \$100 per capita is authorized to be paid to the Seminole Indians out of their funds.

The distribution of Creek funds, except \$150,000, so as to equalize the pro rata share received by each member of said tribe in either land or money, is authorized.

The sale to the State of Oklahoma for a game preserve of certain lands within the Choctaw and Chickasaw Nations is authorized.

All claims against the Cherokee Nation are to be filed not later than one year after the approval of the act.

The Court of Claims is authorized to adjudicate the claims of J. F. McMurray, provided adjustment is not made by mutual agreement within 60 days after the approval of the act.

The sum of \$400,000, reimbursable, is appropriated for encouraging industry and self-support among the Klamath Indians in Oregon.

The sum of \$8,000 is appropriated for the education of the Alabama and Coushatta Indians located in Polk County, Tex., and for an investigation to be made as to the necessity and advisability of purchasing land for said Indians.

An additional sum of \$500,000 is appropriated for the Wahpeto irrigation and drainage system in the State of Washington.

The withdrawal of \$300,000 of the tribal funds of the Menominee Indians in Wisconsin for their benefit is authorized.

The expenditure of tribal funds, not exceeding \$2,500,000 during the fiscal year ending June 30, 1919, in addition to such sums as may be required for equalization of allotments, education of Indian children, per capita and other payments to Indians, and expenditures for the Five Civilized Tribes, in accordance with existing law, is authorized.

The withdrawal from the Treasury of the United States of community funds of any Indian tribe which are susceptible of segregation, so as to credit an equal share to each and every recognized member of the tribe, except those whose shares have already been withdrawn, and the deposit of such funds in banks to be selected, subject to withdrawal for payment to the individual owners, is authorized.

## COURT DECISIONS.

There were a number of very important decisions rendered by the courts on Indian matters during the past year. The most important decision was that of the Supreme Court of the United States in the case of *Brader v. James*, which was decided March 4, 1918, wherein the court held that the act of 1906, requiring conveyances by full-blood heirs of members of the Five Civilized Tribes be approved by the Secretary of the Interior was constitutional, even though the lands descended prior to the passage of the act. This was based on the theory that Congress has power to reimpose restrictions on lands allotted to Indians and is the first definite holding of the Supreme Court on this point.

The same court, on November 5, 1917, decided the case of the United States *v. Hiram Chase*. The decision of the court was to the effect that assignments to individual members of the Omaha tribe under Article IV of the treaty of March 6, 1865 (14 Stat. L., 667), passed only the Indian or tribal right to occupancy; did not pass title in fee, and was not an insurmountable obstacle to the allotment of these lands under the act of August 7, 1882 (22 Stat. L., 341).

In the case of *United States v. Soldana* the Supreme Court rules that the station platform of the Chicago, Burlington & Quincy Railroad at Crow Agency, Mont., is Indian country within the provisions of the act of 1897 forbidding the introduction of liquor into the Indian country.

In *Lane v. Morrison* the decision of the court was to the effect that the joint resolution of March 4, 1915, continuing for another year the appropriations for current and contingent expenses of the Indian Department and for fulfilling treaty stipulations, included the appropriation for promoting civilization and self-support among the Minnesota Chippewa Indians.

The title to the Spokane Indian Reservation was quieted in the Indians of that reservation by the decision of the Supreme Court in *Northern Pacific Railway v. Emma A. Wismer*. It was held by the Supreme Court that the reservation was legally established and the lands removed beyond the scope of the grant to the railroad.

In *Egan v. McDonald* the Supreme Court held that the heirs of a deceased Indian had power to convey trust lands with the approval of the Secretary of the Interior under the act of May 27, 1902 (32 Stat. L., 275), and the approval of the conveyance did not require an antecedent finding by a Federal court as to heirs.

There was also an important decision by the Supreme Court of the District of Columbia in which an Osage Indian asked the court to compel payment of moneys which were part of the payment to

the Osages withheld under the provisions of section 2087, Revised Statutes, which reads:

No annuities, or moneys, or goods shall be paid or distributed to Indians while they are under the influence of any description of intoxicating liquor, nor while there are good and sufficient reasons leading the officers or agents, whose duty it may be to make such payments or distribution, to believe that there is any species of intoxicating liquor within convenient reach of the Indians, nor until the chiefs and headmen of the tribe shall have pledged themselves to use all their influence and to make all proper exertions to prevent the introduction and sale of such liquor in their country.

The court dismissed the case.

## SUPPRESSION OF THE LIQUOR TRAFFIC.

Recent Federal and State legislation prohibiting the sale of intoxicating liquors either at large or in war zone districts has been so progressive and effective as to substantially improve conditions throughout the entire country.

The item in the Indian appropriation act for the fiscal year 1919, providing that on and after September 1, 1918, possession by a person of intoxicating liquor in Indian country, where its introduction is or was prohibited by treaty or Federal statute, shall, in itself, constitute an offense punishable as provided in previous statutory enactments, has made possible law enforcement certain to be far-reaching and exceedingly helpful in securing convictions of violators who have frequently theretofore escaped punishment.

While these new conditions have already resulted in better control of the liquor traffic and a marked decrease in the violations of the law, it is apparent that continuous and uncompromising vigilance will be necessary to insure the accomplishment of such results as, with our present legal weapons, are reasonably to be expected.

The fiscal year just closed has been a very active one. As in previous years, bootleggers have been the ever-present, persistent, and malicious enemy of the Indian. Of all men they, as a class, are the most despicable. They have no respect for God or man. There is no legitimate place for bootleggers anywhere on earth. They are without a defender.

Public sentiment was at one time considerably divided in Minnesota as to the wisdom and propriety of the Indian Office activities in connection with the enforcement of the provisions of the Chippewa treaty of 1855 prohibiting the introduction and sale of liquor into a large part of the State covered by this treaty. The change in sentiment in Minnesota, among those who for business reasons or otherwise were slow to accept this new condition, has amounted to a revolution, and it is gratifying that now there is practically unanimous support of our activities in harmony with the decision of the

Supreme Court of the United States, which on June 12, 1914, held that the Chippewa treaty of 1855 was in full force and effect.

Our operations in Minnesota, and particularly in the treaty territory, have continued unabated. While several counties have recently voted dry, and the Public Safety Commission has ordered other places to cease traffic in intoxicants, there is much aggressive work to be done.

The case wherein the John Gund Brewing Co. sought to compel the Great Northern Railway Co. to accept shipments of beer, etc., to persons residing within the treaty territory in Minnesota, referred to in my report of last year, was disposed of by the United States Supreme Court on March 18, 1918, favorably to the contention of the Government and against the contention of the Brewing Co.

A case involving the act of May 18, 1916, providing that possession by a person of intoxicating liquors in the country where introduction is prohibited by treaty or Federal statute shall be prima facie evidence of unlawful introduction, was tried in the United States court for the district of Minnesota and the law upheld. The convicted defendant appealed the case to the United States Circuit Court of Appeals on a writ of error, where the judgment of the lower court, at the December term, 1917, was sustained.

The enforcement difficulties in Minnesota were perhaps greater than in any other State than Oklahoma, although there have been continuous and varying problems everywhere, probably most acute in Wisconsin and Montana. However, Montana will go dry at the close of this calendar year and a great improvement there is confidently expected. In Oklahoma liquor conditions have been very bad and are still far from satisfactory.

The practice of loading liquors into big automobiles and driving at high speed into Indian country will probably decrease in popularity by reason of the legislation extending the provisions of section 2140 of the Revised Statutes, referred to in my last report. In a case under this section in the United States court for the eastern district of Oklahoma, it was held that the mortgagee had no rights, that the act of March 2, 1918, removed the ownership question entirely. The automobile in that case was ordered confiscated and sold. Many automobiles used in attempting to outwit the law have fallen into the hands of our liquor suppression officers and suffered a similar fate.

Seizure of conveyances does not stop with automobiles and wagons. Illegal shipments of liquor from Joplin, Mo., into the eastern district of Oklahoma are a source of vexatious trouble. Information reached our liquor-suppression officers that railroad trainmen were involved in an introduction conspiracy. On January 4, 1918, it was learned that a large quantity of liquor had been secreted in a

freight car en route for Wagoner, Okla., with knowledge of the train crew. Upon investigation the liquor was discovered in a sealed box car of crushed ore. On top of the ore were 41 sacks containing 984 quarts of whiskey. In a coal car of the same train was found a noted bootlegger who was arrested. The train engine and the car which contained the liquor were seized as conveyances under section 2140 as amended.

Early in my administration of Indian affairs I discovered the previous-to-that-time unenforced Federal statute, section 2087, which provides that no annuities or moneys or goods shall be paid or distributed to Indians while they are under the influence of any description of intoxicating liquor, nor while there are good and sufficient reasons for those whose duty it may be to make such payments or distribution, to believe that there is any species of intoxicating liquor within convenient reach of the Indians.

This law seemed to me to be a certain and speedy remedy for improving the wicked and debauched condition prevailing where Indians were receiving payments, and thereafter I proceeded to exercise the power so conferred.

At its first enforcement, now more than four years ago, it became apparent that the white citizens of the community, for business reasons or otherwise, who either participated in or condoned the traffic in liquor in violation of law, were quick to respond and give cooperation to the Indian Bureau enforcement officers when money payments were withheld from the channels of trade.

About two years since I successfully used this legal weapon by withholding the payment of more than a million dollars from the Osages, in Oklahoma, and for a considerable time thereafter sobriety among these Indians was so noticeable that the locality thereabouts was regarded as dry country.

At the beginning of the year 1918 information reached me that the bootlegger was again continuing his nefarious business with increasing activity in Osage County. Just previous to the quarterly payment ordinarily due about the first of March, I was dependably advised that the sale of liquor had increased until conditions there were worse than ever before, that many who had previously given support to the apprehension and conviction of those engaged in illicit traffic in liquor were by their inactivity or approval making possible a defiance of law not confined to the criminal violator but indirectly profited in by the venders of merchandise and the unscrupulous politician. The situation in Osage County at this time was revolting, degrading, and in every way destructive of the morals, the industry, and the very life of the Osage Indians.

For several months every other means within my reach had been exercised without satisfactory results, consequently on March 2, 1918,

I directed the superintendent at Pawhuska to withhold payments of all royalties and bonus money to Indians residing in Osage County until further advised. This order suspended the payment of \$1,660,600. Pandemonium soon reigned at Pawhuska and vicinity. A "hurry-up call" was made for a meeting, which was attended by something like 500 representative citizens and about \$6,000 was subscribed to assist in law enforcement, immediately after which an appeal was made to me to permit the payment. My answer was this telegram to Superintendent Wright:

Liquor conditions Osage Nation exceedingly bad and indefensible. Enforcement as formerly promised by local authorities has been spasmodic and temporary. I shall not be satisfied with less than demonstration of absolute good faith. This order should be enforced in such a way as to make certain that it will not be violated in the future. Liquor has been the curse of these Indians. Its results are intolerable and vicious.

A personal visit and investigation further convinced me that the suspension order was fully justified and that it should not then be revoked. Strenuous appeals were made and political influence was not overlooked, but we insisted that the payment would not be made, nor would the next one, when due, unless public sentiment was so aroused that enforcement committees and local officials would earnestly join in our efforts to drive liquor from within the reach of the Osage Indians.

As an indication of the situation the following from an article, published in the Tusla Democrat of March 31, 1918, will be of interest:

Up in the Osage a new war is being waged. Osage County really has nothing on Germany. It is fighting for its existence and not even calling upon God to take notice. But for the great world war which affects everybody, though its front is thousands of miles away, the present war in Osage County would attract Nation-wide attention. But even as things are the war which means the financial life or death of Osage County is getting the lion's share of attention just now throughout the biggest county in Oklahoma, the world war having been backed off the boards for the time.

Osage County is making war upon the bootleggers. Heretofore the county has done more or less desultory fighting against that enemy of order and decency, but that was only skirmishing. It was a matter of getting Cato Sells, Commissioner of Indian Affairs, to release suspended quarterly and other payments on assurance that the bootleggers and their business has been driven out.

Now Osage County is at war in earnest. John Barleycorn, high chief commander of the enemy's forces, is well aware of this fact. If the bootleggers are not defeated, which means driven out utterly or annihilated physically, Osage County will lose its proud position as the home of the richest nation of people on earth, the Osage Indians.

The die is cast, and the issue is joined. The fight is to the finish. That it is not going to be the finish of Osage County's prosperity is a foregone conclusion, and for that very reason it is permitted this war correspondent to predict ultimate victory for the allied forces of Osage County, including the whites and the Indians.

No bootlegger peace will be accepted. The peace must be a respectable citizens' peace. Bootlegging must be uprooted and overthrown and cast out and done for. Nothing else will suffice. The Great White Father at Washington has said it. Through the mouth of his general manager of all the Government-ward Indians in the United States, Cato Sells, Commissioner of Indian Affairs, he has said it; and he means it.

If you doubt that, ask Cato Sells if Uncle Sam doesn't mean what he says—through Mr. Sells officially—to wit:

“The bootlegger must go and bootlegging must cease before another dollar of Osage Indian money is released for expenditure in Osage County.”

What that means may be explained in a few short words. It means that approximately \$6,000,000 a year, including bonuses on the sale of oil lands and the four quarterly payments of oil and gas royalties, these \$6,000,000 being almost the only visible support of Osage County, will be held out of payment until Commissioner Sells has actual and visible proof that Osage County has conquered and exterminated the bootleggers; and that is the war in its first lap up in the Osage, just above Tulsa. \* \* \*

Pawhuska is a beautiful little city of about 5,000 people, the county seat of Osage County. It has grown from a small Indian trading post in the past 10 years since the Osages got their allotments and waxed opulent on oil and gas royalties. It is the Osage Indian money that has made Pawhuska. \* \* \*

Save as to bootlegging, the people of Osage County are law-abiding. Of course reservation must be made for the offenses incident to bootlegging. The average of intelligence is high. There are good schools, both for whites and for Indians. Osage citizenry is by no means of the wild and woolly sort. It is a composite of the all-American type. Some of the Osages are highly educated. They have been to Carlisle and other Indian schools elsewhere. In the Osage school on the terrace at Pawhuska are many Indian children of both sexes. J. George Wright, superintendent of this school, is the local Indian agent. It is from his office that the checks are distributed to the Indians. Disbursing Agent Wise signs checks on the United States Treasury and they go to the 2,229 Osages each quarter, except when suspended, as at present. It is a considerable job that Mr. Wise has.

Though a town of but 5,000 people, Pawhuska had until recently 57 licensed jitneys. Citizens who wish to minimize the impression as to the prevalence of bootlegging will tell you, perhaps, that the jitneys do a big business carrying Indians to and from the Indian village and between Pawhuska and other towns in the county. Those who admit that bootlegging is jitneyized will tell you that most of the “jits” are subsidized by the wholesalers in booze, who farm the stuff out to the jitney drivers, who in their turn sell it to the Indians. The jitneys get \$1 a head for carrying Indians between Pawhuska and the village—2 miles—50 cents a mile.

And here is what an authoritative official told a representative of the Democrat, when recently at Pawhuska:

“These jitneys will bring an Indian in from the village and take him back home, charge \$2, and on the trip the driver will sell the Indian a quart of whisky, price to Indians, \$12; total \$14 for the quart, including the ride that is necessary to get the booze placed. An Indian, especially a booze-fighting Indian, never worries about the price. If he has the money, and he usually has for some time after the quarterly payment, he will give up gracefully. If he is broke, as he usually is before his next hand-out from the Government, he finds it easy to borrow money at hugely usurious rates. Anyhow, he gets the booze, gets drunk, gets into trouble, and raises hades.”

It is said that booze is brought into Osage County in high-powered automobiles bought and fitted especially for the business, and that whisky caches are almost as common as gopher holes. Queer tales are told of the ingenuity displayed by the bootleggers in concealing their stocks. Near Pawhuska is an old Indian graveyard. A certain chief, gathered to his fathers many years ago, is buried in a grave of architecture superior to the common run. The grave is walled up and covered with rocks, making it a sort of vault.

One of the officers on the scent of a booze cache trailed a jitney to the graveyard. The officer secreted himself and watched the jitney man remove a flat slab of stone from one corner of the grave and take out some bottles. He pounced upon the fellow. The old chief's grave, like the tomb of the kings of Egypt, the great pyramid, was a hiding place for treasure, though in this case the treasure was booze.

In the same issue of the Tulsa Democrat—that is to say, March 31 last—appeared the following statement made by me:

I spent Wednesday at Pawhuska in conference with agency officials, enforcement officers, white citizens, and representative Osage Indians, concerning liquor conditions in Osage County.

The representations heretofore made to me in this connection are in no wise exaggerated. As a result of my interviews it is my conclusion that liquor conditions there are not only bad but without precedent. However, it is gratifying that local business men are cooperating with Federal authorities and Superintendent Wright in the effort to clean up and drive the bootlegger out of the locality.

I was also greatly pleased to find numerous Indians disposed to cooperate in the enforcement of the law for the welfare of their own people, and especially the younger men, who are more addicted to the liquor habit than the older Indians.

There is a promising outlook, but I shall not be satisfied until there is effective performance. The law must be enforced permanently, and the payments will not be made until such a condition is apparent.

During the year ending December 31, 1917, there was disbursed through the agency office to Osage Indians \$6,290,087, or an average of \$3,170 to each man, woman, and child.

For the past two years the agency office has restricted payments to about 50 Indians, who are most seriously and persistently addicted to the liquor habit, and the records show that on December 31, 1917, such Indians had an aggregate of \$58,800 in banks to their credit, in addition to which considerably over \$100,000 was expended in payments of debts previously contracted by them, erection of permanent improvements, and the purchase of implements and other necessities. When the payments to these Indians were withheld they were largely in debt and did not have a dollar. They are now practically free from debt and are owners of property which they would not otherwise have acquired had their payments been made to them unrestricted. This money was expended for them as they desired, under supervision; consequently, they were unable to use any of it for the purchase of whisky.

The amount of the oil payment bonus suspended is \$1,660,600. The regular quarterly payment of oil and gas royalties and interest on trust funds, aggregating something over \$1,200,000, is also being withheld under this same order, or a total amount of \$2,860,600.

On April 22, I wrote the following letter to Superintendent Wright, at which time for reasons therein stated, I authorized the payment of \$1,660,600, the same being the amount first withheld, and continued the order as to the second payment in the sum of \$1,200,000:

Information before me represents that liquor conditions in Osage County have improved since the order was made withholding payments and, while they are still unsatisfactory, I think we are justified in making the bonus payment, largely because of the opportunity it will afford for the purchase of liberty loan bonds of the third issue, the time for subscribing to which will expire May 6.

I wish it understood that in coming to all conclusions in this connection I have been guided only by the earnest desire to secure the best results obtainable for all concerned.

Before making the order I was reliably informed, and a personal visit there has confirmed my opinion, that the Indians have and are suffering irreparably from the introduction and sale of liquor in Osage County; that the extent to which it has been carried on, together with other evils that follow, has brought about the permanent injury of numerous men, women, boys, and girls of the Osage tribe. To permit its continuance when a lawful remedy is available would be a serious reflection not only

upon the entire community and the Federal officers but upon every man holding a local office in any manner associated with the betterment of conditions.

The Federal authorities are sympathetic with our efforts and I have reason to believe that some of the local officers are giving earnest cooperation, but this is not true of all public officers in Osage County. It is not sufficient to say that the best citizens thereabouts want the law enforced or that they have contributed their money to an enforcement fund. More than this is required to demonstrate good faith. If an officer is doing less than his duty public sentiment should retire him.

It is folly to say that the bootlegger can not be driven out of Osage County. It can and should be done. If the Indians are to have the protection the law contemplates and which I regard as absolutely necessary for their welfare and happiness, it must be done.

Make the bonus payment now, encourage the purchase of liberty loan bonds, and await the action of the officers and the public to so change conditions there as to dependably indicate permanent relief from the degrading and destructive effects of the liquor traffic.

The efforts being made by some of the citizens and part of the officers are gratifying and promising.

Please keep me advised as to the situation following the bonus payment, to the end that while we are firm in the performance of our duties we may in no way fail to be just.

Thereafter the withholding order of the \$1,200,000 continued until I made another visit to Pawhuska, when, after a conference with Superintendent Wright, a trip to several towns of the county and interviews with numerous white citizens and representative Indians, I authorized the \$1,200,000 payment and gave out the following interview, which appeared in the Tulsa World, of May 9, 1918:

I am so much concerned in doing the very right thing in connection with the liquor situation in Osage County, with especial reference to the suspension of payments to the Indians, that I have made another trip from Washington to Pawhuska that I might personally acquire further dependable information upon which to base action.

I am just returning from Pawhuska en route back to Washington, having spent Tuesday and Wednesday with Superintendent Wright and others. While there I made close inquiry, with the result that I am convinced that the liquor situation has been greatly improved since early in March, when I suspended the first, and a short time thereafter the second, payment.

Some time ago I directed the payment of bonus money, amounting to \$1,600,000, chiefly for the reason that I did not want to interfere with the purchase of liberty loan bonds, and to-day I have authorized the quarterly payment due March 1 of \$1,200,000. There will be another payment due about the first of June. I am not yet satisfied with the liquor situation there, but it is very much better. A large part of the white people and the Indians are apparently acting in good faith in their efforts to suppress the liquor traffic. However, the bootleggers still remain thereabouts, and I am not certain that the experience of two years ago will not be repeated. When I suspended a payment at that time there were many evidences of a sincere intention to permanently enforce the law, but it was not long until conditions were again bad, and they continued to grow worse until immediately previous to the last suspension of payments they were exceedingly bad, worse than they had ever been before.

There were "wholesale bootleggers" and "retail bootleggers." The wholesalers were defiant and apparently proud of their business. The retailers were numerous, and as low down in the scale of life as it is possible for men to become. However,

they were not less avaricious, vicious, or criminal than those engaged in the wholesaling of whisky.

While there are many high-class white men and Indians in Osage County, there is a considerable element there that has no regard for law or order. Their chief purpose in life seems to be to get the Indian's money. They are especially active immediately following each payment.

I would be less than fair if I failed to say that some of the county and city officials are earnestly sympathetic with our efforts to clean up conditions. This is especially so of Mayor Carroll, of Pawhuska, recently elected, and the county attorney's office, but it is equally true that this does not apply to all local officials, some of whom are at least indifferent, with many indications that they are in sympathy with the law-breakers.

Altogether the Osage Indians have suffered irreparably, and it will not be possible to bring about an entirely satisfactory solution of this situation until there is a much stronger sentiment than now exists for full cooperation and an earnest, united effort against those who introduce and sell liquor. It can only come about when every agency, private and public, indicates unmistakably by action as well as words that they are determined to make it impossible for the bootlegger and other violators of the law to remain in Osage County.

I have now ordered the last payment due paid, and it will be paid immediately. There will soon be another payment due, which, if conditions justify, I shall withhold.

I am not going to stop this fight until the law is vindicated by good faith enforcement. We are now reenforced in this, that the Supreme Court of the District of Columbia has, within the last 10 days, denied a writ of mandamus compelling payment holding that section 2087 of the Revised Statutes is in full force and effect, the same being the law under which the Osage payments were suspended. The pending Indian bill contains a clause, which has passed the Senate and House, making the possession of liquor in Indian country a crime, so that hereafter we will not only have the adjudicated fact that section 2087 is operative, but the additional statute which makes it easy and certain to convict every person found in Indian country with liquor in his possession. We are going to use both of these legal weapons, and there will be no compromise.

These payments have been ordered made because we believe conditions warrant our action. We are not disposed to discredit those who proclaim their intention to permanently enforce the law. If they do, the payments will be regularly made. If they do not, they will be suspended, and the fight will be kept up until there is such a condition of enforcement as is contemplated by the law.

I have but one purpose in my action in this connection, and that is to do my full duty. I have no satisfaction in the exercise of authority other than as it may be the instrument of good. I do not want to unnecessarily embarrass anyone, and shall not, but I am fixed in my determination to save the Osage Indians from the inevitable wreck awaiting them if they are not rescued from the licentious conduct of those who would push them on in idleness, debauchery, and crime, and to this end I invite the cooperation and support of every good citizen in Osage County and elsewhere in Oklahoma.

Thus ended a victory for law and order, unequalled in our five years' struggle for enforcement of statutes prohibiting the sale of liquor to Indians and in Indian country. Its results have not only been wholesome in Osage County but throughout Oklahoma and everywhere in the 26 States where Indians reside.

With the decision of Judge Stafford declaring section 2087 in full force and effect, and the enactment by the Sixty-fifth Congress making possession of liquor in Indian country a crime without further

evidence of guilt, the outlook for rapid and permanent improvement in liquor conditions is altogether gratifying, provided that when convictions are secured the penalties imposed by the court are enforced and that pardons are not granted except upon newly discovered evidence or for reasons fully justifying clemency.

It was my experience as a State's attorney, and afterwards as a Federal prosecuting attorney, and now when writing opinions requested of me as Commissioner of Indian Affairs in connection with applications to the President for pardons, that it is an exception to the rule when a defendant who has been convicted is not guilty. Conditions sometimes arise when pardons should be granted, and I believe that every case presented should be judicial-mindedly reviewed and courageously acted upon, whether it be for or against the applicant or whatever the nature of the crime. However, I am opposed to the granting of pardons on popular petition for sentimental reasons or because of political or other influence.

I do not covet, neither do I shirk, the responsibility of taking a position on applications for pardon in cases of conviction for violations of law in Indian country, and yet I would be less than frank if I failed to say that this duty has been one of the most trying I have been called upon to perform.

Notable among the many pardon applications I have reviewed and upon which I have written opinions is the case in which R. K. Warren, of Hugo, Okla., was convicted in the United States court for violation of the Federal liquor laws. In commenting upon his application for pardon and its denial by President Wilson, the American Issue of August 17, 1918, said:

Warren was arrested by an Indian Bureau suppression officer, William R. Houston, son of Gen. Sam Houston, when carrying several hundred bottles of beer in an automobile near the hour of midnight from Texas to Hugo, Okla., for use at a social gathering of young men. At the same time he was prosecuting attorney for the county in which he was delivering the beer and was then a candidate for the legislature. He was elected to the legislature and soon thereafter convicted in the Federal court, from which he appealed to the Supreme Court of the United States, where the judgment against him was affirmed.

The members of the legislature, without a dissenting vote, petitioned the President to pardon him. Then followed an array of appeals such as have never been presented in favor of any violator of the liquor laws.

Fortunately for the friends of law and order, the Commissioner of Indian Affairs, Cato Sells, is always requested to give the President his opinion as to whether or not applications for pardon for crimes committed in Indian country should be granted. Commissioner Sells courageously and vigorously opposed granting the pardon, taking the position that as prosecuting attorney, sworn to enforce the law, Warren was even more guilty than a private citizen committing the same offense and that there was no possible justification for the mitigation of his sentence. The recommendation of the Commissioner was followed by the President instead of the multitude that came to him in behalf of Mr. Warren.

This incident is encouraging and inspiring to officers and citizens who are fighting for law enforcement. It gives a stronger confidence in the integrity and efficiency of our Government and its officers. It is in harmony with that splendid declaration of the President concerning riots and mobs.

Another case typical of many more is the application of H. C. Badger, a prominent farmer, stock raiser, and business man, who was convicted of introducing liquor into Indian country and for whose pardon numerous business men and leading citizens, including many public officials, petitioned. Concerning which case, on April 17, 1918, I wrote the following letter to the pardon attorney of the Department of Justice, which was submitted to the President:

I have your letter of March 25, inclosing the application of H. C. Badger for executive clemency, together with a number of testimonials, and, complying with your request for recommendation, submit the following:

I have given this case close personal attention and have read the entire file in which I find two undisputed facts: First, that defendant Badger did at the time charged ship from Kansas City, Mo., to Keifer, Okla., the latter place being in Indian country, 24 quarts of whisky and 2 quarts of wine, the same being conveyed in a trunk checked by him between the two points named, and that at the same time he carried with him in a grip 1 quart of whisky. Second, that he is a man of wealth and influence in the community where he resides, at or near Keifer.

There can be but one conclusion—that he is guilty of the offense charged, and seeks mitigation for his offense because of his potential relations.

To my mind the showing in his behalf emphasizes his crime. He is presumed to know the law and because of his apparent intelligence he certainly did know both the law and its consequences. To grant him immunity under the circumstances would be to announce a doctrine incompatible with every principle of just law enforcement. It would be unmistakable evidence of willingness to determine punishment upon the element of wealth and power rather than justice, which never can be justified.

Position or influence should not be a factor in the enforcement of the law against the introduction or sale of intoxicating liquors to Indians or in Indian country. It is an axiomatic and good principle that all men should stand equal before the law. In fact, the institutions of our country are in no way better reflected than when this idea is faithfully executed.

My conclusion is that to pardon Badger would strongly tend to destroy confidence in those who have immediately to do with the enforcement of the law.

Altogether, I am of the opinion that he should not be pardoned and that his sentence should be enforced.

Badger's application for pardon was denied by President Wilson.

### SEMINOLES OF FLORIDA.

As a basis to the working out of a constructive plan for their betterment I detailed one of the most experienced Indian Service field men, who is himself of Indian blood, to act in the capacity of superintendent of the Seminoles of Florida, with instructions to make a close investigation of conditions there.

My attitude toward the Seminoles and other neglected tribes and remnants of tribes of Indians is indicated in the following letter

addressed by me to this field representative preliminary to his activities in Florida:

Complying with our verbal understanding, you are directed to proceed to Florida for work in connection with the Seminole Indians, practically assuming the relation to them of superintendent, where you will remain until you receive orders otherwise.

I am sure you understand and appreciate my great interest in the Florida Seminoles. I feel that they have not been given the encouragement to which they are entitled, and that for this and other reasons they have not responded to the comparatively few attentions extended them by the Government.

I am persuaded that human sympathy is the first and most important element in our efforts to induce Indians to accept educational and industrial opportunities, and that this is particularly true of the Seminoles of Florida. I greatly desire them to realize our interest in their welfare, and I believe that your experience and the fact that you are an Indian will enable you to accomplish the betterments necessarily involved in their advancement. For this reason I have requested you to undertake bringing about a cooperative and constructive attitude among these people.

It is my intention to visit the several small tribes and bands of Indians in the Southern States, when I will hope to spend enough time in each locality to secure the first-hand information which will enable me to develop a helpful policy for the heretofore overlooked Seminoles of Florida, Choctaws of Mississippi, Chitimachas of Louisiana, and Alabama Indians of Texas, as I have for other neglected tribes, notably the Papago in Arizona and the Rocky Boys in Montana. I am aroused to the righteousness of doing something for the forgotten Indian, encouraging without spoiling him.

Reports received and an interview with the acting superintendent outlining plans for extending educational and industrial aid to the Seminoles along practical lines are in part being administratively executed, and it is my purpose, with this information, to make a personal visit among these Indians in the immediate future, when a further and definite program will be put in operation.

### MISSISSIPPI CHOCTAWS.

The sixty-fifth Congress appropriated \$75,000 to provide school facilities and other relief for the Choctaws in Mississippi. As a preliminary to the expenditure of this money, and that I might be fortified with first-hand information, I made a personal visit to Mississippi, where I traveled overland among these Indians, principally in Neshoba, Leake, Kemper, Newton, and Scott Counties. I saw them in their homes, at work, on their sick beds, and in their varied relationships of life.

Practically all of the Mississippi Choctaws are full-bloods. Very few own their homes. They are almost entirely farm laborers or share croppers. They are industrious, honest, and necessarily frugal. Most of them barely exist, and some suffer from want of the necessities of life and medical aid. In many of the homes visited by me there was conspicuous evidence of pitiable poverty. I discovered families with from three to five children, of proper age, not one of whom

had spent a day of their life in school. With very few exceptions they indicated willingness to go to school, as did their parents to send them. Several young Choctaw boys and girls expressed an ardent desire for an education.

Generally speaking, the white citizens thereabouts showed a marked interest in the welfare of the Choctaws, and many of them were warmly sympathetic. However, there were a few exceptions, confined to those who selfishly profit from their labor.

While in Mississippi I visited the State Agricultural College at Starkville and the Industrial School for Girls at Columbus. They are splendid institutions. Indeed, I was surprised at the extent and the results of their work. The girls' school is the oldest and one of the best of its kind. I think it may be fairly said of the State Agricultural College of Mississippi that it ranks among the first half dozen similar schools in the United States. Its accomplishments in modern agriculture, animal industry, and kindred subjects reflect great credit upon the State and are an unmistakable demonstration of the results to be secured in the practical application of progressive farming and stock-raising methods throughout the South. The president and members of the faculty of each of these institutions assured me of their great interest in the movement to better the condition of the Choctaw Indians and volunteered active cooperation.

Starkville and Columbus are located within a radius of about 75 miles of the great body of these Indians, consequently the assistance from the Agricultural College and Industrial School is readily accessible.

With the information secured on this trip I am working out the details of an administrative plan from which I expect constructive and gratifying results.

In compliance with the congressional enactment, a special agent, who is also a physician, and who has had large experience among Indians, has been appointed. He has commenced his supervisory work, with headquarters at Philadelphia, Miss., and I am confident that with this and other comparatively small appropriations we will be able to relieve the deplorable condition now existing among these Indians.

Notwithstanding a heroic effort on the part of the Senators and Representatives from Mississippi and their other friends in Congress, it is apparent that the Oklahoma rolls have been finally closed against the Mississippi Choctaws, and that their future is in Mississippi, where, everything considered, I am persuaded that these deserving people should receive kind, prompt, and substantial consideration from the Government.

## ALABAMA INDIANS IN TEXAS.

In carrying out the direction of Congress, the Secretary of the Interior detailed one of his inspectors to visit the Alabama Indians located in Polk County, Tex. This investigation has been made and the report will be presented to the next Congress.

These Indians are in the same class as the Seminoles of Florida and the Choctaws of Mississippi, and I anticipate will be found worthy of serious and friendly consideration.

The following editorial from the Springfield (Mass.) Republican may be of interest in this connection:

“THE LOST TRIBES” OF THE SOUTH RECEIVING ATTENTION OF COMMISSIONER SELLS.

The name of the Interior Department implies that it is busied with home problems, and so it is little talked about in war time. It embraces, among many other things, the Office of Indian Affairs, with Commissioner Cato Sells in charge. Little criticism has been directed at Government work for the Indians under this Commissioner. Possibly the attention of former critics is now centered upon the war, but the thorough and systematic attention given to Indian matters is the real reason. Commissioner Sells has kept himself fully acquainted with the Indians of the West, and special thought is now to be given to what may be called “The Lost Tribes” of the South. Who can remember when an Indian Commissioner visited the Seminoles of Florida, the Choctaws in Mississippi, the Choctaws and Chitimachas in Louisiana, and the Alabama Indians in Texas with a view to working out a helpful program looking to their educational and industrial advancement? This is what Commissioner Sells plans to do. It is to be suspected that the Southern Indians have received none too much attention, and some intelligent official persuasion is surely worth trying.

Altogether I am strongly disposed to extend a helping hand to the forgotten fellow—not in lavish expenditure nor in indefinite extension of paternal aid, but that he shall have an opportunity to lift himself from the condition into which he was thrust by other hands, and a power not his own. “The Lost Tribes” appeal to me as meriting a crumb from the bountiful table that for well-nigh a century has conferred its favors upon their brothers in other sections of the country.

## MISSIONARIES AND HUMANITARIAN AGENCIES.

The events and experience of the year have deepened my appreciation of the earnest labors and helpful cooperation of missionaries at large and throughout the field. The period has been one of unusual affiliation in purpose and methods of work among all agencies, both individual and organized, for the spiritual and moral betterment of the Indians, and has reflected the broad fraternity of aim and effort so clearly developed by the great unity of our American cause in the relief of war-stricken nations. I am sincerely grateful for all that has been achieved through individual philanthropy and denom-

inational endeavor, and in this connection would include my sincere obligation to the Young Men's Christian Association, the Knights of Columbus, the organizations of the American Red Cross, and other organized instrumentalities working to the same great ends. I have been often assisted through these wonderful helpers of humanity, both in procuring important information about the Indian soldiers and in reaching some of them with a word of encouragement where conditions seemed to invite a personal note of sympathy and reassurance.

Your helpful cooperation in all matters affecting the Indians is appreciated, and has been a source of strength in carrying out successfully our policies regarding these people.

Very respectfully,

CATO SELLS,  
*Commissioner.*

The SECRETARY OF THE INTERIOR.

## STATISTICAL TABLES.<sup>1</sup>

TABLE 1.—Comparative statement of work and force in Office of Indian Affairs since 1899.

Year.	Work.		Employees.	
	Communi- cations received.	Increase (+) or decrease (-) over preced- ing year.	Total number em- ployed in Indian Office.	Increase (+) or decrease (-) over preced- ing year.

TABLE 6.—General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment, to June 30, 1918—Continued.

Name of reservation and tribe.	Area (unallotted).	Treaties, laws, or other authorities relating to reserves.
ARIZONA.		
Camp McDowell..... (Under Salt River School.) Tribe: Mohave Apache.	Acres. 24,971	Executive order, Sept. 15, 1903; act of Apr. 21, 1904, vol. 33, p. 211. (See Ann. Rept. 1905, p. 98.)
Cocopa.....	400	Executive order, Sept. 27, 1917, school reserve.
Colorado River <sup>1</sup> ..... (Under Colorado River School.) Tribes: Chemehuevi, Kawia, Cocopa, <sup>4</sup> Mohave.	2 3 236,010	Act of Mar. 3, 1865, vol. 13, p. 559; Executive orders, Nov. 22, 1873, Nov. 16, 1874, and May 15, 1876. (See sec. 25, Indian appropriation act, approved Apr. 21, 1904, vol. 33, p. 224.) Act Apr. 30, 1908 (35 Stat., 77); act Apr. 4, 1910 (36 Stat., 273); act Mar. 3, 1911 (36 Stat., 1063); act Aug. 24, 1912 (37 Stat., 523); Executive order, Nov. 22, 1915. 616 Indians allotted 6,160 acres.
Fort Apache..... (Under Fort Apache School.) Tribes: Chilion, Chiricahua, Coyotero, Mimbreno, and Mogollon Apache.	2 1,681,920	Executive orders, Nov. 9, 1871, July 21, 1874, Apr. 27, 1876, Jan. 26 and Mar. 31, 1877; act of Feb. 20, 1893, vol. 27, p. 469; agreement made Feb. 25, 1896, approved by act of June 10, 1896, vol. 29, p. 358. (See act of June 7, 1897, vol. 30, p. 64.)
Fort Mojave..... (Under Fort Mojave School.) Tribe: Apache.	31,328	Executive orders, Dec. 1, 1910, and Feb. 2, 1911. Sec. 11, act June 25, 1910 (36 Stat., 855-858). (See 18579-1910.) Area original military reservation, 14,000 acres.
Gila Bend..... (Under Pima School.) Tribe: Papago.	3 10,231	Executive orders, Dec. 12, 1882, and Jan. 17, 1909. (See 4106, 1909.)
Gila River..... (Under Pima School.) Tribes: Maricopa and Pima.	3 371,422	Act of Feb. 28, 1859, vol. 11, p. 401; Executive orders, Aug. 31, 1876, Jan. 10, 1879, June 14, 1879, May 5, 1882, and Nov. 15, 1883; Mar. 22, May 8, July 31, 1911; Dec. 16, 1911; June 2, 1913; Aug. 27, 1914; Mar. 18, 1915, and July 19, 1915.

<sup>1</sup> Partly in California.    <sup>2</sup> Outboundaries surveyed.    <sup>3</sup> Surveyed.    <sup>4</sup> Not on reservation.

TABLE 6.—General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment, to June 30, 1918—Continued.

Name of reservation and tribe.	Area (unallotted).	Treaties, laws, or other authorities relating to reserves.
ARIZONA—continued.		
Havasupai (Supai)..... (Under Havasupai School.) Tribe: Havasupai.	Acres. 1 518	Executive orders, June 8 and Nov. 23, 1880, and Mar. 31, 1882.
Hopi (Moqui)..... (Under Moqui School.) Tribe: Hopi (Moqui) and Navajo.	2,472,320	Executive order, Dec. 16, 1882. Act of Mar. 1, 1907 (34 Stat. L., 1021.) (See 45096-1910.)
Kaibab..... (Under Kaibab School.) Tribes: Kaibab and San Juan Salute.	138,240	Secretary's withdrawal, Oct. 15, 1907. (See 73684-1907.) Executive order, June 11, 1913.
Navajo <sup>2</sup> ..... (Under Leupp, Navajo, Western Navajo, San Juan, and Pueblo Bonito Schools.) Tribe: Navajo.	11,887,793	Treaty of June 1, 1868, vol. 15, p. 667, and Executive orders, Oct. 29, 1878, Jan. 6, 1880, two of May 17, 1884, and Nov. 19, 1892. 1,769,600 acres in Arizona and 967,680 acres in Utah were added to this reservation by Executive order of May 17, 1884, and 46,080 acres in New Mexico restored to public domain, but again reserved by Executive orders, Apr. 24, 1886, Jan. 8, 1900, and Nov. 14, 1901. By Executive orders of Mar. 10 and May 15, 1905, 61,523 acres were added to reservation and by Executive order of Nov. 9, 1907, as amended by Executive order of Jan. 28, 1908, 2,972,160 acres were added. 2,064 Indians have been allotted 328,963 acres under the act of Feb. 8, 1887 (24 Stats., 388), as amended. By Executive orders of Dec. 30, 1908, and Jan. 16, 1911, the surplus lands, approximately 1,641,180 acres, in that part of the extension in New Mexico restored to the public domain. (See 35 Stat. L., 457 and 787.) (See 1277-9.) Act of May 27, 1902 (32 Stat., 264), and Mar. 3, 1913 (37 Stat., 1007), R. R. exchanges. Executive orders May 24, 1911, Feb. 17, 1912 (2), Feb. 10, 1913 (2), May 6, 1913, Dec. 1, 1913, July 23, 1914, and Feb. 19, 1915. Also 94,000 acres set aside temporarily for allotment by Executive order, May 7, 1917.
Papago..... (Under San Xavier School.) Tribe: Papago.	2,443,462	Executive order, July 1, 1874, and act of Aug. 5, 1882, vol. 22, p. 291. 41,606 acres allotted to 291 Indians, and 14 acres reserved for school site, the residue, 27,563 acres, unallotted. (See letter book 208, p. 408.) Executive orders, June 16, 1911, and May 28, Sept. 2, Oct. 8, and Dec. 5, 1912, Oct. 27, 1914, Jan. 14, 1916, and Feb. 1, 1917.
Salt River..... (Under Salt River School.) Tribes: Maricopa and Pima.	22,317	Executive orders, June 14, 1879, and Oct. 20, 1910; Sept. 28 and Oct. 23, 1911. (See 26731-1910.) (See Senate Doc. 90, 58th Cong., 2d sess.) 804 Indians allotted 24,403 acres under general allotment act.
San Carlos..... (Under San Carlos School.) Tribes: Arivaipa, Chilion, Chiricahua, Coyotero, Mimbreno, Mogollon, Mohave, Pinal, San Carlos, Tonto, and Yuma Apache.	1,834,240	Executive orders, Nov. 9, 1871, Dec. 14, 1872, Aug. 5, 1873, July 21, 1874, Apr. 27 and Oct. 30, 1876, Jan. 26 and Mar. 31, 1877; act of Feb. 20, 1893, vol. 27, p. 469; agreement made Feb. 25, 1896, approved by act of June 10, 1896, vol. 29, p. 358. (For fuller text see Misc. Indian Doc., vol. 39, p. 35910.) (See act of June 7, 1897, vol. 30, p. 64; act of Mar. 2, 1901, vol. 31, p. 952.) Executive order of Dec. 22, 1902.
Walapai..... (Under Truxton Cañon School.) Tribe: Walapai.	730,940	Executive orders, Jan. 4, 1883, Dec. 22, 1898, May 14, 1900, June 2, 1911, May 29, 1912, and July 18, 1913.
Total.....	21,886,112	
CALIFORNIA.		
Camp or Fort Independence...	360	Executive orders, Oct. 28, 1915, and Apr. 29, 1916.
Cold Springs.....	160	Executive order, Nov. 10, 1914.
Colony or Nevada.....	75	Executive order, May 6, 1913.
Digger..... (Under a farmer.) Tribe: Digger.	370	Act of Mar. 3, 1893 (27 Stats., 612), provides for purchase of 330 acres; not allotted. 40 acres were reserved by order of the Secretary of the Interior, Oct. 28, 1898, for Digger Indians. (See 46597-1907, 71861-1908, 39245-1909.)
Fort Bidwell.....	320	Executive order, Aug. 8, 1917, school reserve.
Guidiville band.....	160	Secretary's withdrawal for wood lot. (See 22266-1909.)
Hoopa Valley..... (Under Hoopa Valley School.) Tribes: Hunsatung, Hu-pa, Klamath River, Miskut, Redwood, Saiaz, Sermalton, and Tshtanatan.	1 89,051	Act of Apr. 8, 1864, vol. 13, p. 39; Executive orders, June 23, 1876, and Oct. 16, 1891. There have been allotted to 639 Indians 29,143.38 acres, reserved to 3 villages 68.74 acres, and opened to settlement under act of June 17, 1892 (27 Stats., p. 52), 15,096.11 acres of land (formerly Klamath River Reservation). (Letter book 263, p. 96; 382, p. 480; 383, p. 170.)

<sup>1</sup> Outboundaries surveyed.

<sup>2</sup> Partly in New Mexico. (See Table 5.)

<sup>3</sup> Partly surveyed.

(See Opinions of Asst. Atty. Gen., Mar. 14, 1894, and Feb. 3, 1904.) 35,000 acres of the 98,211 acres sold. Deeds dated Oct. 4, 1906; approved Dec. 12, 1906.
Total.....	63,211	
NORTH DAKOTA.		
Devils Lake (Under Fort Totten School.) Tribes: Assiniboin, Cuthead, Santee, Sisseton, Yankton, and Wahpeton Sioux.	100,000	Treaty of Feb. 19, 1867, vol. 15, p. 505, agreement Sept. 20, 1872; confirmed in Indian appropriation act approved June 22, 1874, vol. 18, p. 167. (See pp. 328-337, Comp. Indian Laws.) 137,381 acres allotted to 1,189 Indians; 727.83 acres reserved for church and 193.61 acres reserved for Government purposes. Act of Apr. 27, 1904, vol. 33, p. 319, to amend and ratify agreement made Nov. 2, 1901. President's proclamation of June 2, 1904, vol. 33, p. 2368. Trust period extended 10 years. Executive order, Feb. 11, 1918. Unratified agreement of Sept. 17, 1851, and July 27, 1866 (see Laws relating to Indian Affairs, Department of Interior, 1883), pp. 317 and 322; Executive orders, Apr. 12, 1870, July 13, 1880, and June 17, 1892; agreement Dec. 14, 1886, ratified by act of Mar. 3, 1891, vol. 26, p. 1032. (See Pres. proc. May 20, 1891, vol. 27, p. 979.) 229,634.91 acres allotted to 1,379 Indians (see letter book 445, p. 311). Under acts of Mar. 1, 1907 (34 Stat. L., 1042), and June 1, 1910 (36 Stat. L., 455), 532 allotments, aggregating 35,687 acres, were approved Aug. 15, 1910, 579 allotments, aggregating 112,544 acres, were approved Apr. 5, 1912, and 787 allotments, aggregating 206,154 acres, were approved Nov. 29, 1915. (See 61:02-1910, proclamation June 29, 1911 (40 L. D., 151), 227,504 acres open; see H. J. Res. Apr. 3, 1912 (37 Stat. L., 631), and proclamation of Sept. 17, 1915, opening surface of lands classified as coal to homestead entry, authorized by act of Aug. 3, 1914 (38 Stat. L., 681).
Fort Berthold (Under Fort Berthold School.) Tribes: Arikara, Grosventre, and Mandan.		
Standing Rock (Under Standing Rock School.) Tribes: Blackfeet, Hunkpapa, Upper and Lower Yanktonai Sioux.	100,000	Treaty of Apr. 29, 1868, vol. 15, p. 635, and Executive orders Jan. 11-Mar. 16, 1875, and Nov. 28, 1876. Agreement ratified by act of Feb. 28, 1877, vol. 19, p. 254, and Executive orders Aug. 9, 1879, and Mar. 20, 1884 (1,520,640 acres in South Dakota); unratified agreement of Oct. 17, 1882. (For modification see sundry civil appropriation act approved Mar. 3, 1883, vol. 22, p. 624; for text see Misc. Indian Doc., vol. 14, p. 305.) Act of Congress of Apr. 30, 1888, vol. 25, p. 94, not accepted. Act of Congress, Mar. 2, 1889, vol. 25, p. 888. President's proclamation of Feb. 10, 1890, vol. 26, p. 1554. Under acts Mar. 2, 1889, supra, Mar. 1, 1907 (34 Stat. L., 1041), May 29, 1908 (35 Stat. L., 451-460), and Feb. 14, 1913 (37 Stat. L., 675), 4,717 Indians have been allotted 1,388,612 acres. Under President's proclamation of Aug. 19, 1909 (36 Stat. L., 2500), 1,061,700 acres were opened to settlement. Remainder of lands opened to settlement by proclamation Mar. 15, 1915, as authorized by act Feb. 14, 1913 (37 Stat. L., 675, 680).
Turtle Mountain (Under Turtle Mountain Agency.) Tribe: Pembina Chippewa.		
Total.....	100,000	

<sup>1</sup> Surveyed.

TABLE 6.—General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment, to June 30, 1918—Continued.

Name of reservation and tribe.	Area (unallotted).	Treaties, laws, or other authorities relating to reserves.
OKLAHOMA.		
Apache. (Under Kiowa School.)	Acres.	Formerly Fort Sill. (See Executive order Feb. 26, 1897.) Act Mar. 3, 1901 (31 Stat., 1173); act June 28, 1902 (32 Stat., 467). Ex. Doc. No. 117, 49th Cong., 2d sess., act Aug. 24, 1912 (37 Stat., 534); act June 30, 1913 (38 Stat., 92). Lands to be purchased for those members of this band, some 80 in number, who elected to remain in Oklahoma.
Cherokee. (Under superintendent Five Civilized Tribes.)	30	Treaty with Western Cherokees at city of Washington, May 6, 1828 (7 Stat., 311) as amended by the treaty at Fort Gibson, of Feb. 14, 1833 (7 Stat., 414); referred to in treaty with Cherokees at New Echota, Ga., Dec. 29, 1835 (7 Stat., 478); July 19, 1866 (14 Stat., 799), as supplemented by treaty of Apr. 27, 1868 (16 Stat., 727). Agreement of July 1, 1902 (32 Stat., 716). Approximately, 41,824 Cherokees, including 4,919 freedmen, were allotted an average of 110 acres, 40 acres of which was a homestead to be nontaxable while held by the original allottee. Total acreage allotted 4,346,173; sold, 50,985; remaining unsold, 30.
Cherokee Outlet.....		Agreement of Dec. 19, 1891; ratified sec. 10 by act of Mar. 3, 1893 (27 Stat., 640), unoccupied part of Cherokee Outlet, not included in Territory of Oklahoma (26 Stat., 81). 62 Indians allotted 4,949.45 acres under act of Mar. 3, 1893.
Cheyenne and Arapaho. (Under Cheyenne and Arapaho, Cantonment, and Seger Schools.) Tribes: Southern Arapaho and Northern and Southern Cheyenne.		Executive order Aug. 10, 1869; unratified agreement with Wichita, Caddo, and others, Oct. 19, 1872. (See Ann. Rept., 1872, p. 101.) Executive orders of Apr. 18, 1882, and Jan. 17, 1883, relative to Fort Supply Military Reserve (relinquished for disposal under act of Congress of July 5, 1894, by authority of Executive order of Nov. 5, 1894; see General Land Office Report, 1899, p. 158). Executive order of July 17, 1883, relative to Fort Reno Military Reserve. Agreement made October, 1850, and ratified and confirmed in Indian appropriation act approved Mar. 3, 1891, vol. 26, pp. 1022-1026. 528,789 acres allotted to 3,331 Indians; 231,828.55 acres for Oklahoma school lands; 32,343.93 acres reserved for military, agency, mission, etc., purposes; the residue, 3,500,562.05 acres, opened to settlement. (See Pres. proc. Apr. 12, 1892, vol. 27, p. 1018.) Executive order, July 12, 1895. President's proclamation of Aug. 12, 1903, vol. 33, p. 2317. Act of June 17, 1910 (36 Stat., 533), 57,637-10. Executive order Dec. 29, 1915, setting aside 40 acres for agency and school purposes.
Chickasaw. (Under superintendent Five Civilized Tribes, Muskogee, Okla.)	10	Treaty of June 22, 1855, vol. 11, p. 611; agreement of Apr. 23, 1897, ratified by act of June 28, 1898, vol. 30, p. 505; act of July 1, 1902, vol. 32, p. 641, ratifying agreement of Mar. 21, 1902; act of Apr. 21, 1904, vol. 33, p. 209; act of Apr. 28, 1904, vol. 33, p. 544. 10,966 Indians have been allotted 3,800,350 acres; sold, 870,095, remaining unsold, 10 acres.
Choctaw. (Under superintendent Five Civilized Tribes, Muskogee, Okla.)	14,460	Treaty of June 22, 1855, vol. 11, p. 611. Same as Chickasaw. Approximately 26,828 Indians have been allotted 4,291,036 acres; sold, 2,567,210 acres; unsold, 14,460 acres. There remains unsold also the coal and asphalt deposits within the segregated coal and asphalt area of the Choctaw and Chickasaw Nations.
Creek. (Under superintendent Five Civilized Tribes, Muskogee, Okla.)	352	Treaties of Feb. 14, 1883, vol. 7, p. 417, and June 14, 1866, vol. 14, p. 785, and the deficiency appropriation act of Aug. 5, 1882, vol. 22, p. 265. (See Ann. Rept. 1882, p. 11v.) Agreement of Jan. 19, 1889, ratified by the act of Mar. 1, 1889, vol. 25, p. 757; President's proclamation, Mar. 23, 1889, vol. 26, p. 1544; agreement of Sept. 27, 1897, ratified by act of June 28, 1898, vol. 30, p. 514; agreement of Mar. 8, 1900, ratified by act of Mar. 1, 1901, vol. 31, p. 861; President's proclamation of June 25, 1901, vol. 32, p. 1971; supplement-agreement of June 30, 1902, vol. 32, p. 500; President's proclamation of Aug. 8, 1902, vol. 32, p. 2021. (See act of May 27, 1902, vol. 32, p. 258; act of Apr. 21, 1904, vol. 33, p. 204.) Approximately 18,761 Indians have been allotted 2,997,114 acres; sold, 65,612 acres; remaining unsold, 322 acres.
Iowa. (Under Sac and Fox School.) Tribes: Iowa and Tonkawa.		Executive order, Aug. 15, 1883; agreement May 20, 1860, ratified by act of Feb. 13, 1891, vol. 26, p. 753. 8,605 acres allotted to 108 Indians; 20 acres held in common for church, school, etc.; the residue opened to settlement. Proclamation of President Sept. 18, 1891, vol. 27, p. 989. (See Ann. Rept. 1891, p. 677, and letter book 222, p. 364.)

Remainder, 99,644 acres, allotted to 247 Indians; act of July 1, 1902, vol. 32, p. 636, ratifying agreement, not dated. Act Mar. 3, 1909. (35 Stat., 778.)

TABLE 6.—General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment, to June 30, 1918—Continued.

Name of reservation and tribe.	Area (unallotted).	Treaties, laws, or other authorities relating to reserves.
<b>OKLAHOMA—continued.</b>		
Kickapoo..... (Under Shawnee School.) Tribe: Mexican Kickapoo.	<i>Acres.</i>	Executive order, Aug. 15, 1883; agreement June 21, 1891; ratified by act of Mar. 3, 1893, vol. 27, p. 557. 22,650 acres allotted to 280 Indians; 479.72 acres reserved for mission, agency, and school purposes; residue opened to settlement by proclamation of the President May 18, 1895, vol. 29, p. 868; act of Mar. 3, 1903, vol. 32, p. 1001. June 21, 1906. (34 Stat., 362.)
Kiowa and Comanche..... (Under Kiowa Agency.) Tribes: Apache, Comanche, Delaware, and Kiowa.		Treaty of Oct. 21, 1867, vol. 15, pp. 581 and 589; agreement made Oct. 6, 1892; ratified by act of June 6, 1900, vol. 31, p. 676, ceding 2,488,893 acres, of which 445,000 acres have been allotted to 3,444 Indians; 11,972 acres reserved for agency, school, religious, and other purposes. The residue 2,033,583 acres, opened to settlement (letter books 486, p. 440; 488, p. 478). President's proclamation of July 4, 1901, vol. 32, p. 1975; June 23, 1902, vol. 32, p. 2007; Sept. 4, 1902, vol. 32, p. 2026; and Mar. 29, 1904, vol. 33, p. 2340. Of the 480,000 acres grazing land set apart under act of June 6, 1900, 1,841.92 acres were reserved for town sites under act Mar. 20, 1906 (34 Stat. L., 801), 82,059.52 acres were allotted to 513 Indians under act of June 5, 1906 (34 Stat. L., 213), and 480 acres allotted to 3 Indians under act of June 5, as amended by act Mar. 1, 1907 (34 Stat. L., 1018). The General Land Office reports the sale and entry of approximately 401,465.92 acres under act of June 5, and of 21,251.75 acres under act of June 28, 1906, to June 30, 1911. (See 87404-1909.) (See 75344-1908.) Under act May 29, 1908 (35 Stat., 471), and act June 25, 1910 (36 Stat., 861), 20,498 acres allotted to 169 Indians. Sale of unused, unreserved lands, act Mar. 3, 1911 (36 Stat., 1069). Act Mar. 4, 1915, Department of Agriculture experiment station. Sale of school and agency reserves, act June 30, 1913 (38 Stat., 92).
Fort Sill Apaches..... (Under Kiowa School.)		Formerly prisoners of war, remnants and descendants of Chief Geronimo's Band. 6,149 acres of inherited Kiowa, Comanche, and Apache lands were purchased by the United States for allotment to 81 Indians and 3 whites of this band, who elected to remain in Oklahoma. (187 of the band removed to Mesquero. See Ann. Rept. 1913.) These lands were purchased under the acts of June 25, 1910 (36 Stat., 855), Aug. 24, 1912 (37 Stat., 534), appropriating \$200,000; June 30, 1913 (38 Stat., 94), appropriating \$100,000; and Aug. 1, 1914 (38 Stat., 587). See Executive order Feb. 26, 1897, act Mar. 3, 1901 (31 Stat., 1173); act June 28, 1902 (32 Stat., 467); Ex. oc. No. 117, 49th Cong., 2d sess.
Modoc..... (Under Seneca School.) Tribe: Modoc.		Agreement with Eastern Shawnees made June 23, 1874 (see Ann. Rept. 1882, p. 271), and confirmed in Indian appropriation act approved Mar. 3, 1875, vol. 18, p. 447. 1 lands all allotted—3,966 acres allotted to 68 Indians, 8 acres reserved for church and cemetery purposes, 2 acres for school and 24 acres for timber. (Letter book 220, p. 102.) Act Mar. 3, 1909. (35 Stat., 752.) Ex. order Sept. 14, 1916, extending trust period 10 years with exception of 12 allottees.
Oakland..... (Under Ponca School.) Tribes: Tonkawa and Lipan.		Act of May 27, 1878, vol. 20, p. 84. (See Ann. Rept. for 1882, p. LXII.) (See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 476.) (See deed from Nez Perce, May 22, 1885, vol. 6, Indian Deeds, p. 504.) 11,456 acres allotted to 73 Indians; 160.50 acres reserved for Government and school purposes. The residue, 79,276.60 acres, opened to settlement. (Letter book 257, p. 240.) Agreement made Oct. 21, 1891, ratified by Indian appropriation act approved Mar. 3, 1893, vol. 27, p. 644. (For text, see Ann. Rept., 1893, p. 524.) Trust period extended 10 years on 27 allotments. Executive order, May 24, 1918.
Osage..... (Under Osage School.) Tribes: Great and Little Osage.		Article 16, Cherokee treaty of July 19, 1866, vol. 14, p. 804; order of Secretary of the Interior, Mar. 27, 1871; act of June 5, 1872, vol. 17, p. 228. (See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 482.) (See act of June 28, 1906 (34 Stat., 539), act of Mar. 3, 1909 (35 Stat., 787), and Public Resolution No. 51, approved Feb. 28, 1909.) 2,230 Indians have been allotted 1,065,134.31 acres (3 selections). Since July 1, 1909, these 2,230 Indians have been allotted 1,465,350 acres from surplus lands, and 5,178.53 acres have been reserved for church, town-site, and railroad purposes. Act Mar. 3, 1909 (35 Stat., 778). Act Apr. 18, 1912 (37 Stat., 86), and Executive order June 1, 1914, rates of royalty on oil.

TABLE 6.—General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment, to June 30, 1918—Continued.

Name of reservation and tribe.	Area (unallotted).	Treaties, laws, or other authorities relating to reserves.
OKLAHOMA—continued.		
Otoe (Under Otoe School.) Tribe: Otoe and Missouri.	Acres.	Act of Mar. 3, 1881, vol. 21, p. 381; order of the Secretary of the Interior, June 25, 1881. (See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 479. Under acts of Feb. 8, 1887 (24 Stats., 388), Feb. 28, 1891 (26 Stats., 794), and Apr. 21, 1904 (33 Stats., 189), 128,251 acres were allotted to 514 Indians (885 allotments—see letter book 929, p. 326), 720 acres were reserved for agency, school, church, and cemetery purposes, and 640 acres set aside for tribal uses. Also act June 22, 1910 (36 Stat., 580-581).
Ottawa (Under Seneca School.) Tribe: Ottawa of Blanchards Fork and Roche de Boeuf.		Treaty of Feb. 23, 1867, vol. 15, p. 513; 12,995 acres were allotted to 160 Indians; 557.95 acres were authorized to be sold by act of Mar. 3, 1891 (vol. 26, p. 989). The residue, 1,587.25 acres sold. Letter book 229, p. 115, and act Mar. 3, 1909 (35 Stat., 752).
Pawnee (Under Pawnee School.) Tribe: Pawnee.		Act of Apr. 10, 1876, vol. 19, p. 29. Of this, 230,074 acres are Cherokee and 53,006 acres are Creek lands. (See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 470.) 112,701 acres allotted to 820 Indians; 840 acres were reserved for school, agency, and cemetery purposes; the residue, 169,320 acres, opened to settlement. (Letter books 261, p. 388, and 263, p. 5.) Agreement made Nov. 23, 1892, ratified by act of Mar. 3, 1893, vol. 27, p. 644. (For text see Ann. Rept., 1893, p. 526.) Trust period extended 10 years. Executive order, Mar. 2, 1918.
Peoria (Under Seneca School.) Tribe: Kaskaskia, Miami, Peoria, Piankashaw, and Wea.		Treaty of Feb. 23, 1867, vol. 15, p. 513. 43,334 acres allotted to 218 Indians. The residue, 6,313.27 acres, sold under act of May 27, 1902 (32 Stats., 245).
Ponca (Under Ponca School.) Tribe: Ponca.	1387	Acts of Aug. 15, 1876, vol. 19, p. 192; Mar. 3, 1877, vol. 19, p. 287; May 27, 1878, vol. 20, p. 76; and Mar. 3, 1881, vol. 21, p. 422. (See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 473.) There have been allotted to 782 Indians 100,734 acres, and reserved for agency, school, mission, and cemetery purposes 523.56 acres, leaving unallotted and unreserved 387 acres. (Letter books 302, p. 311, and 813, p. 401.) Indian appropriation act approved Apr. 21, 1904, vol. 33, p. 217. (See 38067-1915.)
Potawatomi (Under Shawnee School.) Tribe: Absentee Shawnee and citizen Potawatomi.		Treaty of Feb. 27, 1867, vol. 15, p. 531; act of May 23, 1872, vol. 17, p. 159. (222,716 acres are Creek ceded lands; 365,851 acres are Seminoe lands.) Agreements with citizen Potawatomi June 25 and absentee Shawnees June 26, 1890 ratified and confirmed in the Indian appropriation act of Mar. 3, 1891, vol. 26, pp. 1016-1021. 215,899.42 acres allotted to 1,490 Potawatomi, and 70,791.47 acres allotted to 563 absentee Shawnees, and 510.63 acres reserved for Government purposes; the residue opened to settlement by the President's proclamation of Sept. 18, 1891, vol. 27, p. 989. (See letter book 222, pp. 442, 444, and Ann. Rept. for 1891, p. 677.) Executive order Nov. 24, 1916, and Jan. 15, 1917, extending trust period 10 years with exception of 15 absentee Shawnees, 85 citizen Potawatomi.
Quapaw (Under Seneca School.) Tribe: Quapaw.		Treaties of May 13, 1833, vol. 7, p. 424, and of Feb. 23, 1867, vol. 15, p. 513. 56,245.21 acres allotted to 248 Indians, 400 acres reserved for school and 40 acres for church purposes. (Letter book 335, p. 326.) Agreement of Mar. 23, 1893, ratified in Indian appropriation act approved Mar. 2, 1895, vol. 28, p. 907. Agreement of Jan. 2, 1899, ratified in Indian appropriation act approved Mar. 3, 1901, vol. 31, p. 1067. Act of Mar. 3, 1903, vol. 32, p. 997.
Sauk and Fox (Under Sac and Fox School.) Tribe: Ottawa, Sauk and Fox of the Mississippi.		Treaty of Feb. 18, 1867, vol. 15, p. 495; agreement June 12, 1890; ratified by act of Feb. 13, 1891, vol. 26, p. 749. 87,683.46 acres allotted to 548 Indians, and 800 acres reserved for school and agency purposes; the residue opened to settlement by the President's proclamation Sept. 18, 1891, vol. 27, p. 989. (See letter book 222, p. 169, and Ann. Rept. for 1891, p. 677.) Trust period extended for 10 years by Executive order of Mar. 27, 1896; again by Executive order of Aug. 28, 1906; again by Executive order of Aug. 1, 1916, with exception of 55 allottees.

1 Surveyed.

TABLE 6.—General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment, to June 30, 1918—Continued.

Name of reservation and tribe.	Area (unallotted).	Treaties, laws, or other authorities relating to reserves.
<b>OKLAHOMA—continued.</b>		
Seminole..... (Under superintendent Five Civilized Tribes, Muskogee, Okla.)	Acres. 122	Treaties of Mar. 21, 1866, vol. 14, p. 755. (See Creek agreement of Feb. 14, 1881, Ann. Rept. 1882, p. 54, and deficiency act of Aug. 5, 1882, vol. 22, p. 265.) Agreement of Mar. 16, 1889. (See Indian appropriation act approved Mar. 2, 1889.) Agreement recorded in the treaty book, vol. 3, p. 35; agreement made Dec. 16, 1897, ratified by the act of July 1, 1898, vol. 30, p. 567; agreement of Oct. 7, 1899, ratified by act of June 2, 1900, vol. 31, p. 250. Approximately 3,127 Indians have been allotted 365,852 acres; sold, 4,263 acres; remaining unsold, 122 acres.
Seneca..... (Under Seneca School.) Tribes: Seneca, Eastern Shawnee, Wyandot, Peoria, etc.		Treaties of Feb. 28, 1831, vol. 7, p. 348; of Dec. 29, 1832, vol. 7, p. 411, and of Feb. 23, 1867, vol. 15, p. 513. 41,813 acres allotted to 435 Indians; 104.22 acres reserved for Government, church, and school purposes. Agreement of Dec. 2, 1901, ratified by act of May 27, 1902, vol. 32, p. 262; Executive order Feb. 15, 1916, extending trust period for 10 years, with exception of 44 allottees.
Shawnee..... (Under Seneca School.) Tribes: Seneca, absentee Shawnee, Mexican Kickapoo.		Treaties of July 20, 1831, vol. 7, p. 351; of Dec. 29, 1832, vol. 7, p. 411; of Feb. 23, 1867, vol. 15, p. 513, and agreement with Modocs, made June 23, 1874 (see Ann. Rept., 1882 p. 271), confirmed by Congress in Indian appropriation act approved Mar. 3, 1875, vol. 18, p. 447. 12,745 acres allotted to 117 Indians; 86 acres reserved for agency purposes (letter books 208, p. 266, and 233, p. 207); the residue, 2,543 acres, sold (agreement of Dec. 2, 1901, ratified by act of May 27, 1902, vol. 32, p. 262).
Wichita..... (Under Kiowa Agency.) Tribes: Ioni, Caddo, Comanche, Delaware, Towakoni Waco, and Wichita.		(See treaty of July 4, 1866, with Delawares, art. 4, vol. 14, p. 794.) Unratified agreement, Oct. 19, 1872. (See Ann. Rept., 1872, p. 101.) Agreement made June 4, 1891, ratified by act of Mar. 2, 1895, vol. 28, p. 895. 152,714 acres allotted to 957 Indians; 4,151 acres reserved for agency, school, religious, and other purposes. The residue, 586,468 acres, opened to settlement (letter book 490, p. 90.) President's proclamation of July 4, 1901, vol. 32, p. 1975. Unoccupied Chickasaw and Choctaw leased lands west of the North Fork of the Red River. Act of May 4, 1896, vol. 29, p. 113. President's proclamation, Mar. 16, 1896, vol. 29, p. 878. Act of June 6, 1900 (31 Stat., 680.)
Wyandot..... (Under Seneca School.) Tribe: Wyandot.		Treaty of Feb. 23, 1867, vol. 15, p. 513. 20,942 acres allotted to 244 Indians, 16 acres to churches, etc., leaving 534.72 acres unallotted (letter book 228, p. 332). Unallotted land sold, act Mar. 3, 1909 (35 Stat., 752). Act Apr. 28, 1904 (33 Stat., 519), allotments on public domain to absentee Wyandot.
Total.....	15,361	
<b>OREGON.</b>		
Grande Ronde..... (Under Siletz Agency.) Tribes: Kalapuya, Clackamas, Cow Creek, Lakmlut, Marys River, Mohala, Nestucca, Rogue River, Santiam, Shasta, Tumwater, Umpqua, Wapato, and Yamhill.		Treaties of Jan. 22, 1855, vol. 10, p. 1143, and of Dec. 21, 1855, vol. 12, p. 982; Executive order June 30, 1857. 440 acres reserved for Government use and 32,983 acres allotted to 269 Indians. (See letter book 210, p. 328.) Act of Apr. 28, 1904, vol. 33, p. 567, amending and ratifying agreement of June 27, 1901 (33 L. D., 586). Executive order Apr. 29, 1916, extending trust period 10 years with exception of 66 allottees.
Klamath..... (Under Klamath School.) Tribes: Klamath, Modoc, Paiute, Pit River, Walpape, and Yahooskin Band of Snake (Shoshoni).	1 812, 707	Treaty of Oct. 14, 1864, vol. 16, p. 707. Act June 10, 1896 (29 Stat., 321). Act of May 27, 1902 (32 Stat., 260). 208,278 acres allotted to 1,345 Indians; 6,094.77 acres reserved for agency, school, and church purposes. Indian appropriation act approved Apr. 21, 1904, vol. 33, p. 202; act of Mar. 3, 1905, vol. 33, p. 1033, and act of June 21, 1906 (34 Stat., 367). (See act of Mar. 3, 1909 (35 Stat., l. 752), removal of Modocs in Oklahoma to Klamath and allotments thereto.) Boundary dispute (see 9881-1911.)
Siletz..... (Under Siletz Agency.) Tribes: Alsea, Coquille, Kusan, Kwatami, Rogue River, Skoton, Shasta, Salustkea, Siu-slaw, Tututni, Umpqua, and 13 others.		Unratified treaty, Aug. 11, 1855; Executive orders Nov. 9, 1855, and Dec. 21, 1865, and act of Mar. 3, 1875, vol. 18, p. 446. Agreement Oct. 31, 1892, ratified by act of Aug. 15, 1894, vol. 28, p. 323. 44,459 acres allotted to 551 Indians. Residue, 177,563.66 acres (except 5 sections), ceded to United States. (See letter book 281, p. 358.) President's proclamation, May 16, 1895, vol. 29, p. 866. Acts of May 31, 1900, vol. 31, p. 233, and Mar. 3, 1901, vol. 31, p. 1085. Act of May 13, 1910 (36 Stat., 367). Executive order July 19, 1915.

1 Outboundaries surveyed.

TABLE 6.—General data for each Indian reservation, under what agency or school, tribes occupyin; or belongin; to it, area not allotted or specially reserved, and authority for its establishment, to June 30, 1918—Continued.

Name of reservation and tribe.	Area (unal- lotted).	Treaties, laws, or other authorities relating to reserves.
OREGON—continued.		
Umatilla..... (Under Umatilla School.) Tribes: Cayuse, Umatilla, and Wallawalla.	Acres. 1 74,032	Treaty of June 9, 1855, vol. 12, p. 945, and act of Aug. 5, 1882, vol. 22, p. 297; Mar. 3, 1885, vol. 23, p. 340, and sec. 8 of act of Oct. 17, 1888, vol. 25, p. 559. (See orders Secretary of Interior, Dec. 4, 1888, Ann. Rept., 1891, p. 682.) 82,742 acres allotted to 1,118 Indians, 980 acres reserved for school and mission purposes. (See letter book 255, p. 132.) Act of July 1, 1902, vol. 32, p. 730; act Mar. 2, 1917 (39 Stat. 969-86), providing for allotments as long as any land is available.
Warm Springs..... (Under Warm Springs School.) Tribes: Des Chutes, John Day, Paiute, Teneino, Warm Springs, and Wasco.	1 322, 275	Treaty of June 25, 1855, vol. 12, p. 963. 140,529 acres allotted to 968 Indians under the general allotment act of February 8, 1887 (24 Stat., 338), as amended, and 1,195 acres reserved or for church, school, and agency purposes. Boundary dispute: Acts Aug. 19, 1890 (26 Stat., 355); June 6, 1894 (28 Stat., 86), and Mar. 2, 1917 (39 Stat., 969-986).
Total.....	1, 209, 014	
SOUTH DAKOTA.		
Crow Creek and Old Winnebago..... (Under Crow Creek School.) Tribes: Lower Yanktonai, Lower Brule, Miniconjou, and Two Kettle Sioux.		Order of department, July 1, 1863 (see Ann. Rept., 1863, p. 318); treaty of Apr. 29, 1868, vol. 15, p. 635, and Executive order, Feb. 27, 1885 (see President's proclamation of Apr. 17, 1885, annulling Executive order of Feb. 27, 1885; Ann. Rept., 1885, p. 51); act of Mar. 2, 1889, vol. 25, p. 888; President's proclamations, Feb. 10, 1890, vol. 26, p. 1554. There have been allotted to 1,461 Indians 272,720 acres, and reserved for agency, school, and religious purposes 1,076.90 acres.
Lake Traverse..... (Under Sisseton School.) Tribes: Sisseton and Wahpeton Sioux.		Treaty of Feb. 19, 1867, vol. 15, p. 505; agreement, Sept. 20, 1872; confirmed in Indian appropriation act approved June 22, 1874, vol. 18, p. 167. (See pp. 328-337, Comp. Indian Laws.) Agreement, Dec. 12, 1889, ratified by act of Mar. 3, 1891, vol. 26, pp. 1035-1038. 308,838 acres allotted to 2,006 Indians, 32,840.25 acres reserved for Stateschool purposes, 1,347.01 acres for church and agency purposes; the residue, 574,678.40 acres, opened to settlement. (See President's proclamation, Apr. 11, 1892, vol. 27, p. 1017.) Trust period extended 10 years, Executive order of Apr. 16, 1914.
Cheyenne River..... (Under Cheyenne River School.) Tribes: Blackfeet, Miniconjou, Sans Arcs, and Two Kettle Sioux.	219, 206	Treaty of Apr. 29, 1868, vol. 15, p. 635, and Executive orders, Jan. 11, Mar. 16, and May 20, 1875, and Nov. 28, 1876; agreement ratified by act of Feb. 28, 1877, vol. 19, p. 254, and Executive orders, Aug. 9, 1879, and Mar. 20, 1884. Unratified agreement of Oct. 17, 1882. (For modification see sundry civil appropriation act approved Mar. 3, 1883, vol. 22, p. 624, for text see Misc. Indian Doc., vol. 14, p. 305.) Act of Apr. 30, 1888, vol. 25, p. 94, not accepted. Act of Mar. 2, 1889, vol. 25, p. 888. President's proclamation of Feb. 10, 1890, vol. 26, p. 1554. See (act of Feb. 20, 1896, vol. 29, p. 10.) President's proclamations of Feb. 7, 1903, vol. 32, p. 2035, and Mar. 30, 1904, vol. 33, p. 2340. 1,052,320.99 acres have been allotted to 3,880 Indians. (See L. B. 828, p. 321.) Act of May 29, 1908 (35 Stat. L., 460). Under President's proclamation of Aug. 19, 1909 (36 Stat., 2500), 1,158,010 acres were opened to settlement, leaving unallotted and unreserved 219,206 acres.
Lower Brule..... (Under Lower Brule School.) Tribes: Lower Brule and Lower Yanktonai Sioux.	1 24, 000	Treaty of Apr. 29, 1868, vol. 15, p. 635, and Executive orders, Jan. 11, Mar. 16, and May 20, 1875, and Nov. 28, 1876; agreement ratified by act of Feb. 28, 1877, vol. 19, p. 254, and Executive orders, Aug. 9, 1879, and Mar. 20, 1884. Unratified agreement of Oct. 17, 1882. (For modification see sundry civil appropriation act approved Mar. 3, 1883, vol. 22, p. 624; for text see Misc. Indian Docs., vol. 14, p. 305.) Act of Apr. 30, 1888, vol. 25, p. 94, not accepted. Act of Mar. 2, 1889, vol. 25, p. 888. President's proclamation of Feb. 10, 1890, vol. 26, p. 1554. (See act of Feb. 20, 1896, vol. 29, p. 10.) Agreement made Mar. 1, 1898, ratified by act of Mar. 3, 1899, vol. 30, p. 1362, ceding 120,000 acres to the United States. 202,992 acres allotted to 868 Indians, and 964.06 acres reserved for agency, school, and religious purposes, leaving unallotted and unreserved 24,000 acres. (See letter book 498, p. 336.) (See act of Apr. 21, 1906, 34 Stats., 124 and 1048, and President's proclamations of Aug. 12, 1907, and Sept. 24, 1913.) (Superintendent's report June 11, 1918 [50,169-18]).

1917.....	<sup>3</sup> 160	20,368	234	4,925	394	25,294
1918.....	<sup>3</sup> 161	19,395	223	4,427	384	23,822

<sup>1</sup> For other years' see 1913 report.

<sup>2</sup> Indian children in public schools under contract are included in the average attendance, but the schools are not included in the number of schools.

<sup>3</sup> Includes Five Tribes, boarding schools.

<sup>4</sup> The decrease in attendance is due to a different method of computation: Formerly the average attendance was the average of three-quarters having the greatest attendance. The year's attendance has been computed for 10 months, including September, when the attendance is always small.

APPROPRIATIONS MADE FOR SCHOOLS BY THE GOVERNMENT SINCE 1876.

1 Data incomplete.  
 2 Does not include Pierre, Standing Rock, and Fort Lapwai, which show an irrigable area of 90,526 acres preceding table.  
 3 Overestimated last year.  
 4 Not reported.  
 5 Dry ditches.  
 6 1917 report.  
 7 Former report.  
 8 As reported.  
 9 Does not include crop value of leased land.  
 10 Former report-pertained to allotments.  
 11 No living water on land.

<sup>1</sup> Act of Mar. 3, 1909 (35 Stat. L., 751).<sup>2</sup> Act of May 27, 1908 (35 Stat. L., 312); by departmental approval.

NOTE.—Act of Congress dated May 27, 1908 (35 Stat. L., 312), removing restrictions from all lands of intermarried whites, freedmen, and Indians of less than half Indian blood, and from all lands except homesteads of Indians having half or more than half and less than three-quarters Indian blood, operated to remove restrictions from the lands of 70,000 Indians, who held 8,000,000 acres.
